

The Complete Technology Book on Wax and Polishes

Description:

The Complete Technology Book on Wax and Polishes

(Formulae, Manufacturing Processes with Machinery & Equipment Details)

The main purpose of this technology book on wax and polishes manufacturing processes is to provide an in-depth explanation of the technologies used in wax and polishes manufacturing processes. This technology book gives you all the formulas, equipment details, and manufacturing processes required to produce waxes, polishes, and related products like automotive paints and coatings, water repellents, automobile undercoats, floor coatings etc. This technology book on wax and polishes will be useful not only to production units but also to engineers working in research institutions or industrial consultancy companies interested in these technologies.
