

MSME Business List for Startups, Project Opportunities, Business Ideas (NPCS Newsletter - Issue 12 2016)

Description:

Everybody dreams of being an entrepreneur, working on their own terms. If you are not scared of failure, like how greats have failed in their time, you have already taken the first step into entrepreneurship. Anyone can start a business entity without being bogged down by age or gender. If you're an entrepreneur, it's important that you love your business; after all you have the freedom and opportunity to make it what you want! If you're a new start-up or small business it can be difficult to see why you should invest in your brand and reputation. Your brand is the shorthand way people think about you. As entrepreneurs, we all create our own path. Listen to your own advice. Whatever your reason for wanting to start your own business, running the show can be personally and financially rewarding--if you come up with the right business idea. Starting start-ups is just like everything else. The biggest mistake you can make is not to try hard enough. To the extent there's a secret to success, it's not to be in denial about that.

We believe that preparing a business plan is important for any business regardless of its size or nature. To make it easier here are few project profiles for planning a business:

Project report, profile covered in this Issue:

Multicoloured Glass Bottle with Cork Cap on Top
