

Toughened Glass Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics

Description:

Toughened or tempered glass is a type of safety glass processed by controlled thermal or chemical treatments to increase its strength compared with normal glass. Tempering puts the outer surfaces into compression and the inner surfaces into tension. Such stresses cause the glass, when broken, to crumble into small granular chunks instead of splintering into jagged shards as plate glass (a.k.a. annealed glass) creates. The granular chunks are less likely to cause injury.

As a result of its safety and strength, toughened glass is used in a variety of demanding applications, including passenger vehicle windows, shower doors, architectural glass doors and tables, refrigerator trays, mobile screen protectors, as a component of bulletproof glass, for diving masks, and various types of plates and cookware.

Few Indian Major Players are as under:

- Asahi India Glass Ltd.
- Atul Glass Inds. Ltd.
- Auroplast India Ltd.
- Cherry Fashions Ltd.
- Floatglass India Ltd.
- Gobind Glass &Inds. Ltd.
- Gold Plus Glass Industry Ltd.
- Gujarat Borosil Ltd.
- Gujarat Guardian Ltd.
- H N G Float Glass Ltd.
