Production of Herbal Wine Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant

Description:

Wine is an alcoholic beverage made from fermented grapes, generally Vitisvinifera or its hybrids with Vitislabrusca or Vitisrupestris. Grapes ferment without the addition of sugars, acids, enzymes, water, or other nutrients as yeast consumes the sugar in the grapes and converts it to ethanol and carbon dioxide. Different varieties of grapes and strains of yeasts produce different styles of wine.

There are also wines made from fermenting other fruits or cereals, whose names often specify their base, with some having specific names. Wines made from plants other than grapes include rice wine and various fruit wines such as those made from plums or cherries. Some well-known example is hard cider from apples, perry from pears, pomegranate wine, and elderberry wine.

For some compounds found in herbs, in fact alcohol is a more effective medium than water. This is why herbal tinctures are an effective method of healing with herbs. In an herbal wine infusion, wine also serves to stimulate the bloodstream, having an overall warming, and soothing impact on the body.

Few Indian Major Players of Grape Wine are as under:

•Chateau Indage Limited

•Grover Vineyards Limited

•Sula Wine yards

•Sankalp Wines

•Renaissance Wines

•ND Wines

•Vintage Wines

•Mandala Valley

•Flamingo Wines

•Vinicola
