

Wire Nails Manufacturing Business. How to Start Nail Factory. Profitable Small Business Ideas in India

Description:

Nails are pin-shaped, sharp objects of hard metal or alloy used as fasteners. They are typically made of steel, often dipped or coated to prevent corrosion in harsh conditions or improve adhesion. This also helps to add to its aesthetics (decorative appearance) in addition to improving the gripping strength. Ordinary nails for wood are usually of soft, low carbon or mild steel while those for concrete are harder.

Nails are driven into the work piece by a hammer, nail gun or an explosive charge and they hold materials together by friction in the axial direction and shear strength. Nails are used for various purposes and industries ranging from building and construction to carpentry. It is for this reason that the types of nails are many and varied.

Wire nail is very well known item, as it is very common product, which is normally used in daily life. It is used for fastening purpose. Its use is so wide spread that it has become part and parcel of the life.

Wire nails are pin-shaped, sharp objects of hard metal or alloy used as fasteners.
