

Adhesive from Maize Starch Small Business Ideas for more Profits. How to Start Adhesives Manufacturing Unit. Adhesive from Maize Starch

Description:

Adhesive, any substance that is capable of holding materials together in a functional manner by surface attachment that resists separation. "Adhesive" as a general term includes cement, mucilage, glue, and paste—terms that are often used interchangeably for any organic material that forms an adhesive bond.

Starch is a polysaccharide carbohydrate. All green plants store starch as energy produced by photosynthesis. The most common form of starch is amylose and amylopectin. Maize (Corn) Starch (C₆H₁₀O₅) is the leading source of starch both for food and for its use in industries.

Few Indian Major Players are as under

- Anabond Ltd.
- Arofine Polymers Ltd.
- F C L Technologies & Products Ltd.
- Golden Chem-Tech Ltd.
- Henkel Adhesives Technologies India Pvt. Ltd
