

Banana and Banana Products Processing

Description:

Banana and Banana Products Processing (Banana Puree, Banana Processing, Banana Concentrate, Banana Pulp, Banana Wine, Banana Beer, Banana Chips, Wafers, Banana Powder and Value Added Products)

The banana is an edible fruit – botanically a berry – produced by several kinds of large herbaceous flowering plants in the genus *Musa*. In some countries, bananas used for cooking may be called plantains, in contrast to dessert bananas. The fruit is variable in size, color and firmness, but is usually elongated and curved, with soft flesh rich in starch covered with a rind which may be green, yellow, red, purple, or brown when ripe. The fruits grow in clusters hanging from the top of the plant.

Banana Industry

The banana industry is an important part of the global industrial agro business. Most bananas go into export and international trade for consumption in Western countries. They are grown on banana plantations primarily in Latin America and the Caribbean as well as Central and South America.

Banana powder

Banana powder is a powder made from processed bananas. It is used as a component for production of milk shakes and baby foods. It is also used in the manufacture of various types of cakes and biscuits.
