

Business Opportunity in Food Processing & Agro Processing Industry

Description:

Business Opportunity in Food Processing & Agro Processing Industry

Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule, Working Capital Requirement, Plant Layout, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis

Food processing, any of a variety of operations by which raw foodstuffs are made suitable for consumption, cooking, or storage. A brief treatment of food processing follows. For fuller treatment of storage methods, see food preservation.

Food processing generally includes the basic preparation of foods, the alteration of a food product into another form (as in making preserves from fruit), and preservation and packaging techniques.

Importance of Food Processing

All the raw food materials are processed to improve their palatability, nutritional value and shelf-life.

- 1) Preservation for later consumption or sale to fetch better price
- 2) Removal of inedible portions
- 3) Destruction or removal of harmful substances
- 4) Conversion to forms desired by the consumer and
- 5) Subdivision into food ingredients.

India is the world's second largest producer of food next to China, and has the potential of being the biggest with the food and agricultural sector. The total food production in India is likely to double in the next ten years and there is an opportunity for large investments in food and food processing technologies, skills and equipment, especially in areas of Canning, Dairy and Food Processing, Packaging, Frozen Food/Refrigeration and Thermo-Processing.
