

Projects on Ceramic and Ceramic Products

Description:

Projects on Ceramic and Ceramic Products

(Industrial Ceramic Products, Floor and Roof Tiles, Tableware, Wall Tiles, Sanitary Ware, Porcelain, Stoneware, Pottery, Ceramic Wall & Floor Tiles, Vitrified Tiles, Decorative Tiles, Ceramic Glazed Wall Tiles, Non-Glazed (Unglazed) Ceramic Tiles, Ceramic Table Ware, Hotel Ware, Stone Ware /Bone China, Ceramic Foam Filters, Insulator (HT & LT))-Business Ideas and Opportunities for Entrepreneurs

Ceramics are classified as inorganic and nonmetallic materials that are essential to our daily lifestyle. Ceramic and materials engineers are the people who design the processes in which these products can be made, create new types of ceramic products, and find different uses for ceramic products in everyday life.

Ceramics are generally made by taking mixtures of clay, earthen elements, powders, and water and shaping them into desired forms. Once the ceramic has been shaped, it is fired in a high temperature oven known as a kiln. Often, ceramics are covered in decorative, waterproof, paint-like substances known as glazes.

Ceramic Glazed Wall Tiles

The growth of the tile industry has shown steep fluctuations. The great upsurge of developmental activities all over the country during the second and third plans created a great demand not only for roofing tiles but also for non-roofing tiles. The glazed tiles are generally used in finishing floors and walls of kitchens, bathrooms, hospitals etc. The wall tiles manufactured in India are generally glazed.
