

List of Opportunities in Agriculture Processing and Food Industry

Description:

Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule, Working Capital Requirement, Plant Layout, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis

Agriculture and related industries are essential to the vitality of the Mid-Willamette Valley. Within our region, food processing represents more than half of our manufacturing base. Whether it is growing, storing, or packaging food, building equipment to harvest or process crops, or managing the harvest, the Mid-Willamette Valley specializes in agriculture and food processing.

Food processing means the ways that are used to change raw ingredients into food so that they can be eaten by humans or animals. The food processing industry uses these processes. Food processing often takes clean, harvested or slaughtered and butchered components and uses these to produce attractive and marketable food products. Similar process are used to produce animal feed.
