

Cultivation, Processing & Uses of Jatropha (Bio-Diesel) With Ashwagandha, Stevia

Description:

Cultivation, Processing & Uses of Jatropha (Bio-Diesel) With Ashwagandha, Stevia, Brahmi & Jatamansi Herbs (Jatropha, Bio Diesel, Stevia, Ashwagandha, Brahmi, Jatamansi, Safed Musli, Sarpagandha, Shatavari, Senna, Business Opportunities, Shelf Life, Cultivation)

Jatropha is a genus of flowering plants in the spurge family, Euphorbiaceae. Another common name is nettles purge. It contains approximately 170 species of succulent plants, shrubs and trees (some are deciduous, like *Jatropha curcas*). Most of these are native to the Americas, with 66 species found in the Old World. Plants produce separate male and female flowers. As with many members of the family Euphorbiaceae, *Jatropha* contains compounds that are highly toxic. *Jatropha* species have traditionally been used in basket making, tanning and dye production. In the 2000s, one species, *Jatropha curcas*, generated interest as an oil crop for biodiesel production.
