

# Barley Malt Manufacturing. Malting Barley Production. Barley Malt for Brewing. Malt Production.

## Description:

Barley is an important annual cereal plant which belongs to the genus *Hordeum* of the grass family *Poaceae* and is majorly used in cooking and making malts. Malt refers to the grain which is softened by water and then it is germinated and dried. It is primarily made from barley. Malt is generally used for brewing beer and distilling of whiskey.

Barley is one of the important cereal grains. Its nutty flavor is loved by many people. It looks like wheat berries. However, it is lighter in appearance than wheat berries. It is a very ancient cultivated grain.

Malt refers to a grain which is sprouted and then dried by a method known as malting. It is generally made from barley; however, some other grains may also be used to prepare malt. It is usually used for brewing and distilling. The word malt has been derived from the Old English word *meltan* which means to melt.

Barley Malt is germinated cereal grains that have been dried in a process known as "malting". The grains are made to germinate by soaking in water, and are then halted from germinating further by drying with hot air.

## Few Indian Major Players are as under

- Haryana Suraj Maltings Ltd.
- Jagatjit Industries Ltd.
- John Distilleries Pvt. Ltd.
- Malt Company (India) Pvt. Ltd.
- Maltex Malsters Ltd.
- Millennium Beer Inds. Ltd.
- National Cereals Products Ltd.
- United Breweries Ltd.
