Bamboo as a Money-making Industry, Cultivation, Manufacturing and Utilization

Description:

Bamboo as a Money-making Industry, Cultivation, Manufacturing and Utilization (Bamboo Products, Bamboo Used for Paper Manufacture, Bamboo Pulp, Pulp and Paper Manufacture)

Bamboo is one of the most abundant and environmental-friendly and sustainable resources available in NE Region, which is not being used to its full potential. Bamboos, which are widespread in India, offer numerous opportunities in this regard, and there is much potential for expanding it. In view of commercial cultivation and economic utilisation of bamboo as a substitute for the fast depleting timber resources, a comprehensive programme of bamboo for sectional upgradation, enhancement of employment opportunities for artisans, promotion of value-addition through better and well-designed product development, optimum propagation and conservation and diversifying production and processing activities through organized community action has been taken up.

A bamboo farm once started could continue to exist for years on and give you some form of residual income. Bamboo starter plants, meanwhile, are sold from $25 to more than $100. To make sure the bamboo variety you've chosen is suited to your place's climate and soil, grow it on a small scale first. Planting bamboos should follow recommended specifications, particularly with regards to spacing.
