

How to Manufacture Detergents Powder, Active Ingredients for Detergents, Surfactant

Description:

How to Manufacture Detergents Powder, Active Ingredients for Detergents, Surfactant, Formulation of Detergents, Synthetic Detergent, Liquid Detergents, Laundry Detergent, Washing Powder

The Indian detergent industry is about three decades old. An interesting and unique feature of detergent industry in India is the existence of non power operated units which do not use any electrical power for the production of detergent powder. But the production technology of detergents have been changed involving high technique in process control, more skilled personnel and requiring large input. There are various forms of detergents; liquid detergents, paste detergents, solid detergents etc. Whether in liquid or in powdered forms, present detergent products are complex mixtures of several ingredients including performance additives such as bleaches, bleach activators etc. The scope and spectrum of methods and techniques applied in detergent analysis have changed significantly during the last decade.
