Description:

Compounding, Formulation and Production of Perfumes, Flavors and Fragrances(Flavours for Food, Fruit and Vegetable, Dairy, Bakery, Confectionery, Beverage, Meat, Wine, Soap Perfumery, Fancy Perfumes, Flower Perfumes, Sophisticated or Fantasy Perfumes, Fragrances Woody, Fragrances Floral and Fruity, Scents, Attars)

Flavors and Fragrances (F&F) are the essential ingredients that lend taste and smell, respectively, to food and personal or home care products. Without these, all the products that we use such as toffees, chips, toothpastes, soaps and shampoos, would be tasteless or odorless, boring, functional products. Flavors and fragrances are integral components of packaged foods and other consumer goods. Natural and synthetic flavor compositions create the cherry taste of cherry cola, the cinnamon aroma of pumpkin lattes and the cool mint flavor of toothpaste. Fragrance compositions add the fresh scent of pine to household cleaning products and exotic top notes to fine perfumes.

Perfume is a mixture of fragrant essential oils or aroma compounds, fixatives and solvents - used to give the human body, animals, food, objects, and living-spaces "a pleasant scent". Perfumes today are being made and used in different ways than in previous centuries. Perfumes are being manufactured more and more frequently with synthetic chemicals rather than natural oils. Less concentrated forms of perfume are also becoming increasingly popular. Combined, these factors decrease the cost of the scents, encouraging more widespread and frequent, often daily, use.

Fragrance and Flavours are a harmonious combination of natural and / or synthetic ingredients essential to lend taste and smell to food, pharmaceutical, personal care, fabric care and household care products, pleasing the senses in totality. Supposing fragrances and flavours are eliminated from use our, life will become dull and boring, not good enough to live. Thankfully, today fragrances and flavours are present throughout all levels of product right from an expensive one to the cheapest and play an invaluable role by its performance and signal attributes to take care of this emotional need, stimulating as well as calming or relaxing the user.
