

Formulations and Manufacturing Process of Phenyl, Naphthalene Ball, Mosquito Coil, Floor Cleaner, Glass Cleaner, Toilet Cleaner

Description:

Formulations and Manufacturing Process of Phenyl, Naphthalene Ball, Mosquito Coil, Floor Cleaner, Glass Cleaner, Toilet Cleaner, Utensil Cleaning Bar, Liquid Detergent, Detergent Powder, Detergent Soap, Liquid Soap, Handwash, Hand Sanitizer, Herbal Shampoo, Henna Based Hair Dye, Herbal Cream, Shaving Cream, Air Freshener, Shoe Polish, Tooth Paste (Surfactants, Disinfectants, Cleaners, Toiletries, Personal Care Products)

Surfactants are employed to reduce surface tension between two liquids or a liquid and a solid in the form of detergents, emulsifiers, dispersants, wetting agents or foaming agents. They find application in various end-use industries such as pharmaceuticals, petroleum cosmetics, and agrochemicals. Continuous growth in these sectors is expected to benefit industry participants. The global surfactants market is expected to reach USD 46.20 billion by 2022.

Demand for surfactants is primarily driven by increase in consumerism. This has resulted in higher demand for personal care products, which is one of key applications of the global surfactants market. Furthermore, rising demand for detergents and cleaners, led by rapid industrialization, improvement in quality of life, and increasing penetration of FMCG products among all classes of the society, is anticipated to boost the surfactants market.

Disinfectants market has grown in value terms to an estimated Rs. 6 bn a year, if multi-purpose detergents are excluded. In volume terms, the market is of the order of around 9600 tpa of which more than 60% is represented by phenyls. The branded MNC-oriented market is placed at over Rs. 2750 mn and is growing at about 20%.
