

Packaged Drinking Water with PET Bottles, Manufacturing Plant, Detailed Project Report, Profile

Description:

Packaged Drinking Water with PET Bottles, Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Plant & Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Project Financials, Cost and Revenue, Plant Economics, Production Schedule, Working Capital Requirement, plant layout, process flow sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis

Water is the necessity of our daily life, it's so important for us that we need clean, safe and sanitary water every day, and usually there's a more strict inspection standard in the more advanced country.

Potable spring waters containing, sulphur iron, magnesium and other mineral salts occurring in certain regions are claimed to be beneficial to human metabolism. The therapeutic value of such waters is questionable carbonated mineral waters also contain lithium salts.

There are two kinds of drinking water in the market. One is the natural water, which is called mineral water. The other is processed water coming from underground or from the pipe of water plant, which is called R.O. water, space water or pure water.
