The Indian feed industry is about 35 years old. The quality standards of Indian feeds are high and up to international levels. Raw materials for feed are adequately available in India. The feed industry has modern computerized plants and the latest equipment for analytical procedures and least-cost ration formulation, and it employs the latest manufacturing technology. The poultry industry is now growing in importance. Today, the Indian feed industry is worth approximately Rs 45 billion, that is about US\$1 billion.

Compared with the rest of the livestock sector, the poultry industry in India is more scientific, better organized and continuously progressing towards modernization. Breeding and feeding management has improved through education, training, competition, expansion and survival instincts. India is the world's fifth largest egg producer, with a total production of 40 billion eggs per year. The Indian poultry feed industry, dependent on the sound growth of poultry has a great untapped potential, with southern part of India holding the maximum share of poultry production and consumption.
