

Roller Flour Mill (Atta, Maida and Suji) Manufacturing Plant, Detailed Project Report, Profile, Business Plan

Description:

Roller Flour Mill (Atta, Maida and Suji) Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Plant & Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Project Financials, Cost and Revenue, Plant Economics, Production Schedule, Working Capital Requirement, plant layout, process flow sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis

Roller Flour mill serve the purpose of processing wheat to convert it into flour. The plant will have facility to produce, maida, suzi, atta and bran. These products will be sold as per the guidance issued for Food and Civil Supplies Department of the concerned state. Thus milling is an imperative physical function involved in converting wheat into its milled products that is separating the wheat grain into its constituents (bran, germ and endosperm).

Wheat grains are the seed of the wheat plant, which is able to grow in kinds of soil and under widely differing climatic conditions. The principle wheat of commerce belong to the botanical groups *Triticumvulgane*, *Triticum drum* and *triticumcompactum*. A grain of wheat is avoided in shape and it bears at one end a number of short fine Grains
