

# Investment Opportunities in Calcium Gluconate Manufacturing Industry. Production of Calcium Gluconate.

## Description:

Investment Opportunities in Calcium Gluconate Manufacturing Industry.

Production of Calcium Gluconate.

*The global market for calcium gluconate is likely to expand due to the escalation in the demand from different end-use industries especially from food and beverages and pharmaceutical sectors.*

Calcium gluconate, a mineral supplement, is produced by the neutralization of gluconic acid with calcium carbonate or lime. It is used for treating conditions resulting from calcium deficiencies. These conditions include: hypocalcemia related to hyperparathyroidism, hypocalcaemia tetany, and hypocalcaemia associated with rapid growth or pregnancy. Besides its use as an active ingredient in medicines, it is also widely used in numerous food products, where it serves the role of a nutrient supplement. Calcium gluconate is a source of calcium in different varieties of foods and beverage, including: soft drinks, milk, bottled waters, juices, soy products, dairy products, confectionery, and baked goods.

Calcium gluconate is extensively used in the treatment of Calcium deficiency, both for oral and parenteral administration. For Calcium therapy, Calcium gluconate is a well-established and most accepted drug in the medical field. Calcium in its ionic form has been shown to be an excellent therapeutic agent for the treatment of diseases caused and aggravated by deficiency of Calcium in the body. Calcium gluconate is being used as Tablets, intramuscular injections and as syrups. Calcium Gluconate forms a definite compound with Boric acid called Calcium Boro Gluconate which is more popular in the veterinary medical field. Calcium Boro Gluconate is used for the treatment of milk fever of milking cows.

## Uses:

- Calcium gluconate is used to prevent and to treat calcium deficiencies.
- Calcium gluconate may also be used for purposes not listed in this medication guide.
- Calcium gluconate is being used as Tablets, intramuscular injections and as syrups.
- It is used for treating conditions resulting from calcium deficiencies.

Calcium Gluconate is used in the treatment of:

- Heart Arrest
- Hyperkalemia
- Osteoporosis, Postmenopausal
- Tetany
