

How to Start a Mini Cement Plant. Cement Manufacturing Industry. Cement Business.

Description:

India is the second largest producer of cement in the world. No wonder, India's cement industry is a vital part of its economy, providing employment to more

than a million people, directly or indirectly. India has a lot of potential for development in the infrastructure and construction sector and the cement sector is expected to largely benefit from it. Some of the recent major initiatives such as development of 98 smart cities are expected to provide a major boost to the sector.

The most common use for cement is in the production of concrete. Concrete is a composite material consisting of aggregate (gravel and sand), cement, and water. As a construction material, concrete can be cast in almost any shape desired, and once hardened, can become a structural (load bearing) element.

Uses:

Cement is indispensable for building and construction work and cement industry is considered to be an important infrastructure core industry. It is one of the most advanced industries of India. In a developing country like India, the cement industry can play a significant role in the overall economic growth.

- Building (floors, beams, columns, roofing, piles, bricks, mortar, panels, plaster)
- Transport (roads, pathways, crossings, bridges, sleepers, viaducts, tunnels, stabilization, runways, parking)
- Water (pipes, culverts, kerbing, drains, canals, weirs, dams, tanks, pools)
- Civil (piers, docks, retaining walls, silos, warehousing, poles, pylons, fencing)
- Agriculture (buildings, processing, housing, feedlots, irrigation)

The housing sector is the biggest demand driver of cement, accounting for about 67 per cent of the total consumption in India. The other major consumers of cement include infrastructure at 13 per cent, commercial construction at 11 per cent and industrial construction at 9 per cent.
