

# Magnesium Sulphate (Epsom Salt) Manufacturing Business

## Description:

### **Magnesium Sulphate (Epsom Salt) Manufacturing Business. Profitable Project Opportunities in Chemical Industry**

Magnesium sulfate, commonly known as Epsom salt, is a mineral. It works by replacing magnesium in the body and increasing water in the intestines. Magnesium is a naturally occurring mineral that is important for many systems in the body especially the muscles and nerves. Magnesium sulfate also increases water in the intestines.

Magnesium sulfate is used as a laxative to relieve occasional constipation. Magnesium sulfate can be used orally as a laxative to relieve occasional constipation, and to treat low levels of magnesium. Magnesium sulfate as a medication is used to treat and prevent low blood magnesium and seizures in women with eclampsia. It is also used in the treatment of torsades de pointes, severe asthma exacerbations, constipation, and barium poisoning. It is given by injection into a vein or muscle as well as by mouth. As Epsom salts, it is also used for mineral baths.

Magnesium Sulphate is a chemical compound which is a mixture of magnesium, oxygen, and sulphur. Magnesium sulphate often faced as sulphate mineral & epsomite which are commonly known as Epsom Salt. Applications of magnesium sulphate have spreaded across many industries such as healthcare, agriculture, pharmaceuticals, food additives and other industries as well. In medical, it is used both i.e. internally as well as externally.
