

Market Survey cum Detailed Techno Economic Feasibility Report on Dairy Farming & Dairy Products (Pasteurised Milk & Curd)

Description:

The importance of milk in human diet especially for children and expectant and nursing matters is vital. To meet the demand of the increasing population milk production in India has to be increased. It is neither possible nor desirable to increase the cattle and buffalo population to achieve this target. This can only be achieved by stepping up milk production of our bovine population by cross breeding of cows and use of improved cows and cow.

In choosing dairying as a life work, plan to develop the best herd possible. New programs, such as artificial breeding, have helped to remove some of the most difficult problems in the development and improvement of dairy herds. Not only will you want to development pride of ownership of a good herd of cows but also you will want to produce high quality milk as efficiently as possible.

Milk is a naturally nutrient rich and affordable product, with a high nutrient to energy ratio. Milk and dairy products are an important food group in many national dietary guidelines and may play a role in dietary quality.
