

Packaged Drinking Water with PET Bottles - Market Survey cum Detailed Techno Economic Feasibility Project Report

Description:

Water is the necessity of our daily life, it's so important for us that we need clean, safe and sanitary water every day, and usually there's a more strict inspection standard in the more advanced country.

Potable spring waters containing sulphur iron, magnesium and other mineral salts occurring in certain regions are claimed to be beneficial to human metabolism. The therapeutic value of such waters is questionable carbonated mineral waters also contain lithium salts.

There are two kinds of drinking water in the market. One is the natural water, which is called mineral water. The other is processed water coming from underground or from the pipe of water plant, which is called R.O. water, space water or pure water.

Uses and Application

Mineral water is bottled under very hygienic conditions under strict quality control before being marketed. Its major use is in five star Hotels and Hospitals where good quality pure water is required for potable purposes. It is marketed at places and regions where hygienic drinking water is not freely available.
