

IGCSE School (Nursery to Senior Secondary) - Detailed Project Report, Profile, Business Plan, Trends, Market Research, Survey, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Working Capital Requirement, plant layout, Cost

Description:

The International General Certificate of Secondary Education is an international qualification for school students. IGCSE is developed by university of Cambridge International Examinations (CIE) in 1988 and is currently offered as a qualification by CIE and London Examination (Edexcel International). A Cambridge education is beyond purely learning facts. Instead, we support schools to develop students who are confident, responsible, reflective, innovative and engaged. The increasing number of students taking our qualifications in India shows that schools are aware of the value of this approach and the importance of an international education in today's global economy. University of Cambridge International Examinations (CIE) is the world's largest provider of international qualifications. Around 1.5 million students from 150 countries enter Cambridge examinations every year. Cambridge IGCSE is the world's most popular international curriculum for 14-16 year olds, leading to globally recognised and valued Cambridge IGCSE qualifications. Compulsory State education begins at 5 years but permissive legislation allows local Education Authorities to build also for children of 3.5 years, either in separate building or in nursery groups attached to primary schools. Schools worldwide have helped develop Cambridge IGCSE, which provides excellent preparation for the Cambridge Advanced stage including Cambridge International AS and A Levels and Cambridge Pre-U, as well as other progression routes. It incorporates the best in international education for learners at this level. It develops in line with changing needs, and is regularly updated and extended.
