

Mosquito Repellent Liquid Manufacturing Industry

Description:

Mosquito Repellent Liquid Manufacturing Industry. Mosquito Repellent Industry. Production of Mosquito Repellent Liquidator

Liquid repellents are now widely used to repel mosquitoes. The Liquidator mosquito repellent has a graphite rod in the middle and the bottle is filled with the repellent. There is a heater coil in the liquidator. The repellent chemical when comes in to contact with the heated rod turns into fume which disables the sensors of the mosquitoes. The fumes produced by the repellent blocks the chemo sensors of mosquitoes so that they cannot identify human beings.

Liquid mosquito repellents contain chemicals such as, Prallethrin, Allethrin etc. Of these the most commonly used one is Prallethrin. Prallethrin is a pyrethroid chemical used as an insecticide. It is a Yellow to amber viscous liquid. d -trans-Prallethrin is a potent contact insecticide which produces a rapid knock-down, with same chemical and physical properties as Prallethrin.d-trans-Allethrin is also a powerful repellent used in mosquito coil and liquid.

Wide variety of chemical and natural ingredient based mosquito repellents are being used to keep the mosquitoes away and prevent mosquito-borne diseases such as malaria, dengue, chikungunya, yellow fever, Zika virus, and others.
