

Helmet Manufacturing Industry

Description:

Helmet Manufacturing Industry. Production of Bike Helmets. Profitable Safety Helmet Industry

Bike Helmets are useful as safety gear to prevent or minimize injuries to the head and brain in an uncontrolled environment during riding a bike. According to the US Consumer Product Safety Commission, about 900 people, including more than 200 children are killed annually in bicycle related incidents, and about 60 percent of these deaths involve a head injury. Bike Helmets can help absorb impacts and save their life.

A motorcycle helmet is a type of helmet (protective headgear) used by motorcycle riders. The primary goal of a motorcycle helmet is safety - to protect the rider's head during impact, thus preventing or reducing head injury and saving the rider's life. Some helmets provide additional conveniences, such as ventilation, face shields, ear protection, intercom etc.

Market Outlook

Growing head injuries due to road accidents still remain the major factor driving the global market. However, manufacturers are concentrating on not only improving the quality of helmets but also making them stylish. This is expected to benefit the global market for motorcycle helmets in the near future.
