Tomato Paste Packaging Industry

Description:

Tomato Paste Packaging Industry. Profitable Business Opportunities in Packaged Tomato Paste. Packaging of Tomato Paste

Tomato is one of the most important food crops in India. It grows in almost every state of the country. Some of the major producing states are Bihar, Karnataka, Uttar Pradesh, Orissa, Andhra Pradesh, Maharashtra, Madhya Pradesh and West Bengal. Tomato is a rich source of vitamins A, C, potassium, minerals, and fibers. Tomatoes are used in the preparation of soup, salad, pickles, ketchup, puree, sauces and also consumed as a vegetable in many other ways.

Tomato paste is a concentrated long shelf life product used as an important food ingredient worldwide. Tomato paste is prepared by removing skin, pulp of tomatoes to create tomato juice which is then concentrated generally by evaporation method in order to obtain a thick paste.

Increasing demand for organic tomato paste is expected to drive the global market revenues of tomatoes in the coming years. The global tomato paste market is segmented into, product type, packaging type, area of application, sales channels and by region. By packaging-type the global tomato paste market is segmented into, cans, carton packaging, bottles and pouches. Cans are the preferred packaging solution for tomato paste due to its convenient packing and to an increase in its shelf life.

Tomato paste market is expected to witness significant market growth during the forecast period owing to its widespread application in food industry.
