

Copra Oil Manufacturing Industry. Coconut Oil Production from Copra

Description:

Copra Oil Manufacturing Industry. Coconut Oil Production from Copra. Coconut Oil Processing Business

Copra is the dried flesh of coconuts. Copra, dried sections of the meat of the coconut, the kernel of the fruit of the coconut palm (*Cocos nucifera*). Copra is valued for the coconut oil extracted from it and for the resulting residue, coconut-oil cake, which is used mostly for livestock feed.

The following are just some of the common uses of copra:

- Coconut oil is commonly used in baking and cooking
- Coconut oil is a favorite ingredient in beauty products for its moisture and texture
- The coconut cake produced by making copra is commonly used as livestock food
- Coconut scent is widely used in products such as candles and soaps
- Coconut oil is an edible fat comparable to butter or margarine

Coconut oil, or copra oil, is an edible oil extracted from the kernel or meat of mature coconuts harvested from the coconut palm.
