

# Tea Blending and Packaging Industry

## Description:

### Tea Blending and Packaging Industry. Blending and Packaging of Tea

Tea is an important beverage in India. Simply, tea as a refreshing energy booster. Additionally, the tea comes with several health benefits too. Basically, the antioxidants help to eliminate toxins and free radicals from the blood.

Indian tea is among the finest in the world owing to strong geographical indications, heavy investments in tea processing units, continuous innovation, augmented product mix and strategic market expansion. The main tea-growing regions are in Northeast India (including Assam) and in north Bengal (Darjeeling district and the Dooars region). Tea is also grown on a large scale in the Nilgiris in south India. India is one of the world's largest consumers of tea, with about three-fourths of the country's total produce consumed locally.

According to the tea production process, there are two different types of tea. These are CTC and Orthodox. However, according to the taste and flavor, there are several types of tea available in the Indian market. These are black tea, green tea, white tea, fermented tea, oolong tea, aroma tea, etc. In addition, there is the different variety of tea according to the origin. These are Darjeeling tea, Assam tea, Dooars & Terai tea, Kangra tea, Nilgiri tea, Annamalai Tea, Wayanad Tea, Karnataka tea and Munnar tea.
