

# Liquid Biofertilizer Manufacturing Industry

## Description:

### **Liquid Biofertilizer Manufacturing Industry. Production of Liquid Bio-Fertiliser. Profitable Biofertilizers Production Business Ideas**

Liquid Biofertilizer a substance which helps to grow plants rapidly and produce fruits, flower and vegetable more quantity in proper time, otherwise fertilizer be a compound which fulfill the needed minerals or Clements require for the growth of plants and vegetables to grow and fruits in proper time.

Liquid Biofertilizer is natural fertilizers which are microbial inoculants of bacteria algae fungi alone or in combination and they augment the availability of nutrients to the plants.

The liquid Bio fertilizers are suspensions having agriculturally useful microorganisms, which fix atmospheric nitrogen and solubilise insoluble phosphates and make it available for the plants. The use of this Bio fertilizer is environment friendly and gives uniform results for most of the agricultural crops and directly reduces the use of chemical fertilizer by 15 to 40%. The shelf life of the liquid bio fertiliser is higher (in the range of one to two years) compared to that of solid matrix base biofertilizer. There is a growing demand for organic foods in the global market. The use of these liquid bio-fertilisers would help the Indian farmers to produce organic crops so as to compete in the global market.
