

How to Start a Cold Storage Business Project, Excellent opportunity for investing, business planning, investment perspectives, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Feasibility Study, Investment Opportu

Description:

Coldstorage industry is a very important and essential industry. The temperature is maintained low with the help of precision instruments. Cold storage is used to preserve fruits and vegetables. Once they are kept in the cold storage, they do not get spoiled even after many months. This item, when needed, can be taken from the cold storage and can be made available to consumers very easily. Coldstorage is a vital link between the production and consumption of perishable products. Apart from the conservation of perishables, the cold storage also helps in increasing the marketing period of these commodities and ensures availability to the consumer over a long period. It is also clear that the coldstorage facility available in various states of the country reveals wide variation. A new entrepreneur can well venture into this field by installing a project of cold storage to save the fruits and vegetables from wastage.

ColdStorage is essential for extending the shelf life, period of marketing, avoiding glut, post-harvest losses reducing transport bottlenecks during peak period of production and maintenance of quality of produce. It is, therefore, necessary that coldstorages are to be constructed in major producing as well as consuming centres. The development of coldstorages in the country has an important role in reducing the wastages of the perishable commodities and providing remunerative prices to the growers and to make available farm products to the consumers at competitive and affordable prices.
