Aromatic Plants Cultivation, Processing and Uses

Code: NI120	Format: paperback
Indian Price: ₹975	US Price: \$100
Pages: 504	ISBN: 8178330571
Publisher: Asia Pacific Business Press Inc.	

Description

Aromatic plants have essential or aromatic oils naturally occurring in them. They help heal mental ailments and other diseases. India is endowed with a rich wealth of medicinal plants. Aromatic (Aroma Producing) plants are those plants which produce a certain type of aroma. Their aroma is due to the presence of some kind of essential oil with chemical constituents that contain at least one benzene ring in their chemical configuration. The chemical nature of these aromatic substances may be due to a variety of complex chemical compounds. These plants have made a good contribution to the development of ancient Indian material medica. In recent years, there has been a tremendous growth of interest in plant based drugs, pharmaceuticals, perfumery products, cosmetics and aroma compounds used in food flavors and fragrances and natural colors in the world. There is a definite trend to adopt plant based products due to the cumulative derogatory effects resulting from the use of antibiotic and synthetics and except for a few cultivated crops, the availability of plant based material is mainly from the natural sources like forests and wastelands. There is a need to introduce these crops into the cropping system of the country, which, besides meeting the demands of the industry, will also help to maintain the standards on quality, potency and chemical composition. During the past decade, demand for aromatic plants and its products has attracted the worldwide interest, India being the treasure house of biodiversity, accounts for thousands of species which are used in herbal drugs. 90% of herbal industry requirement of raw material is taken out from the forests.

Some fundamentals of this book are botanical description of the plant, genetic improvement, harvesting, intercropping, transplantation, irrigation and weeding, vanilla cultivation in India, commercial cultivation of vanilla, distillation of herbage for essential oil, effect of growth hormones, jasmine crop improvement & agrotechniques,

efforts for new variety of *Jasminum auriculatum*, essential oils of agarwood, *Cinnamomum tamala* leaves, *Eucalyptus citriodora* and *Caultheria praevalens*, past and future of sandal wood oil industry, by product development from turmeric and ginger rhizomes, isolation of essential oils and its flavour profile etc.

This book contains most of the important aspects related to aromatic plants. It is being published for those who are interested in growing, processing and trading of aromatic plants.

Tags

Aromatic plants cultivation India, Cultivation of aromatic plants, Aromatic plants farming, Cultivation of aromatic crops, List of aromatic plants in India, Names of aromatic plants, Aromatic plants, Processing of Aromatic Plants, Extraction of essential oils from aromatic plants, Extraction of essential oils by steam distillation, Essential oil extraction methods, How Are Essential Oils Extracted?, Essential oils, Extraction of Volatile Oil from Aromatic Plants, Steam distillation procedure, How to extract plant oils by distillation?, How to extract oil from plants?, List of aromatic plants and their uses, List of Important Aromatic Plants, Multiple Uses of Aromatic Plants, Commercial cultivation of aromatic plants

Content

1. Cultivation of *Tagetes Minuta*

Botanical description of the plant

Genetic improvement

Agrotechnology

Soil and climate

Propagation

Weed control

Fertilizers and manures

Irrigation

Harvesting

Intercropping

Crop rotations

Diseases

Distillation

Chemistry

Distillation unit design availability

2. Cultivation of *Eucalyptus Citriodora*

Description of the plant

Cultivation

Soil and Climate

Preparation of Land

Propagation

Nursery

Transplanting

Weeding

Manures and Fertilizers

Harvesting

Pests and Diseases

Distillation

Yield

Chemical Constituents

Uses

3. Cultivation of *Rosmarinus Officinalis*

Introduction

Description of the plant

Cultivation

Soil and Climate

Propagation

Transplanting, interculture and fertilizer application

Irrigation

Harvesting

Pests and diseases and their control

Distillation

Oil content and yield

Chemical constituents

4. Cultivation of *Coriander Sativum*

Description of the Plant

Cultivation

Soil and Climate

Propagation

Irrigation

Harvesting

Pests and Diseases

Distillation

Yield
Chemical Constituents
Uses
Economics of Cultivation

5. Cultivation of Lavender Species

Botany
Soil and Climate
Cultivation
Propagation
Propagation By Seeds
Transplantation
Fertilizer Application
Weeding
Regeneration
Harvesting
Distillation
Oil Content and Oil Yield
Chemical Constituents
Uses
Economics of Cultivation

6. Cultivation of Matricaria Chamomilla

Description of the Plant
Genetics
Cultivation
Soil and climate
Propagation/nursery
Transplantation, irrigation and weeding
Cropping sequence
Pests and diseases
Manures and fertilizers
Harvesting
Collection of seeds
Yield
Drying and storage
Distillation
Yield and characteristics of the oil
Uses
Specification of the drug

Economics of cultivation

7. Vanilla World s second most expensive spice

Vanilla Flower

Vanilla Beans

Vanilla cultivation in India

Commercial Cultivation of Vanilla

Vanilla Extract and Flavourings

Commercial uses of Vanilla

Market for Vanilla

Exports grades and standards

8. Cultivation of Artemisia Annua

Description of the plant

Soil and climate

Propagation

Weed control

Fertilizers and manures

Irrigation

Harvesting

Chemistry and uses

Distillation

Economics of cultivation

9. Cultivation of Mentha Arvensis

Plant descriptors

Available cultivars of menthol mint

Choice of place for cultivation

Land preparation

Preparation of planting material

Production of suckers

Production of seedlings

Planting of suckers in the field

Fertilizer application

Irrigation and drainage

Interculture and weed control

Crop rotation

Intercropping

Harvesting

Yield

Storage of herbage

Pests and diseases

Insect pests

Diseases

Distillation of herbage for essential oil

Directly fired distillation tank

Design availability

Use of mint oil and its derivatives

Economics of cultivation

10. Cultivation of French Basil (*Ocimum Bacilicum* L.)

1. European Type

2. Reunion Type

3. Methyl Cinnamate Type

4. Eugenol Type

Botany

Soil and Climate

Field preparation

Propagation

(a) Raising of Nursery

(b) Planting

Irrigation

Fertiliser Application

Interculture

Harvesting and Yield

Agronomical Studies

Physiological Studies

Heavy metal tolerance

Effect of growth hormones

Mineral contents

Seed mucilage studies

Effect of photoperiodism

Biosynthesis of Eugenol

Tissue Culture Studies

Genetical Studies

Chemical Composition

Uses

Cosmetic

Food

Folk medicine
Ayurvedic Properties

11. Jasmine Crop improvement & agrotechniques

New varieties of jasmine

Arka Surabhi

Arka Arpan

Efforts for new variety of *Jasminum auriculatum*
for extraction of essential oil

Constituent of Jasmine essential oil

Agronomy

Plant protection

Water saving, labour saving low cost device for
propagation of plant cuttings

Details of the device

Required materials for the device

Detailed method

Economic viability of growing jasmine for essential oil

12. *Semecarpus Anacardium* L.f.

Introduction

Chemistry of Nuts

13. Himalayan Cedarwood Oil

Essential oil of Deodar (*Cedrus Deodara*)

Essential oil of *Juniperus Recurva* var. *Squamata* and
other oils of *Juniperus* spp.

Agarwood and Oil Agarwood

Uses

14. Essential oils of Agarwood, *Cinnamomum Tamala* Leaves,

Eucalyptus Citriodora and *Caultheria PrAGRANTISSIMA*

Distillation

Gaultheria

Eucalyptus

15. Past and Future of Sandal wood Oil Industry

Plantation and Harvesting

Disease Control

Distillation of Oil

Packing
Problems and their Solutions
Adulteration
Future Prospects
Kewda Industry in Orissa

16. Production Technology and Package of Practices in Chilli

Cultivated Species of Capsicum
Constraints in Chilli Production
Technologies Developed
Disease and Disease Management
Marketing in Chilli
Value Addition in Chilli

17. By Product Development from Turmeric and Ginger Rhizomes

Introduction
By Product Development in Turmeric
Curcumin
Turmeric Essential Oils
Isolation of Essential Oils and its Flavour Profile
By product Development in Ginger
Survey of Raw Material
Essential oils
Oleoresin
Gingerol in Ginger Oleoresin
Starch
Protein
Crude Fibre
Commercial Extraction of Ginger Oleoresin
Process Description for Oleoresins
Oleoresin Quality
Flavour Quality of Ginger Oleoresins
Essential Oils of Ginger
Profile of Flavour in Ginger Cultivars

18. Synthesis of 4 Acetyl 3, 7, 7 Trimethylbicyclo [4, 1, 0]

Hept 3 ene and Related Compounds by Friedel Crafts
Reaction on (+) ~ Camphor 3 ene
Results and Discussions

36. Oxidation of Y Terpinene and
Isolongifolene with t Butyl chromate

Oxidation of terpinene (I)

Oxidation of isolongifolene (VI)

37. Scope for Commercial Cultivation of Aromatic
Plants in Upper Pulney Hills

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
