The Complete Book on Rubber Chemicals

Code: NI220	Format: paperback
Indian Price: ₹1575	US Price: \$150
Pages: 672	ISBN: 9788178331218
Publisher: Asia Pacific Business Press Inc.	

Description

Rubber Chemicals are essential additives for the manufacture and quality improvement of rubber products such as automobile tires, rubber hoses, and quake absorbing rubbers. For rubber processing and compounding certain chemicals are required which are known as rubber chemicals. The primary requirement of adding different compounding ingredients to develop the different grades of rubber compounds to meet various service needs at an economic price and to provide certain desired physical properties to a considerable extent. Some of the examples of rubber chemicals are waxes, amines, thiazoles, silicone resins, alcohol, sulphuric acids, dithiocarbamates, phosphoric acid etc. They are mostly applicable for white and coloured rubber. They are generally used in rubber tubing, conveyor belt cover balloons, hot water bottles injection bottle caps, footwear related items etc. Indian rubber chemical industry has high growth potential triggered by increased consumption and steady growth in tyre and rubber industries. The speciality chemicals industry in India is projected to grow at 15-17 % per year to reach \$ 80-100 billion by 2020. The demand for rubber chemicals is on the rise. All major manufacturers have raised the prices of their products substantially. Massive investment is expected to flow into the rubber chemicals manufacturing sector in India in the coming years from both domestic and global players.

The book covers different types, physical and chemical properties, applications of different rubber chemicals like waxes, synthetic organic chemicals, amines, silicones resins, releasing agents, stabilizers, solvents and many more. Some of the fundamentals of the book are synthetic hydrocarbon waxes, uses of amines in polymers, synthetic organic chemicals, analysis of specific anti-degradants, stabilization of halogenated polymers, anaerobic fermentations, the manufacture of sulfuric acid, analysis of dithiocarbamate esters, sodium hyposulfite (hydrosulfite),

citric acid, gluconic acid, acetic acid, itaconic acid, kojic acid etc.

Rubber chemicals have a huge potential growth in future and considering the importance of the chemical we have brought out this book which will be an invaluable resource to rubber chemical manufacturers, technocrats, researchers, consultants and new entrepreneurs.

Content

1. Waxes

Petroleum Waxes

Paraffin Waxes

Microcrystalline Waxes

Uses

Test Methods

Safety

Natural Waxes

Vegetable Waxes

Animal Waxes

Mineral Waxes

Synthetic Waxes

Synthetic Hydrocarbon Waxes

Miscellaneous Synthetic Waxes

2. Amines

Physical Properties

Chemical Properties

Manufacture

Uses of Amines in Polymers

Catalysts

Solvents

Emulsifiers

Compounding and Finishing

3. Thiazoles

Antifungal Activity

4. Synthetic Organic Chemicals

Chemicals Derived from Methane

Synthesis Gas

Chlorinated Methanes

Acetylene

Carbon Disulfide

Chemicals Derived from Ethylene

Polyethylene

Ethylene Oxide

Chlorinated Hydrocarbons

Ethanol

Ethylbenzene

Acetaldehyde, Acetic Acid, Vinyl Acetate

Ethylene Oligomers

Chemicals Derived from Propylene

Isopropyl Alcohol

Polypropylene

Acrylonitrile

Propylene Oxide

Dodecene, Nonene, Cumene

Oxochemicals

Glycerine

Butanes, Butylene, LPG and Higher Aliphatic Hydrocarbons

LPG and n-Butane

Isobutane

n-Butylenes

Isobutylene

n-Pentane and Cyclopentane

Isopentane

n-Paraffins, Monoolefins, Primary and Secondary Higher Alcohols

Aromatic Chemicals

Benzene Products

Toluene Products

Chemicals from Xylene

Naphthalene Chemicals

Other Polymethylbenzenes

5. Silicone Resins

Manufacture

Surfactants and Specialties

Emulsions

Greases and Compounds

Surfactants

Primers and Adhesion Promoters

6. Silicone Fluids

Silicone Elastomers

Azine and Related Dyes

Methods of Manufacture
Commercial Grade and Specifications
Methods of Analysis
Identification
Assay Methods
Application Methods
Determination of Impurities
7. Antioxidants and Antiozonants
Testing and Evaluation Methods
Antioxidants
Antiozonants
General Methods of Analysis
Separation and Identification
Gas Chromatography
Paper Chromatography
Adsorption Chromatography
Thin-Layer Chromatography
Color Tests for Antidegradants
Spectrophotometric Identification of Antidegradants
Quantitative Determination
Analysis of Specific Antidegradants
N-Phenyl-2-Naphthylamine
Separation and Identification
Assay Methods
Determination in Mixtures
Acetone-diphenylamine Reaction Products
Separation and Identification
Assay Methods
Determination in Mixtures
1,2-Dihydro-2,2,4-trimethyl-6-ethoxyquinoline
N-1,3-Dimethylbutyl-N-phenyl-p-phenylenediamine
Separation and Identification
Assay Methods
Determination in Mixtures
N,N-Di-3-(5-methylheptyl)-p-phenylenediamine
Separation and Identification
Assay Methods
Determination in Mixtures
2,6-Di-tert-butyl-p-cresol
Separation and Identification

Assay Methods
Determination in Mixtures
Polygard
Separation and Identification
Assay Methods
Determination in Mixtures
Release Agents
Properties Required
Methods of Application
Industrial Fields using Abherents
Classes of Release Agents
8. Stabilizers
Methods
Stabilization of Polyolefin Resins
Stabilization of Halogenated Polymers
Commercial Stabilizer Materials and Mixtures
Epoxides
Miscellaneous Special-Purpose Stabilizers
9. Alcohol
Fermentation
Anaerobic Fermentations
10. Nitrogen Compounds
Ammonia Synthesis
Uses of Ammonia
Storage and Transport
Nitric Acid
Production
Uses of Nitric Acid
Ammonium Nitrate
Hexamethylenetetramine
Hydrazine
Manufacture
Stabilization
Urea
Uses of Urea
Hydrogen Cyanide
Acrylonitrile
Melamine
Amines
Aniline

Isocyanates

Other Nitrogen Compounds

11. Sulfuric Acid

Uses of Sulfuric Acid

Kinds of Acid

The Manufacture of Sulfuric Acid

Development of the Sulfuric Acid Industry in the United States

The Chamber Process for Making Sulfuric Acid

The Contact Process

Sulfur

Uses

Sources

12. Dithiocarbamates

Dithiocarbamic Acid Salts

Analysis of Dithiocarbamate Salts

Dithiocarbamate Esters

Analysis of Dithiocarbamate Esters

Thiuram Disulfides

Analysis of Thiuram Disulfides

13. Other Chemicals

Sodium Chloride

Soda Ash, The Commercial Sodium Carbonate

Solvay Process

Soda Ash from Other Sources

Soda Ash-related Products

Sodium Sulfate

Salt Cake

Glauber Salt

Hydrochloric Acid

Sodium Silicate

Bromine and Bromides

Sodium Sulfides

Sodium Thiosulfate

Sodium Bisulfate, Anhydrous

Sodium Hyposulfite (Hydrosulfite)

Caustic Soda and Chlorine

Electrolysis of Brine

Concentration of the Caustic Liquor

The Mercury Cell

Hydrogen Disposal

Other Processes for the Production of Chlorine

Liquid Chlorine

Bleaches

14. Organic Acids

Citric Acid

Gluconic Acid

Acetic Acid

Itaconic Acid

Kojic Acid

Other Ketogenic Fermentations

Sorbose

2-Ketogluconic Acid

Nonionic Surfactants

Ampholytic Surfactants

15. Phosphoric Acid

Production of Elemental Phosphorus and Phosphoric Acid

Industrial Phosphates

Sodium Pyrophosphate

Wet-Process Phosphoric Acid

Potassium Salts

Soluble Potassium Salts

Potassium Nitrate

Types of Volatile Solvents

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of

the inputs in their research.
