Hand Book on Neem & Allied Products

Code: NI49	Format: paperback
Indian Price: ₹975	US Price: \$100
Pages: 478	ISBN: 8178330415
Publisher: Asia Pacific Business Press Inc.	

Description

Nature has blessed man with a number of wonders. Of all, plants are found to be its best boon. Among them, neem is distinguished by their astonishing versatility. Neem is such a fascinating tree that no other tree probably has provided wide range of benefits to mankind. Neem tree and its products have been reputed since long for some physiological activity and have been used quite extensively as a household remedy, since time immemorial, for the treatment of some of the common ailments. The Neem tree, which is also known as Margosa or Indian lilac is grown extensively in Asian and African countries. The neem is very useful tree due to its medicinal and insecticidal properties. Neem oil is the major product of neem seed industry. The chief limitation of the oil is its odour due to the presence of odouriferous substances and other non saponifiable components. Amongst the non edible oilseeds the potential availability of neem is by far the largest because of its very extensive growth throughout the country and fairly good yield of oils from the seeds. Neem seed cake is the major by product of neem seed oil. Various parts of the neem tree have been used as traditional Ayurvedic medicine in India. Almost every product of this invaluable tree has been largely employed for medical purposes. Neem works as blood purifier. Consuming raw neem leaves or neem leaf powder helps in eradicating toxins from the blood. This is one of the greatest benefits of neem tree. Azadirachtin in the neem products have been found to act as repellents, antifeedants, affect food consumption and utilization and interfere with the growth regulation and ovarian development in insects. Neem manufacturing products are in high demand and several manufacturing companies are readily in business trying to satisfy their natural product consuming and environment sensitive market. Along with a good natural resource management program, Neem can be an income generator and a sustainable medicinal alternative in developing countries.

Some of the fundamentals of the book are technology for production of insecticides of plant origin at rural level, neem seed cake as a source of pests control chemicals, neem oil as possible biorational insecticide, chemistry of neem (*azadirachta indica*), a sustainable source of natural pesticides, machineries for neem processing, engineering properties of neem nut, neem and transfer of technology, processing of neem fruit and seed, processing of neem oil and its utilization, uses of neem is indigenous system of medicine, cold processing of neem seed, products from neem, development of a neem formulation and its evaluation for control of crop pests, evaluation of nematicidal potential in neem, etc.

The book covers cultivation of neem and processing of its products. It will be of immense value to all concerned with manufacturing of neem products; consultants Institutions or those who want to diversify in to production of neem based products.

Content

1. Technology for Production of Insecticides of Plant Origin at Rural Level

Materials and Methods

Results and Discussion

Use of leaf Bits

Use of Leaf Extracts

Impregnation of Bags with Kernel Extract

Surface Treatment of Bins

Vapour Effect of Extract/Oil

Technology for Rural Level

2. Neem seed cake as a Source of Pests Control Chemicals

Methods and Materials

Results and Discussion

3. Neem oil as Possible Biorational Insecticide

Materials and Methods

Results and Discussion

4. Improving the Productivity of Neem Trees

Distribution

Agroclimatic Adaptability

Establishment and Growth

Production and uses

Non-wood Products
Environmental Safety
Problems of Neem Production and Utilization
Propagation of Neem
Variation in Germplasm
Silvicultural Practices to Improve Productivity
Establishment of neem
Fruiting
Seed Collection and Processing
Promotion of Neem Production
Packaging of Silvicultural Practices
Popularising the Use of Neem Products
Marketing of the Produce

5. Vegetative Propagation of *Azadirachta indica* A. Juss.

Materials and Methods

Mist Propagation

Micropropagation

Results

Mist Propagation

Micropropagation

Discussion

6. An Assay of Genetic Variability through Phenological Studies on Neem (*Azadirachta indica* A. Juss.)

Plantation

Materials and Methods

Observations and Discussions

7. Chemistry of Neem (*Azadirachta indica*), a Sustainable Source of Natural Pesticides

8. Photo-oxidation of Tetranortriterpenoids

Materials and Methods

Results and Discussion

9. New Tetra and Pentanortriterpenoids from *Azadirachta indica* A. Juss.

Results and Discussion

1 a-Destigloyl-1a-benzoylazadirachtin (II)

11b-Hydroxyazadirachtinin (III)

4a-benzoyl nimbandiol [V]

Ochinin Acetate [VII] and Ochinolide B [VIII]

10. Machineries for Neem Processing

Materials and Methods

Results and Discussion

Summary and conclusion

Suggestions for Further Work

11. Engineering Properties of Neem Nut

Introduction

Review of Literature

Materials and Methods

Apparatus and Procedure

Dimensions and Hardness

Nut weight and Kernel-shell Mass Ratio

Angle of Repose

Porosity

Bulk Density and Particle Density

Friction

Preparation of Samples

Results and Discussion

Dimensions and Hardness

Nut Weight and Kernel-Shell Mass Ratio

Angle of Repose and Porosity

Bulk Density and Particle Density

Coefficient of Friction

Conclusions

12. Neem and Transfer of Technology

Use of Neem Pest Control

Transfer of Neem Technology to the Farmers in India

As Pest Control Agent

On Tobacco

On-Farm Trial

Demonstration Trials

Lab-to Land Programme

NSKS in Integrated Pest Management

On Cotton

On Paddy
On Pulses
On Castor
Use of Neem Cake as Nematicide
Use of Neem Oil as a Suckericide on Tobacco
Neem Cake as Organic Manure

13. Processing of Neem Fruit and Seed

Availability of neem
Collection and processing of fruit and seed
Depulpers, driers and decorticators
Driers
Decorticators
Discussion of Results
Maturity, storage and pressing of seed
Maturation of Oil in Stored Fruits
Depulping of The Neem Fruit
Cost of Operation
Crushing of Neem Seed Kernels in Wardha Ghani
Fall of Oil yield with Storage
Processing of Neem Seed Kernel and production of
Neem Oil
Crushing
Storage Experiments on Neem Seed
Conclusions
Characteristics of neem oil and its quality
Specific Gravity and Refractive Index
Acid Value
Alcohol Soluble Material in the oil
Other Characteristics
Unsaponifiable Matter

14. Processing of Neem Oil and its Utilization

Quantitative estimation of the different constituents
of neem oil by alcohol extraction
Total Dilute Alcohol Extractive of Neem Oil
Large Scale Alcohol Extraction of Neem Oil
Refining of alcohol-extracted oil
Alkali Treatment
Refining Loss on Alkali Treatment

Bleaching of Neutral oil (Alcohol-Extracted and Alkali-Refined)
Hydrogenation Experiments (Laboratory Scale) with Neutral and Bleached Neem Oil
Refining Loss in Factory Pilot Unit
Tentative Cost of the Process of Alcohol Extraction of Neem oil based on the Pilot Plant work
High Pressure Splitting
Deodorization and hydrogenation of purified and refined oil
Alkali Refining
Hydrogenation of Refined Neem Oil
Soap
Stearin and olein
Pyronimin, a denaturant
Pyronimis-A Denaturant for Alcohol
Production of the Denaturants
Requirement of the Denaturants
Results of tests with the denatured spirit
Tentative Specifications for Pyronimin-250
Tentative Specifications for 'Total Bitters' Fraction
Tentative Specifications for the Spirit Denatured with Pyronimin and 'Total Bitters' on Neem
Pharmaceutical Preparations with the Bitter Constituents
Preparations from Nimbidin-T and their uses
Costing
Other Experiments at Refining
Factors influencing industrial utilization of neem oil and its by-products

15. Medicinal Uses

Uses of neem is indigenous system of medicine
Medicinal Uses of Neem in Recent Times

16. Cold Processing of Neem Seed

Experiment
Seed Cleaning
Mechanical Destoner
Mechanical Sieve-shaker Separator Fitted with Air Cyclone System

Sedimentation (Gravitational) Technique

Decoration of Seed

Crushing

Discussion

17. Products from Neem

Semi-greaseless cold cream

Skin toning lotions

Cream Cholesterin Type

Herbal Soap (Neem based)

Neem based tooth paste

Radhas Ayurvedic Soap

Arya Neem Plus Turmeric Herbal Soap

Krishna Tulsi Herbal Soap

Medimix Skin Care Capsule

Shodha

Alargin forte

Beauty plus

Dantshodhak

Hemoclin syrup

Epidermoil Oil

Neem capsule

Charmi capsules

Hemocleen

18. Repellent Action of Neem Oil on Insects of

Public Health Importance

Methodology

Results

Discussion

Conclusion

19. Effect of Neem Oil: Structural and Functional

Change in the Epididymis of Rats

Materials and Methods

Neem Oil

Animals

Sperm Motility and Sperm Count

Biochemical Estimations

Histological Investigation

Statistical Analysis

Results

Discussion

20. Rat Toxicity Studies with Neem Oil

Materials and Methods

Neem Oil

Animals

Biochemical Studies

Statistical Analysis

Results

Tissue Biochemical Parameters

Blood and Serum Parameters

Histological Studies

Discussion

21. Evaluation of Neem Extract Sprays on Maize

Introduction

Materials and Methods

Results

Discussion

22. Antifeedant and Insecticidal Activity of Some

Neem Fractions

Materials and Methods

Results and Discussion

23. *Azadirachta indica* A. Juss. Stem Bark as an

Anti-Leprosy Source

Materials and Methods

Observation and Results

Pharmacognosy

Macromorphology of Bark

Micromorphology of Bark

Powder Study

Phytochemistry

Biochemical Estimation (Percentage on Dry Weight Basis)

Geochemical Estimation

Active Principle Determination (from Ethanolic Extract)

Chemical Identity Comparison

Discussion

24. Evaluation of Neem Derivatives and *Lantana camara* L. against Cardamom Pests

Materials and Methods

Field Evaluation of Neem Derivatives against the Cardamom Thrips, *Sciothrips cardamomi* (Ramk.)

Field Evaluation of Neem Oil against Cardamom Whitefly, *Dialeurodes cardamomi* David & Subr.

Laboratory Evaluation of the Crude Extract of Stem of *Lantana camara* against the Cardamom Hairy

Caterpillar, *Eupterots undata*

Laboratory Evaluation of the Crude Extract of the Stem of *Lantana camara* L. against Cardamom Shoot Borer, *Conogethes punctiferalis* (Guen.)

Results and Discussion

Effect of Neem Derivatives on Cardamom Thrips

Effect of Neem Oil on Cardamom Whitefly

Effect of 1 per cent Suspension of the Extract of *Lantana camara* on *E. undata*

Effect of 1 per cent Suspension of the Extract of *L. camara* on *C. punctiferalis*

25. Development of a Neem Formulation and Its Evaluation for Control of Crop Pests

Materials and Methods

Product Development

Laboratory Studies

Field Studies

Results and Discussion

Laboratory Studies

Field Studies

26. Effect of Neem Cake, Neem Oil, Repelin and Carbofuran on Control of Soybean Nematodes

Materials and Methods

Results and Discussion

27. Thyroid Hormones and Intermediary Metabolism in Fish: Influence of Neem Kernel Extract

Materials and Methods

Results

Effect of T3 or T4 in Fish Injected with NKE

Effect of T3 and T4 in Fish Immersed in NKE-treated Water

Discussion

28. Clinical Studies with Praneem Polyherbal Cream in
Chlamydial Cervicitis

Materials and Methods

Polyherbal Cream

Patients

Diagnostic Methods for *C. trachomatis*

Dose Schedule

Follow-up

Results

Discussion

29. Identification and Characterization of the Immunomodulator
Fraction from Neem Seed Extract Responsible for
Long-term Anti-fertility Activity

Materials and Methods

Results

Conclusion

30. Identification of Effective and Inexpensive Neem
(*Azadirachta indica* A. Juss.) Seed Kernel Extract

Materials and Methods

Seed Collection and Processing

Extraction

Aqueous Extract (AE)

Ethanol Extract (EtoHE)

Hexane Extract (HE)

Chloroform Extract of DNKP (CHEDK)

Ethanol Soluble (Eto HSHE) and Insoluble (EtoHIHE)

Part of Hexane Extract

Extract Yield

Formulation of the Extracts

Rearing Culture of *H. armigera*

Biological Testing

Oviposition

Ovicidal
Feeding deterrent
Growth and Development
Results
Effect on Oviposition
Effect on Egg Hatching
Effect on Feeding
Effect on Growth and Development
Pupal Mortality and Adult Emergence
Discussion
Effect of oviposition
Effect on Egg Hatching
Effect on Feeding
Effect on Growth and Development of Larvae
Conclusion

31. Field Evaluation of Some Botanical Insecticides Alone and in Combination with Other Insecticides for Management of Bollworm Complex on Cotton

Materials and Methods
Results and Discussion
RD-9 Repelin
Neemark
Ind-Ne
Conclusions

32. Evaluation of Enriched Neem (*Azadirachta indica* A. Juss.) Seed Extracts against Mango Hoppers, *Idioscopus nitidulus* Walker and *Amritodus atkinsoni* Leth.

Materials and Methods
Laboratory Trial
Field trials
Results
Laboratory trials
Field Trials
Evaluation of neem derivatives for control of mango hopper, *I. nitidulus*
Discussion

33. Potential of Neem in Insect Pest Management in Rice

Introduction

Materials and Methods

Results and Discussion

Effect of Neem Oil on Rice Leaf Folder and Stem Borer

Efficacy of Neem-based Insecticides Against Stem Borer

Effect of Neem-based Insecticides on the Growth

and Development of White-backed Planthopper

Combination of Neem-based Products with Synthetic

Insecticides

34. Effect of Neem Kernel Extract and Neem Oil on Nutritive
and Reproductive Physiology of *Heliothis armigera*
Hub.

Materials and Methods

Mass Culture and Biological Studies

Preparation of Extracts

Treatment

Quantitative Food Utilization

Efficiency of Digestion

Reproduction Studies

Biochemical Assays

Enzyme Assays

RESULTS

Effects on Reproductive Parameters

Effects on Quantitative Food Utilization

Effects on Efficiency of Digestion and Digestive Enzymes

Effect on Protein, Glycogen, Lipid and Enzyme Profiles
in Subsequent Female Moths

Effect on Protein, Glycogen, Lipid and Enzyme Profiles
in Subsequent Male Moths

Discussion

Conclusion

35. Bioefficacy of Some Neem Formulations against
Spodoptera litura F.

Materials and Methods

Laboratory Tests

Nursery Experiment

Studies on Effect of Repelin B versus Repelin A and
NSKS against *S. litura* on Castor in Laboratory

Studies on Effect of Repelin B Alone and in Combination with Endosulfan against *S. litura* (1992)

Bio-efficacy of Repelin B and Other New Neem Formulations against *S. litura* on Tobacco (1992)

Results and Discussion

Laboratory Tests

Nursery Experiments

Effect of Repelin B versus Repelin A and NSKS against *S. litura* on Castor in Laboratory

Choice Situations

No-choice Situation

Effect of Repelin B alone and in Combination with Endosulfan against Tobacco Caterpillar, *S. litura* on Tobacco

Bio-efficacy of Repelin B and Other New Neem Formulations against *S. litura* (1992)

Laboratory tests

No-choice Situation

Nursery Tests

36. Effects of Extracts from Neem on Aphids (Homoptera: Aphididae) and Their Natural Enemies

Materials and Methods

Azadirachtin Content

Aphid Control

Aphid Natural Enemies

Antifeedant Activity

Aphid Reproduction

Results and Discussion

Aphid Control

Aphid Natural Enemies

Antifeedant Activity

Aphid Growth and Development

Aphid Reproduction

Conclusion

37. Azadirachtin Content and Bioactivity of Some Neem Ecotypes of India

Materials

Methods

Estimation of Azadirachtin Content

Kernels

Oil

Extraction and Enrichment

Physicochemical Properties of Oil

Azadirachtin Estimation by PHLC

Insect Growth Regulation (IGR)

Fungicidal Activity

Results and Discussion

Azadirachtin Content of Neem Ecotypes

Kernels

Oil

Enrichment

Insect Growth Regulation

Fungicidal Property

38. The Effects of Various Neem Formulations on Mortality Rate and Morphogenetic Defects Upon *Schistocerca gregaria* (Forsk.) Larvae

Materials and Methods

Laboratory Insects

Field Insects

Neem Products

Controls

Application of the Larvae

Application of the Vegetation

Results

Mortality Rates Following Application of Neem Products to Larvae

Mortality Rates after Treatment of the Plants with Enriched Neem Oil; The Repellent Effect of Neem Morphogenetic Defects

Discussion

39. Efficacy of Cakes in the Management of Root Knot Nematode (*M. arenaria*) in Groundnut

Materials and Methods

Results and Discussion

40. Efficacy Profile of a Commercial Neem Insecticide

Factors Influencing the Commercial Success of
Azadirachtin
Consistency and Quality of Extracts
Product Positioning
Supply and Availability
Increase in Environmental Awareness
The Acceptance of Insect-Growth-Regulators
Cost of Raw Material
Important Commercial Characteristics of Azadirachtin
Representative Efficacy Data with Azatin/Turplex/Align
in the United States

41. Evaluation of Nematicidal Potential in Neem
Allelochemicals
Materials and Methods
Results
Discussion

Directory Section

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
