Modern Technology of Paints, Varnishes & Lacquers (2nd Edition)

Code: NI66	Format: paperback
Indian Price: ₹0	US Price: \$0
Pages: 682	ISBN: 8178330881
Publisher: Asia Pacific Business Press Inc.	

Description

Surface coating industry is one of the most popular industries. Paints, varnishes and lacquers industry is gaining ground at a rapid pace in modern time accompanied with closed advance in surface coating technology. They are formulated for specific purposes: outside house paints and exterior varnishes are intended to give good service when exposed to weathering; interior wall paints are formulated to give excellent coverage and good wash ability; and lacquers are formulated for rapid drying. Varnish is one of the important parts of surface coating industry. Varnish is a transparent, hard, protective finish or film primarily used in wood finishing but also for other materials. They are used to change the surface gloss, making the surface more matte or higher gloss, or to provide the various areas of a painting with a more unified finish. Varnishes are also applied over wood stains as a final step to achieve a film for gloss and protection. Some products are marketed as a combined stain and varnish. Paint is any liquid, liquefiable, or mastic composition which after application to a substrate in a thin layer is converted to an opaque solid film. It is most commonly used to protect, colour or provide texture to objects. The paint industry volume in India has been growing at 15% per annum for quite some years now. As far as the future growth prospects are concerned, the industry is expected to grow at 12 to 13% annually over the next five years. The technology is required to produce different type of new paints and varnishes based on different type of uses. The paint and coatings industry plays an integral role in sustainability; coatings protect the objects we depend on every day, preserve our possessions, so they last longer and provide for a sustainable future. They are indispensable products that extend the useful life of everyday objects by acting as a protective barrier. These newer products have enabled paint manufacturers to improve the performance properties of their paints and coatings and so satisfy the more stringent requirements of our modern industrial society. The future

for industrial paints, varnishes and lacquers is bright. In the next few years its value will go up gradually in line with the global trend.

The major contents of the book are application of paints, fundamentals of paint, varnishes and lacquers, manufacturing of different type of paints, paint formulation, pigment dispersion, emulsion paints, and so on.

The book deals with fundamentals of paints, Varnishes and lacquers, pigments, Oils used in paints and varnishes, solvents, dryers, plasticizers, additives for surface coating, various types of paint manufacturing etc. The book is very useful for new entrepreneurs, existing units, technocrats, technical institutions and for those who wants to diversify in the field of paints manufacturing.

Content

1. Application of Paints

Paint System Specification

Preparation of Paints

Establishment of the paint Manufacture Unit

Pigment

White Pigments

Black Pigments

Red Pigment

Green Pigment

Blue Pigment

Synthetic Ultramarine Blue

Yellow Pigment

Drying Oils & Driers

Drying Oils

Linsed Oil

Castro Oil & Dehydrated Castro Oil

Dehydrated Castro Oil (DCO)

Tung Oil

Soyabean Oil

Cashew Nut Shell Liquid (CNSL)

Other Less Important Oils

Refining of Drying Oils

Driers

2. Fundamentals of Paint, Varnishes & Lacquers

Paint

Varnishes

Lacquers
Solvents
White Pigments
Red Pigments
Yellow and Brown Earth Colours
Orange and Yellow Pigments
Green Pigments
Blue Pigments
Black Pigments
Extenders
Oils Used In Paints
Resins Used In Paints, Varnishes And Lacquers
Solvents Used In Paints, Varnishes and Lacquers
Additives Used In Paints, Varnishes and Lacquers
3. Oils Used In Paints and Varnishes
Drying Oils
Conjugated Oils
Semi Drying Oils
Non-Drying Oils
Derivatives of Drying Oils
Refining of Oils
4. Solvents
Hydrocarbons
Ketones
Esters
Glycol Ethers
Alcohols
Terpenes
5. Plasticizers
General Properties of Plasticizers
6. Additives in surface Coatings
7. Formulary with Processes of Distempers,
Whitewash, Putties & Emulsion
White Distemper
Sky Blue Distemper
Yellow Distemper
White Wash
Putties
Non-Freezing Putty
Modified Putty

Emulsion Paints

8. Formulations

Enamels

Luminous Paints

Paint for Structural Steel

Asbestos Paints

Mica Lustre Paint

Aluminum Priming for Wood

Water Emulsion Paints for Exterior Use

Varnishes

Lacques

9. Lacquers

Cellulose Products

Ethyl Cellulose

Lacquer Manufacture

Mertis of Cellulose Lacquers

Aeroplane Lacquer

Book Lacquer

Varnishes

Different kinds of Varnishes

Oil Varnish

Turpentine Varnish

Spirit Varnish

Water Varnish

Oil Varnishes

Preparation of Oil Varnishes

Gum Running

Addition of Drying Oils

Thinning

Maturing

Different kinds of Oil Varnishes

Exterior Varnish

Interior Decorators Varnish

Rubbing Varnish

Polishing Varnish

Flat Varnish

Gold Size

Black Varnish

Formulase of Oil Varnishes

Spirit Varnish or Lacquer

Resins

Solvents

Plasticizers

Alcohol Varnish

Turpentine Varnishes

Formulas for Preparing Spirit Varnishes

French Varnish

Varnish Prepared from Synthetic Resins

Spar Varnish

Process

10. Paint Manufacturing Different Types of Paints and

Various Formulations

Premixing

Grinding Operation

Tinting Operation

Oil Based Paints

Modern Gloss Finishes

Heat Resisting Paints

Flame Retardant Paints

Plastic Paints

Floor Paints

Flat Paints

Aluminium Paint

Wrinkle Finishes

Hammer Finishes

Marine Coatings

Introduction

Ship Paints

Hull Paints

Top Sides Finish

Boot Topping Paints

Antifouling Paints

Anti-Corrosive Paints

Road Marking Paints

Chemical Resistant Coatings

Synthetic Enamel Paints

Bituminous Coatings

High Solids Finishes

Curing Agent :

Graphite and Graphite Paints

11. Primers

Primer for Metals

Types of Primers

Blast Primers

Metallic Zinc Primers

Red Oxide/Zinc Chrome Primers

Lead Based Primer

Wash Primer

Primers for wood

Leadless Primers :

Aluminium Primer

Emulsion Primers

Wall Primers & Sealers

12. Major Defects Which Occurs in Paints, Varnishes and Lacquers 125-129

Alligatoring

Bleeding

Blistering

Blooming

Blushing

Brush Drag

Brush Marking

Chalking

Checking

Cissing

Cracking

Efflorescence

Fading

Floating

Flooding

Gas Checking

Loss of Gloss

Lifting

Leaching

Orange Peel

Pinholing

Sagging

13. Powder Coatings

Thermoplastic Coatings

PVC Coatings

Thermosetting Coating Powders

Epoxy Powder Coatings

Formulation of Powder Coatings

Fluidized bed Coating

Electrosatic Fludized Bed Coatings

Electrostatic Spray Coating

14. Drying Oils : Their Origin, Manufacture and Properties

General History

Types of Drying Oils

Manufacturing and Refining Methods

Solvent Extraction

The composition of Drying Oils

Future Developments

15. Pigments-General Classification and Description

Definition of Paint

Purposes of Pigments in Paint

Hiding Power of Paint

Extender Pigments

Pigment Manufacturing

16. White Hiding Pigment

17. Organic Toners and Mineral Pigments

Color Blending

Metallic Pigments

Blacks

Earth Colors

Inorganic Blues

Organic Blues

Browns

Greens

Organic Greens

Marron Pigment

Oranges

Reds

Violets

Yellows

18. Rosin and Rosin Derivatives

19. Alkyd Resin Technology

20. Miscellaneous Resins in Protective Coatings

Petroleum Resins

TTerpene Resins

Coumarone-Indene Resins

Maleic Resins

Chlorinated Resins

21. Solvent-type Resins

Brush Lacquers

Acknowledgment

Ethyl Cellulose

Parlon

Vinyl Resins

Polystyrene and Styrene Resins

Acrylate and Methacrylate Resins

Allyl Resins

Pliolite

Silicone Resins

22. Hydrocarbon Thinners

Measures of Solvency

Composition

Viscosity Reduction

Tests for Purity

Volatility

Conclusion

23. Formulation of the "Volatiles" in Nitrocellulose Lacquers

Solvents and Diluents

Latent Solvents

Thinners

24. The application of Metallic Soaps as Driers, Fungicides,

Suspending Agents and Flatting Agents

Theories on the Mechanism of the Action of Driers

Efficiency of Driers

Effect of Vehicle

Metallic Soaps as Fungicides

Metallic Soaps and Suspending Agents

Metallic Soaps as Flatting Agents

25. The Testing of Raw Materials

Reasons for Testing Raw Materials

Completeness of Testing

Solvents

Drying Oils

Conclusion

26. Resin and Varnish Manufacture

Tung Oil

Oiticica Oil

Perilla and Linseed Oils

Other Oils

Oil-Resin Combinations

27. Industrial Finishes

Classification

Manufacturing Methods for Industrial Finishes

28. Trade Sales Paints

Shingle Stain

Spar Varnish

Exterior Enamels

Gaulking Compounds

Asphalt and Coal-tar Paint

Wall Primer and Sealers

Wall finish Coats

Enamel Undercoaters

Enamel Finish Coats

Varnishes

Floor Paints and Enamels

Miscellaneous

29. Water and Emulsion Paints

30. Aminoplast Resins

Chemistry and Composition

Commercial Practice and Composition

Functional Use and Mechanism

Formulation

31. Phenolic Resins

32. Epoxy Resins

Physical and Chemical Characteristics of Epoxy Resins

Two-Package or Amine-Cured Epoxy Coatings

Epoxy Esters

High-Performance Baking Finishes

Other Types of Epoxy Coatings

33. Acrylic Resins

Types of Acrylic Resins

Properties of Acrylic Resins

Polymerization of Acrylic Monomers

Applications of Acrylic Polymers

Starting Formulations

34. Vinyl Resins for Coatings

Polymerization Methods
Vinyl Chloride Solution Resins
Vinyl Dispersion Resins
Polyvinyl Acetal Resins
Polyvinyl Acetate
35. Urethane Coatings
Raw Materials
Coating Vehicle Intermediates
Chemistry
Classification of Coatings
Drying Oil Modified Urethanes
Prepolymers
Blocked Isocyanates
Two-Package Urethane Coatings Astm-4
Polyester/Polyisocyanate Two-Component Systems, Astm-5
Comparison of Urethane Coatings with Competitive Coatings
Improved Color Stability
Lower-Cost Urethanes
Conclusion
36. Oxygenated Solvents
Ester Solvents
Ketone Solvents
Glycol Ether Solvents
Alcohols
Other Solvents
Solvent Properties
Formulation of Solvent Systems
37. White Pigments
Opacity
The reactive white Pigments
The nonreactive white Pigments
38. Coloured Pigments
Chrome Yellows
Zinc Yellows
Strontium Yellow
Nickel Titanate Yellow
Nickel Azo Yellow
Cadmium Yellow
Yellow Iron Oxide
Hansa Yellows

Benzidine Yellows
Vat Yellows
Chrome Orange
Molybdate Orange
Cadmium Orange
"Mercadium" Orange
Benzidine Orange
Dinitraniline Orange
VatDay Oranges
Chrome Greens
Chromium oxide
Hydrated Chromium Oxide
Copper Phthalocyanine Green
Organic Green Toners
Iron Blues
Copper Phthalocyanine blues
Ultramarine Blue
Organic Blue Toners
Indanthrone Blue
Carbazole Dioxazine Violet
Organic Violet Toner
Mineral Violet
Quinacridone Violet
Lithols
Para Reds
Toluidine Reds
Lithol Rubine
Chlorinated Para Red
Quinacridone Reds and Maroons
Red Iron Oxide
Cadmium Red and Maroons
"Mercadium" Reds and Maroons
Red Lead
Thioindigo Reds and Maroons
Arylide Maroons
Siennas, Ochres and Umbers
Carbon Blacks, Lampblacks and Bone Blacks
Tinting Properties of Colored Pigments
39. Paint Formulation
Art

Science
Raw Materials
Manufacture
Cost
Performance
Principles
Pigments Volume Concentration
Critical Pigment Volume Concentration
Pigment
Vehicle
Solvents and Driers
Formulation Example
Computer
40. Pigment Dispersion
Definition
Method.
Equipment
Mill Base Formulation
Setting Up a Laboratory Formula
Equipment setups and Limitations
Tank Configuration
Premixers
Conclusions
41. Emulsion Paints
Ingredients of An Emulsion Paint
Emulsion Formation
Stability of Emulsions
42. Maintenance Paints
Paint Types and Selection
Coating Types
Description By Generic Types
Principles of Effective Maintenance Painting
Substrate Materials
Effect of Exposure
Paint System and Application
43. Aluminum Pigments and Paints
History
Methods of Manufacture
Properties and Characteristics of The Pigment
Aluminium Pigments Products

Testing Aluminum Pigments

Aluminum Paints

Application Methods

44. Aerosol Coatings

Definition

Description

Components

Paint Formulation

45. Paint and Varnish Removers

Paint Removal

Solvent Paint and Varnish Removers

Nochlorinated Solvent Paint Removers

46. Machinery & Equipments for Paint & Varnish Industry

Triple Roil Mill

Sand Grinder

Colloid Mill

Amalgamator or Horizontal Mixer

Attrition Mill

Roll Mill

Cone Blender Mixer

Drum Type Mixer

Planetary Paste Mixer

Portable Stirrer

High Speed Dissolver

Steam Jacket Pans and Kettles

Emulsifiers

Filter Press

Unroll Mill

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases,

detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.

NIIR PROJECT CONSULTANCY SERVICES
