## **Handbook on Printing Technology (Offset, Flexo, Gravure, Screen, Digital, 3D Printing with Book Binding and CTP) 5th Edition**

<b>Code:</b> NI73	<b>Format:</b> paperback
<b>Indian Price:</b> ₹1875	<b>US Price:</b> \$150
<b>Pages:</b> 616	<b>ISBN:</b> 9788194099505
<b>Publisher:</b> Asia Pacific Business Press Inc.	

### **Description**

Printing is a process for reproducing text and image, typically with ink on paper using a printing press. It is often carried out as a large-scale industrial process, and is an essential part of publishing and transaction printing. Modern technology is radically changing the way publications are printed, inventoried and distributed. Printing technology market is growing, due to technological proliferation along with increasing applications of commercial printing across end users.

In India, the market for printing technology is at its nascent stage; however offers huge growth opportunities in the coming years. The major factors boosting the growth of offset printing press market are the growth of packaging industry across the globe, increasing demand in graphic applications, the wide range of application in various industry, and industrialization. 3D printing market is estimated to garner \$8.6 billion in coming years. The global digital printing packaging market is expected to exceed more than US\$ 40.02 billion by 2026 at a CAGR of 13.9%. Computer-to-plate systems are increasingly being combined with all digital prepress and printing processes.

This book is dedicated to the Printing Industry. In this book, the details of printing methods and applications are given. The book throws light on the materials required for the same and the various processes involved. This popular book has been organized to provide readers with a firmer grasp of how printing technologies are revolutionizing the industry.

The major content of the book are principles of contact (impression), principles of

noncontact printing, coated grades and commercial printing, tests for gravure printing, tests for letterpress printing, tests for offset printing, screen printing, application of screen printing, offset lithography, planography, materials, tools and equipments, sheetfed offset machines, web offset machines, colour and its reproduction, quality control in printing, flexography, rotogravure, creative frees printer, shaftless spearheads expansion, digital printing, 3D printing, 3D printing machinery, book binding, computer-to-plate (ctp) and photographs of machinery with suppliers contact details.

A total guide to manufacturing and entrepreneurial success in one of today's most printing industry. This book is one-stop guide to one of the fastest growing sectors of the printing industry, where opportunities abound for manufacturers, retailers, and entrepreneurs. This is the only complete handbook on the commercial production of printing products. It serves up a feast of how-to information, from concept to purchasing equipment.

## **Content**

### Contents

#### 1. INTRODUCTION

##### History

##### Four Major Printing Processes

##### Relief Printing Process

##### The Process

##### Letter Press Printing Process

##### Plano Graphic

##### Offset

##### The Advantages of Offset Printing Include

##### Screen Printing Process

##### Other Printing Methods

##### Digital Printing

##### Paper for Printing

#### 2. MODERN PRINTING TECHNIQUES

##### Printing (Press Operation)

##### Colour Printing

##### How a Printing Press Works

##### The Latest Technologies in Printing Industry

##### Digital Inkjet Printing

3D Printing Rise  
Software Innovations  
Hybrid Print Technologies  
Efficient Technology  
Special Printing Technologies  
Basic Principles of Hybrid Printing System  
Hybrid Printing System Concepts of Combining Conventional Printing Technologies  
Hybrid Printing Systems Combining NIP Technologies  
Hybrid Printing Systems Combining Conventional and NIP Technologies  
Hybrid Printing Systems Combining Computer to Press/Direct Imaging with NIP Technologies  
Hybrid Printing Systems Combining Conventional Printing Technologies with Computer to Press Technologies  
Basic Principles of Waterless Offset Printing  
Advantages/Merits of Waterless Printing  
Qualitative Advantages  
Production Advantages  
Ecological Advantages  
Basic Principle of Digital Printing  
Flow Chart of Digital Composition of a Printed Page  
Direct Imaging (with master)  
Computer to Print (without master)  
Scope and Job suitability of Digital Printing Process  
Digital Printing has a very bright future because  
Digital Printing is Suitable for  
Basic Principle of Direct Imaging  
Once Imagebale Master (Plate Imaging)  
Re-imagebale Master (Surface Imaging)  
3. PRINCIPLES OF CONTACT (IMPRESSION)  
PRINTING PROCESSES  
Introduction  
Printing Methods  
The Printing System  
Preparatory Sections  
Halftone Photography  
Platemaking  
Printing  
Binding and Finishing  
Inks for Letterpress and Lithography  
Speciality Printing

## 4. PRINCIPLES OF NONCONTACT PRINTING

Introduction

Impactless printing system for variable printing

Summary

## 5. COATED GRADES AND COMMERCIAL PRINTING

Coated and Commercial Papers

Coating Methods

Coating Materials

Adhesives

Coated Paper Properties and Use

## 6. TESTS FOR GRAVURE PRINTING

Introduction

Print Smoothness

Gravure Print Testing

## 7. TESTS FOR OFFSET PRINTING

Introduction

Runnability

Surface Strength

Water Resistance

Mechanical Properties

Web Runnability

## 8. SCREEN PRINTING

Select Correct Screen Printing Fabric

An Antistatic Stencil Mesh

Screen Printing Frames

Stretching Equipment

Correct Stretching

Adhesives

The Manufacture of Diapositives

Stencils

The Diapositive

## 9. APPLICATION OF SCREEN PRINTING

Screen Printing Accessories

Stencils

Chemicals Used and Formulations

Common Faults in Screen Printing

Printing Unit

Automatic Screen Printing Machine

Screen Printing on Different Surfaces

Inks for Screen Printing

## 10. OFFSET LITHOGRAPHY

Printing Processes

Origin and History of Lithography

Job Planning

Evolution of Offset Printing

Offset Machine Construction

Pre-Make Ready and Make Ready

Setting the Machine for Operation

Small Offset

Running Problems

Colour

Rollers

## 11. PLANOGRAPHY

Origin of Planography

Principle of Planographic Printing

Direct Printing Process

Offset Printing Process

Working Process

## 12. MATERIALS, TOOLS AND EQUIPMENTS

Lithographic varnish

Acids

Turpentine

French Chalk

Resin

Asphaltum

Paraffin

Driers

Sponge

Dampening Cloth

Vaseline

Tools and Equipments

Scraper

Ink Knife

Wrench

Proofing Devices

Mechanical Features

Automatic Proof Presses

Qualities of a Good Proof

## 13. SHEETFED OFFSET PRINTING

Names of the machines

Mechanical Features

Lubrication

Sheet feeding mechanism

Sheet board

Functions of blowers

Functions of the blower foot

Sheet lifting and forwarding

Sheet Controls

Sheet Register

Sheet Insertion and Transfer

Inking System

Distribution System

Multiroll System

Wash-up device

Adjustment of Rollers

Different Dampening Systems

Cleaning of Dampeners

Construction of the machine

Working on the cleaning machine

Plate Cylinder

Blanket Cylinder

Impression Cylinder

Adjustment of Cylinders

Advantages of Both Principles

Delivery Mechanism

Anti-setoff Spray

Miscellaneous Operations

14. WEB OFFSET PRINTING

Driving Mechanism

Printing Units

Main Parts of Printing Unit

Inking System

Delivery Unit

Folding Unit

Ancillary Operations by Delivery Unit

15. COLOUR AND ITS REPRODUCTION

Terminology Related to Colour

Mixing and Matching of Colors

Sequence of Colours in Printing

16. QUALITY CONTROL IN PRINTING

Before Printing

During Printing

After Printing

## 17. FLEXOGRAPHY 407

Flexography

Flexographic Platemaking

Photochemical Change

Rotary Principle

Rubber Plates

Substrates

Paper and Board

## 18. ROTOGRAVURE

## 19. DIGITAL PRINTING

Introduction

Digital Printing

Important Things We Should Know About Digital Printing

Types of Digital Printing

1. Inkjet Printer

2. Laser Printer

Important Features of Laser Printer

Advantages of Digital Printing

Benefits of Digital Printing Design & Printing

1. Cheaper Printing

2. High quality

Difference between Screen Printing and Digital Printing

Screen Printing

Digital Printing

Comparison between Digital Printing and Press Printing

Digital Printing

Press Printing

## 20. 3D PRINTING

Introduction

History of 3D Printing

How Does 3D Printing Work?

Technology

3D Printing Applications

1. Medical and Dental

2. Aerospace

Complex Designs

Weight Reduction

Improved Strength and Durability

Major Savings

3. Automotive

4. Jewellery

5. Art/Design/Sculpture

6. Architecture

7. Fashion

8. Food

Benefits of 3D Printing

Advantages of 3D Printing in Manufacturing

1. 3-D Printers are Becoming More Affordable

2. Quicker Turnaround Times for Prototyping

3. Quicker Product Launches

4. Competitive Advantage

5. Reduction in Manufacturing Errors

6. Complex Geometries

7. Mass Customization

8. Less Tooling

9. Fewer Costs

10. Environmentally Friendly

Benefits of 3D Printing in Healthcare

What Materials do 3D Printers Use?

1. Plastics

(a) Nylon (Polyamide)

Features

(b) PLA Filament

Features

(c) ABS Filament

Features

(d) PVA Filament

2. Powders

3. Resins

Features

4. Other Materials

How do the Different 3D Printing Technologies Work?

1. Fused Deposition Modeling (FDM)

How does FDM Work?

Materials for FDM

ABS (Acrylonitrile Butadiene Styrene)

ABSi (Acrylonitrile Butadiene Styrene – Biocompatible)

- ABS-M30 (Acrylonitrile Butadiene Styrene)
- ABS-M30i (Acrylonitrile Butadiene Styrene – Biocompatible)
- PC (Polycarbonate)
- ABS-ESD7 (Acrylonitrile Butadiene Styrene – Static-Dissipative)
- PC-ABS (Polycarbonate ABS)
- PC-ISO (Polycarbonate ISO)
- Ultem 9085
- 2. Stereolithography and Digital Light Processing (SLA & DLP)
- 3. Selective Laser Sintering (SLS)
- 4. Material Jetting (PolyJet and MultiJet Modeling)
- 5. Binder Jetting
- 6. Metal Printing (Selective Laser Melting and Electron Beam Melting)
  - Electron Beam Melting
- Characteristics
- Selective Laser Melting Applications
- 7. PolyJet Photopolymer
- Benefits of Polyjet
- Realistic Finish
- Greater Choices
- Multiple Materials and Colors
- Polyjet Materials
  - 1. Digital Materials
  - 2. Digital ABS
  - 3. High Temperature
  - Wide Range of Applications
  - 4. Transparent
  - 3D Print Clear and Tinted Prototypes
  - 3D Printing With Transparent Material
  - 3D Print Translucent Shades and Patterns
  - Wide Range of Applications
  - 5. Rigid Opaque
  - 6. Polypropylene-like
  - 3D Print Tough, Flexible Models
  - 7. Bio-compatible
  - 3D Print Medical Devices
  - 3D Printing With Bio-compatible Material
  - 8. Rubber-like
  - 3D Print Flexible, Soft-touch Models
  - 3D Printing With Rubber-like Material
  - 8. Syringe Extrusion

## 9. Other Methods

3D Printing is a Game Changer

### 21. 3D PRINTING MACHINERY

Airwolf AW3D HD

SLA 3D Printing Machine

3D Printing Machine

Makerbot Replicator

Dual Head 3D Printer

Prototyping Machine

Flashforge Finder

3D Systems Cube

3D Jet

Formlabs

## 22. BOOK BINDING

Terms and Techniques

Cutting & Folding

Folded Sheet or Section Binding

Book Binding Methods

Perfect Binding

Hardcover/Case Binding

Saddle Staple (Fold, Staple, Trim) Binding

Wiro Binding

Automatic Book Binding Machine

Programmable Logic Controllers (PLC)

Perfect Book Binding Machine

Disc Perfect Binding Machine

Perfect Binding Line

Thread Book Sewing Machine Semi Automatic

## 23. COMPUTER-TO-PLATE (CTP)

CTP Technologies

Regulatory Requirements

Plate Development

Visible Laser Plates Using Silver Halide

Thermal Laser Plates Using Ablation

Plate Making Process Steps

Temperature Control for Computer to Plate Technology

Process

Platesetter Cooling

Plate Processor Cooling

CTP Technology in Offset Printing

Digital Plate Setter UV CTP Machine

## **About NIIR Project Consultancy Services (NPCS)**

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
