The Complete Technology Book on E-Waste Recycling (Printed Circuit Board, LCD, Cell Phone, Battery, Computers) 3rd Revised Edition

Code: NI288	Format: paperback
Indian Price: ₹1975	US Price: \$150
Pages: 360	ISBN: 9788178331577
Publisher: Asia Pacific Business Press Inc.	

Description

Electronic waste or e-waste describes discarded electrical or electronic devices. Used electronics which are destined for reuse, resale, salvage, recycling or disposal are also considered as e-waste. With advancements in the electronic world almost occurring on a day-to-day basis and increased availability of products to the public, it is not surprising to see a staggering increase in the generation of electronic wastes over the past decade. The e-waste now represents the biggest and fastest growing manufacturing of wastes with as high as about 40 million tons a year at the global level. All these thing leads to increase in E-waste generation in the country.

Electrical and electronic equipment contain different hazardous materials which are harmful to human health and the environment, if not disposed of carefully. Due to the lack of awareness for e-waste recycling in emerging economies, innovation hubs and centres of excellence have not yet been established. This has leads to the requirement of a proper disposal and recycling system so that environmental pollution and health hazard is reduced. We have tried to give information in this book which will help in minimizing this ever growing problem.

Today the electronic waste recycling business is in all areas of the developed world a large and rapidly consolidating business. This recycling is done by sorting, dismantling, and recovery of valuable materials. This diversion is achieved through reuse and refurbishing.

This book aims at providing a thorough understanding and analysis of the E-Waste in the wake of evolving market dynamics. The book describes E-waste rules by Ministry of Environment and Forests. The book discusses the overview of the E-Waste Recycling along with their Classification, Composition, Recycling Process of different products and effects of E-waste on environment and human health. Also it contains suppliers contact details of plant & machinery with their photographs.

The book covers E-waste Recycling- An Introduction, Overview of WEEE/E-Waste Management, Hazardous Materials in E-Waste, E-Waste Management System Specifications, Recycling of E-Waste, Recycling of Printed Circuit Board, Recycling of Liquid Crystal Display, Cell Phones Recycling, Battery Recycling, Computer Recycling, Restriction of Hazardous Substances Directive and Environmental Aspects.

It will be a standard reference book for Professionals, Decision-makers, Engineers, those Studying and Researching in this important area and others interested in the field of E-Waste Recycling. Professionals in academia and industry will appreciate this comprehensive and practical reference book, due to its multidisciplinary nature.

Content

1. E-WASTE RECYCLING--AN INTRODUCTION

Composition of E-Waste

Components of E-Waste

Status of E-Waste in India

SWOT Analysis

SWOT Analysis of E-Waste Management

E-Waste Legislation in India

The Hazardous Waste (Management and Handling) Rules, 2003

The Hazardous Waste (Management, Handling and Trans boundary Movement) Rules, 2008

Guideline for Environmentally Sound Management of E-Waste, 2008

The E-Waste (Management and Handling) Rules, 2011

Loopholes in Legislations

Integrated Product Policy

Sustainable Development

2. OVERVIEW OF WEEE/E-WASTE MANAGEMENT

Introduction

Mechanism of WEEE/E-waste Trade

WEEE/E-waste Life Cycle

WEEE/E-Waste Material Flow Model

Phase I

Phase II

Phase III

Phase IV

Components of WEEE/E-waste Management

Waste Electrical and Electronic Equipment (WEEE) Directive in the European Union

Obligations of the Producer under the WEEE

Barriers to Recycling of WEEE

WEEE Health and Safety Implications

3. HAZARDOUS MATERIALS IN E-WASTE

Valuable Materials in E-Waste

Possible Hazardous Substances Present in E-Waste

Component Possible Hazardous Content

Glycol, Other Unknown Substances

Plastics Containing Brominated Flame Retardants (BFRs)

Insulation

Asbestos

Refractory Ceramic Fibers (RCFs)

Liquid Crystal Display (LCDs)

Components Containing Plasticisers/Stabilizers

Circuit Boards

Flame Retardants

Lead

Mercury

Beryllium

Capacitors

Electrolyte Capacitors

Capacitors Containing Poly Chlorinated Biphenyls (PCBs)

4. E-WASTE MANAGEMENT SYSTEM SPECIFICATIONS

Tentative Specifications for E-Waste Collection System

Tentative Specifications for E-waste Treatment System

Manual E-Waste Dismantling/Treatment Plant

Semi-Automatic E-Waste Dismantling/Treatment Plant

Automatic E-Waste Dismantling/Treatment Plant

Common Specifications for Utilities at Collection Centers and Processing Facilities

5. RECYCLING OF E-WASTE

Individual Processes

Crushing/Diminution

Size Classification

Magnetic Separation
Density Separation
Eddy Current Separation
Electrostatic Separation
Outputs and Markets
Metals
Glass
Plastics
Emerging Recycling and Recovery Technologies
Automated Disassembly
Comminution
Separation
Thermal Treatments
Hydrometallurgical Extraction
Dry Capture Technologies
Biotechnological Capture
Sensing Technologies
Design for Recycling and Inverse Manufacturing
E-Waste Segregation and Disposal Method
Structure and Main Steps in the Recycling Chain
Structuring of the Recycling Chain

6. RECYCLING OF PRINTED CIRCUIT BOARD

Composition of Printed Circuit Board
Characteristics of PCB Scrap
Density Differences
Magnetic and Electrical Conductivity Differences
Polyformity
Liberation Size
Chemical Reactivity
Electropositivity
Materials
Fabrication Process for Printed Circuit Process (PCB)
Mechanical Recycling Process of Printed Circuit Boards (PCBs)
PCB Recycling of the Metal Fraction
Pyrometallurgy
Hydrometallurgy
Biometallurgy
Challenges and Future Trends
Dismantling
Recovery of Copper and Precious Metals

Recycling and Recovery of the Non-Metallic Materials

7. RECYCLING OF LIQUID CRYSTAL DISPLAY

Composition and Characterisation of LCDs

Barriers to Recycling of LCDs

Recycling Processes for Liquid Crystal Displays (LCDs)

Manual Disassembly

Manual Disassembly Processing for LCDs

Automated Processes for LCD Recycling

Automated Disassembly Processes for LCDs

Hazardous Materials in Liquid Crystal Displays (LCDs)

Environmental Concerns of LCD

Loss of Light Energy

Hazardous Chemical

Hazardous Gases

Mercury Accumulation in End-of-Life Products

8. CELL PHONES RECYCLING

A Cell Phone Contains Just a Few Individual Parts

Harmful Substances in Mobile Phones

Cadmium

Lead

Lithium

Mercury

Process Overview

Collection and Transportation

Pre-Processing

Reuse of Phones

Reuse of Components

Recycling of Materials

I. Pre-treatment

II. Copper Recovery

III. Precious Metals Recovery

IV. Recovery Rate

9. BATTERY RECYCLING

Main Processing Routes

Pyrometallurgical Route

Hydrometallurgical Route

Metallurgical Aspects of Lead Recycling from Battery Scrap

Technical Steps in Battery Recycling

Dismantling of Battery Cases and Feed Preparation

Melting and Reduction Operation of Paste and Battery Fines

Melting of Grids, Terminals and Bridges

Refining of Crude Lead

Gas Cleaning System

10. COMPUTER RECYCLING

Composition of Computer

Recycling Process of Computers

Collection

Sorting, Processing and Reuse in Production

Removing the Large Objects

Test for Potential Reuse

Manual Disassembly

Separation into Material Composition

Disposal of Non-Recyclable Parts

Purchase of Products Made of Recycled Materials

11. RESTRICTION OF HAZARDOUS SUBSTANCES DIRECTIVE

RoHS Compliance

The RoHS Directive and Proscribed Materials

RoHS Proscribed Materials

Lead

Brominated Flame Retardants

Cadmium, Mercury and Hexavalent Chromium

Benefits ROHS

Health Benefits

Reliability Concerns Unfounded

Flow Properties and Assembly

Some Exempt Products Achieve Compliances

12. E-WASTE RULES BY MINISTRY OF ENVIRONMENT AND FORESTS

Modified Draft Notification

General

Responsibilities

Procedure for Seeking Authorization and Registration for Handling E-wastes

Procedure for Registration with State Pollution Control Board

Reduction in the Use of Hazardous Substances (ROHS) in the Manufacture of Electrical and Electronic Equipment

Miscellaneous

Schedule-I

Schedule-II

Schedule-III

13. ENVIRONMENTAL ASPECTS

Effects on Environment and Human Health

Pollutants in E-Waste

Impact of Hazardous Substances on Health and Environment

Dealing with E-Waste

Management Options to Severity of the Problem

Responsibilities of the Government

Responsibility and Role of Industries

Responsibilities of the Citizen

Need for Stringent Health Safeguards and Environmental Protection Laws in India

14. ADDRESSES OF PLANT AND MACHINERY SUPPLIERS

15. PLANT AND MACHINERY PHOTOGRAPHS

16. PLANT LAYOUT AND PROCESS FLOW SHEET DIAGRAM

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
