The Complete Book on Cement & Concrete Products Manufacturing

Code: NI356	Format: paperback
Indian Price: ₹1975	US Price: \$150
Pages: 496	ISBN: 9788195744749
Publisher: Asia Pacific Business Press Inc.	

Description

The Complete Book on
Cement & Concrete Products Manufacturing
(AAC Blocks, Slag & High Alumina Cement, Clinker, Concrete Block, Floor Slab, Roof Tiles, Interlocking Paving Blocks,
Fly Ash Bricks, Flooring Tiles, Precast RCC Wall, Prestressed Concrete Beams, Poles, Pipe, Sleeper, RCC Beam, Ready Mix Concrete and Wall Putty with Manufacturing Process, Machinery Equipment Details and Factory Layouts)

Cement is a powdery substance made by calcining lime and clay. When cement is mixed with water, it forms mortar, and when it is mixed with sand, gravel, and water, it makes concrete. Mortar is used as a bonding agent for plastering, masonry work, and pointing.

Concrete is a mixture of aggregates and paste. The aggregates are sand and gravel or crushed stones; and the paste is made from water and portland cement mixture. Concrete is used for laying floors, roofs and constructing lintels, beams, pillars and other masonry structures. Concrete products such as pipes, blocks, bricks, and concrete articles are made using concrete.

The cement and concrete products market consists of sales of cement and concrete products and related services by entities (organizations, sole traders and partnerships) that manufacture cement and concrete products such as concrete pipes, bricks, and paving blocks. The cement and concrete products manufacturing industry includes establishments engaged in manufacturing portland cement, pozzolanic cement, ready-mix concrete, concrete blocks, bricks, and pipes and related products.

The global cement and concrete products market was valued at \$333,255.8 million. The market accounted for 0.40% of the global GDP. In terms of per capita consumption, the market accounted for \$43.5. The market was also supported by rapid urbanization, and government initiatives towards infrastructure development. Growth in the forecast can be attributed to increasing spending on infrastructure, global economic growth, the development of affordable housing, and a rapidly growing urban population.

The cement and concrete industry is still expected to grow in the coming years. Companies are looking for ways to reduce their environmental footprint by making use of more efficient manufacturing processes and renewable energy sources. They are also developing new materials that are stronger and more sustainable than traditional materials. This means that the industry will remain an important part of the global economy for many years to come.

This book contains in-depth information about Cement & Concrete Products, AAC Blocks, Slag & High Alumina Cement, Clinker, Concrete Block, Floor Slab, Roof Tiles, Interlocking Paving Blocks, Fly Ash Bricks, Flooring Tiles, Precast RCC Wall, Prestressed Concrete Beams, Poles, Pipe, Sleeper, RCC Beam, Ready Mix Concrete and Wall Putty with Manufacturing Process, Machinery Equipment Details and Factory Layouts. This book is also a fantastic resource for people interested in or who have worked in the Cement & Concrete industry.

Profitable and viable business opportunities exist in the Cement & Concrete sector. As a result, creating your own business is a good way to get into it. To learn more about Cement & Concrete industry in depth, read this book. It will assist you in figuring out how to establish your own Cement & Concrete Business. Because of the increasing demand for Cement & Concrete in today's market, it's a terrific method to earn money.

Content

1. INTRODUCTION

1.1 Chemistry

1.1.1 Hydraulic Cement

1.1.2 Non-Hydraulic Cement

1.2 Cement Physical Properties

1.3 Cement Chemical Properties

1.4 Cement Industry

2. HOW TO START YOUR OWN CEMENT BUSINESS

2.1 Make A Cement Factory Cost Analysis Plan

2.2 Make a Budget- Cement Plant

- 2.3 Choose Your Cement Factory Market or Region
- 2.4 Choose a Location with a Plentiful Supply of Raw Materials
- 2.5 Understand the Cement Manufacturing Process
- 2.6 Determine the Supply of Raw Material and Energy Supply
- 2.7 Get Environment Clearance
- 2.8 Make Your Project in Line with CSR and Sustainability
- 2.9 Get the Necessary Personnel and Begin Production
- 2.10 Gauge Your Competition

3. RAW MATERIALS USED FOR CEMENT PRODUCTION

- 3.1 Introduction
- 3.2 Lime Component
 - 3.2.1 Limestone
 - 3.2.2 Chalk
 - 3.2.3 Marl
- 3.3 Clay Component
- 3.4 Corrective Ingredients
- 3.5 Auxiliary Components of Cement Raw Materials
 - 3.5.1 Magnesium Oxide
 - 3.5.2 Alkalies
 - 3.5.3 Sulfur
 - 3.5.4 Chloride
 - 3.5.5 Fluoride
 - 3.5.6 Phosphorus

4. MANUFACTURING PROCESS OF CEMENT

- 4.1 Dry Cement Manufacturing Process
 - 4.1.1 Treatment of Raw Materials
 - 4.1.2 Burning or Calcination of the Dry Mix
 - 4.1.3 Grinding of Clinker
 - 4.1.4 Packing and Storage of Cement
- 4.2 Wet Process of Manufacturing of Cement.
 - 4.2.1 Preparation of Slurry
 - 4.2.2 Burning or Calcination
 - 4.2.3 Grinding of Clinker

5. EQUIPMENT AND MACHINERY REQUIRED FOR CEMENT PLANT

- 5.1 Stages of Cement Manufacturing
 - 5.1.1 Stage-1 Opencast Lime Stone Mining
 - 5.1.2 Stage-2 Lime Stone Crushing & Stacking

5.1.3 Stage-3 Raw Material Handling & Grinding

5.1.4 Stage-4 Coal Grinding

5.1.5 Stage-5 Preheater Kiln & Cooler

5.1.6 Stage-6 Clinker Grinding (Cement Mill)

5.1.7 Stage-7 Packing Plant & Loading Plant

6. TYPES OF CEMENT

6.1 Introduction

6.1.1 Ordinary Portland Cement (OPC)

6.1.2 Portland Pozzolana Cement (PPC)

6.1.3 Rapid Hardening Cement

6.1.4 Quick Setting Cement

6.1.5 Low Heat Cement

6.1.6 Sulphate Resisting Cement

6.1.7 Blast Furnace Cement

6.1.8 High Alumina Cement

6.1.9 White Cement

6.1.10 Colored Cement

6.1.11 Air Entraining Cement

6.1.12 Expansive Cement

6.1.13 Hydrophobic Cement

7. WHITE CEMENT MANUFACTURING

7.1 Introduction

7.2 How to Improve White Cement's Whiteness

7.2.1 Select the Best Raw Materials

7.2.2 Select the Appropriate Fuel

7.2.3 Select the Best Raw Mill and Cement Mill

7.2.4 Choose the Best Cooling Method

7.3 The Primary Applications

7.4 Differences between White Cement and Grey Cement

7.5 Raw Materials

7.6 White Cement Manufacturing

7.6.1 White Cement Clinker Manufacturing

7.6.2 White Cement Clinker Bleaching Process

7.7 Process

7.7.1 Crushing

7.7.2 Grinding

7.7.3 Calcination of Clinker

7.7.4 Clinker Cooling

7.7.5 Cement Grinding

7.7.6 Packing of Cement

8. QUICK SETTING CEMENT IN CONSTRUCTION

8.1 Applications

8.2 Why is Quick-Setting Cement a Good Choice for Construction?

8.3 How to Use Quick Setting Cement?

8.4 Considerations for Using This Type of Cement

8.5 Main Characteristics

8.6 Difference Between Quick Setting Cement and Rapid Hardening Cement

8.7 Ingredient

8.8 Manufacturing of Quick-Setting Cement

8.8.1 Raw Materials Crushing

8.8.2 Raw Materials Grinding

8.8.3 Clinker Calcination

8.8.4 Grinding Clinker

8.8.5 Cement Packing

9. PRODUCTION OF ORDINARY PORTLAND CEMENT (OPC)

9.1 Ordinary Portland Cement Varieties

9.1.1 33-Grade Cement

9.1.2 43-Grade Cement

9.1.3 53-Grade Cement

9.2 Chemical Characteristics of OPC

9.2.1 Factor of Lime Saturation

9.2.2 The Alumina-Iron Ratio

9.2.3 Insoluble Waste

9.2.4 Magnesia

9.2.5 Ignition Failure

9.2.6 Anhydride of Sulphur

9.3 Advantages

9.4 OPC Cement Properties

9.5 Specifications OPC Cement

9.6 Raw Materials

9.7 Manufacturing Process

9.7.1 Crushing and Grinding

9.7.2 Material Mixing

9.7.3 Heating the Slurry in the Rotary Kiln

9.7.4 Formation of Clinker

9.7.5 Grinding the Clinker with Gypsum

10. HIGH ALUMINA CEMENT

10.1 Introduction

10.2 Applications

10.3 Hydration of High Alumina Cement (HAC)

10.3.1 Conversion of High Alumina Cement

10.3.2 Effect of Curing Temperature on High Alumina Cement

10.4 Advantages

10.5 Difference between High Alumina Cement and Ordinary Portland Cement

10.6 Raw Materials

10.7 Manufacturing of High Alumina Cement

10.8 Physical Properties

10.9 Concrete Technology

10.9.1 Resistance to Chemical Attack

10.10 Refractory Properties of High Alumina Cement

11. BLAST FURNACE SLAG CEMENT AND ITS MANUFACTURING

11.1 Blast-Furnace Slag is Used in Making-Four Classes of Cement

11.2 What Industries are Blast Furnace Slag Used After Grinding?

11.3 Classification of Blast Furnace Slag

11.3.1 Air-Cooled Slag

11.3.2 Granulated Slag

11.3.3 Expansive Slag

11.3.4 Slag Cotton

11.4 Advantages of Blast-Furnace Slag Cement

11.5 Disadvantages of Blast-Furnace Slag Cement

11.6 Manufacturing Method

11.7 Process

11.7.1 Raw Material Production

11.7.2 Raw Mill

11.7.3 Clinker Production

11.7.4 Clinker Grinding

11.7.5 Finished Cement Storage and Packing

12. PORTLAND POZZOLANA CEMENT

12.1 Features

12.2 Applications

12.3 Composition

12.4 Advantages

12.5 Portland Pozzolana Cement Properties

12.6 Manufacturing Process

13. HOW CEMENT IS MADE WITH CLINKER

13.1 Composition of Clinker

13.2 Clinker Thermochemistry

13.3 Cement Clinker Types and Uses

13.3.1 Sulfate Resistant Clinker

13.3.2 Low Heat Clinker

13.3.3 White Clinker

13.3.4 Low-Alkali Clinker

13.3.5 Belite Calciumsulfoaluminate Ternesite (BCT)

13.4 Cement Clinker Use: Changing to Cement

13.5 How is Cement Clinker Produced?

13.6 What are Differences Between Clinker Cement and Grey Cement?

13.7 Manufacturing Process

13.7.1 Crushing of Limestone

13.7.2 Prehomogenisation

13.7.3 Grinding of Raw Materials

13.7.4 Homogenization

13.7.5 Pyro Processing

13.7.6 Clinker Formation

14. PLASTER OF PARIS AND ITS DIFFERENT USES

14.1 Properties of Plaster of Paris

14.2 Additional Features of Gypsum Plaster

14.3 What Distinguishes Gypsum from Plaster of Paris?

14.4 Types of Plaster of Paris

14.4.1 Gypsum Plaster

14.4.2 Clay Plaster

14.4.3 Lime Plaster

14.4.4 Cement Plaster

14.4.5 Heat Resistant Plaster

14.5 The Different Uses of Plaster of Paris

14.6 Process of Manufacture

15. CONCRETE AND ITS MANUFACTURING PROCESS

15.1 Concrete Components

15.2 Hardened Concrete

15.3 Development for the Long Term

15.4 Quality Concrete Essentials

15.5 Suitable Materials

15.6 Water-Cementitious Materials Ratio

15.7 Design-Workmanship-Environment

15.8 Concrete vs. Cement

15.9 Manufacturing Processes of Concrete

15.9.1 Batching

15.9.2 Mixing

15.9.3 Transporting

15.9.4 Placing

15.9.5 Compacting

15.9.6 Curing

15.9.7 Finishing

16. HOW TO START CONCRETE BUSINESS

16.1 Select a Name for Concrete Company

16.2 Create a Concrete Business Plan

16.3 Select the Legal Structure for Concrete Company

16.3.1 Limited Liability Company

16.3.2 Partnerships

16.3.3 Limited Liability Company (LLC)

16.3.4 C Corporation

16.3.5 S Corporation

16.4 Obtain Startup Capital for Concrete Business

(If Needed)

16.5 Establish a Business Location

16.6 Register Concrete Business with the Internal Revenue Service

16.7 Establish a Business Bank Account

16.8 Apply for a Business Credit Card

16.9 Obtain the Necessary Business Licenses and Permits

16.10 Obtain Business Insurance for Concrete Company

16.11 Purchase or Lease the Appropriate Concrete Business Equipment

16.12 Create Concrete Business Marketing Materials

16.13 Buy and Install the Software Required to Run Concrete Business

16.14 Ready for Business

17. DIFFERENT TYPES OF CONCRETE

17.1 What is the Significance of Concrete in Construction?

17.2 How to Choose a Concrete Type?

17.3 Concrete Work Safety Tips

17.4 Types

17.4.1 Plain Cement Concrete (PCC)

- 17.4.2 Cement Reinforced Concrete (RCC)
- 17.4.3 FRC (Fibre Reinforced Concrete)
- 17.4.4 Glass Fibre Reinforced Concrete (GFRC)
- 17.4.5 Ferrocement
- 17.4.6 Ready Mix Concrete
- 17.4.7 Precast Concrete
- 17.4.8 Prestressed Concrete
- 17.4.9 Light Weight Concrete
- 17.4.10 Polymer Concrete
- 17.4.11 High Density Concrete
- 17.4.12 High Performance Concrete
- 17.4.13 High Strength Concrete
- 17.4.14 Air Entrained Concrete
- 17.4.15 Self-compacting Concrete (SCC)
- 17.4.16 Shotcrete
- 17.4.17 Guniting Concrete
- 17.4.18 Pumped Concrete
- 17.4.19 Pervious Concrete
- 17.4.20 Smart Concrete
- 17.4.21 Stamped Concrete
- 17.4.22 Limecrete
- 17.4.23 Asphalt Concrete
- 17.4.24 Bacterial Concrete
- 17.4.25 Smog Eating Concrete
- 18. DIFFERENCE BETWEEN RCC AND PRESTRESSED CONCRETE
- 18.1 Materials Used in Prestressed Concrete
 - 18.1.1 Steel
 - 18.1.2 Tendons
 - 18.1.3 Wires Strands or Cables
 - 18.1.4 Bars
 - 18.1.5 Concrete
- 18.2 The Comparisons Between the RCC and Prestressed Concrete
- 19. CONCRETE FLOOR SLAB PRODUCTION PROCESS
- 19.1 Different Slabs
 - 19.1.1 One-Way Slabs on Beams
 - 19.1.2 One-Way Joist Slab (Ribbed Slab)
 - 19.1.3 Waffle Slab (Grid Slab)
 - 19.1.4 Flat Plates
 - 19.1.5 Flat Slabs

19.1.6 Two-Way Slabs on Beams

19.1.7 Hollow Core Slab

19.1.8 Hardy Slab

19.1.9 Bubble Deck Slab

19.1.10 Composite Slab

19.1.11 Precast Slab

19.1.12 Slab on Grade

19.2 Design Requirements of RCC Slab, Structural Design,
Building Design

19.2.1 Effective Span in Slab Design

19.2.2 Limiting Stiffness

19.2.3 Minimum Reinforcement

19.2.4 Maximum Diameter of the Bars

19.2.5 Spacing of the Main Reinforcement Bars

19.2.6 Percentage of Distribution Reinforcement

19.2.7 Cover to the RCC Slab

19.3 Process

19.3.1 Assemble and Erect Formwork for Slab

19.3.2 Prepare and Place Reinforcement for Slab

19.3.3 Pour, Compact and Finishing Concrete Floor Slab

19.3.4 Curing Concrete and Remove Formwork

20. CONCRETE BLOCK MAKING PROCESS

20.1 What do Need to Understand About Concrete
Blocks?

20.2 Why Use Concrete Blocks for Construction?

20.3 Advantages of Concrete Blocks

20.4 Raw Materials Utilized in Concrete Blocks

20.5 Concrete Blocks Manufacturing Process

20.6 Process

20.6.1 Mixing

20.6.2 Molding

20.6.3 Curing

20.6.4 Cubing

21. TYPES OF CONCRETE BLOCKS USED IN CONSTRUCTION

21.1 Hollow Concrete Blocks vs. Solid Concrete Blocks

21.2 Types of Hollow Concrete Blocks

21.2.1 Stretcher Block

21.2.2 Pillar Block

21.2.3 Lintel Block

21.2.4 Jamb Block

21.2.5 Column Block

21.2.6 Corner Block

21.2.7 Splitface Block

21.2.8 Bullnose Block

21.2.9 Partition Block

21.3 Types of Solid Concrete Blocks

21.3.1 Fly Ash Block

21.3.2 Aerated Autoclaved Block

21.3.3 Paving Block

21.3.4 Cellular Lightweight Block

21.3.5 Expanded Clay Aggregate Block

22. CONCRETE ROOF TILES PRODUCTION

22.1 Extruded Concrete Roofing Tiles

22.2 Improvements to Colourings, Coatings and Textures

22.3 Concrete Roof Tiles and Other Roofing Materials

22.4 The Use of Pigments

22.5 Reducing Efflorescence

22.6 Life Expectancy and Design Criteria

22.7 Roof Tile Testing

22.8 Weathering Tests and Roof Tile Fixing

22.9 Future of Concrete Roof Tiles

22.10 Raw Materials

22.10.1 Sand

22.10.2 Cement

22.10.3 Colour

22.11 Manufacturing Process

22.12 Equipment

23. HOW TO START ROOF TILES PRODUCTION BUSINESS

23.1 Conduct Research on Roof Tiles

23.2 Create an Effective Business Plan

23.3 Include Business

23.4 Registration for Taxes

23.5 Lease a Facility and Establish a Manufacturing
Factory

23.6 Raw Material Source

23.7 Market Research Source

24. INTERLOCKING CONCRETE PAVING BLOCKS

MANUFACTURING

24.1 Types of Pavers

24.1.1 Natural Stone Pavers

- 24.1.2 Brick Pavers
- 24.1.3 Concrete Pavers
- 24.2 Manufacturing Process
 - 24.2.1 Raw Material Required for the Making of Paver Blocks
 - 24.2.2 Batching
 - 24.2.3 Mixing
 - 24.2.4 Filling of Moulds
 - 24.2.5 Compaction
 - 24.2.6 Curing
 - 24.2.7 Quality Control
- 24.3 Manufacturing Equipment
 - 24.3.1 Batching Equipment
 - 24.3.2 Mixer
 - 24.3.3 Moulding Machine
 - 24.3.4 Curing Chamber
- 25. USE OF RICE HUSK ASH IN CONCRETE
 - 25.1 Introduction
 - 25.2 Salient Features
 - 25.3 Physical Properties
 - 25.4 Chemical Properties
 - 25.5 Why RHA?
 - 25.5.1 High Performance Concrete (HPC)
 - 25.5.2 Supplementary Cementing Materials
 - 25.5.3 Research on RHA
 - 25.5.4 Research Significance
 - 25.6 Material Properties and Mix Design
 - 25.6.1 Water
 - 25.6.2 Methodology
 - 25.7 Methodology Adopted for Mix Design
 - 25.7.1 Design of Concrete Mix
 - 25.7.2 Preparation of Mix Design
 - 25.8 Casting of Specimens
 - 25.8.1 Specimens for Split Tensile Strength
 - 25.8.2 Specimens for Young's Modulus
 - 25.8.3 Testing of Specimens
 - 25.9 Material Used
 - 25.9.1 Cement
 - 25.9.2 Rice Husk Ash
 - 25.9.3 Aggregate

25.9.4 Super Plasticizers

25.9.5 Water

25.10 Production of Rice Husk Ash

25.11 Burning Process of Rice Husk

25.12 Mix Design

26. SULFATE RESISTANCE OF HIGH-PERFORMANCE CONCRETE

26.1 Introduction

26.1.1 Materials

26.1.2 Mix Proportions

26.1.3 Mixing and Casting

26.1.4 Curing and Testing

26.2 Compressive Strength Determination

26.3 Resistance to Sulfate Attack

27. PRESTRESSED CONCRETE CEMENT POLES PRODUCTION METHOD

27.1 Different Shapes of Prestressed Concrete Poles

27.2 Advantages of Prestressed Concrete Poles

27.3 Design Considerations of Prestressed Concrete Poles

27.4 Manufacturing Methods of Prestressed Concrete Poles

27.4.1 Centrifugal Casting Method

27.4.2 Long Line Method

27.4.3 Mensel's Method

27.5 Manufacturing Process

27.5.1 Forms and Moulds

27.5.2 Aggregate (Coarse or Fine)

27.5.3 Cement

27.5.4 H.T. Wire

27.5.5 Water

27.5.6 Admixtures

27.5.7 Reinforcement and Tensioning

27.5.8 Designing, Mixing, Placing and Compacting Concrete

27.5.9 Curing of Poles

27.5.10 Detensioning and Cutting of Wires

27.5.11 Curing of Poles in Vats, Handling and Stacking

27.5.12 Sampling and Inspection

28. PRESTRESSED CONCRETE CYLINDER PIPE WITH ITS MANUFACTURING PROCESS

28.1 Standard Pipe

28.1.1 Bar-Wrapped Concrete Pressure Pipe

28.1.2 Welded Steel Pipe

28.2 Lined Cylinder Pipe (L-301) Features

28.3 Advantages

28.4 Embedded Cylinder Pipe (E-301) Features

28.5 Advantages

28.6 Manufacturing Process

28.7 Bar-Wrapped Concrete Pressure Pipe

28.8 Special Sections and Fittings

28.9 Quality Assurance

29. HOW TO START CONCRETE PIPE MANUFACTURING BUSINESS

29.1 Understand the Industry

29.1.1 Industry Statistics that are Interesting

29.2 Conduct Market Research and Feasibility Studies

29.2.1 Demographics and Psychographics

29.3 Decide What Niche to Concentrate On

29.3.1 The Industry's Level of Competition

29.4 Understand the Industry's Major Competitors

29.4.1 Economic Analysis

29.5 Decide Whether to Buy a Franchise or Start from Scratch

29.6 Know the Possible Threats and Challenges Will Face

29.7 Choose the Most Suitable Legal Entity (LLC, C Corp, S Corp)

29.8 Choose a Catchy Business Name from the Ideas Below

29.9 Consult with an Agent to Determine the Best Insurance Policies

29.10 Protect Intellectual Property with Trademark, Copyrights, Patents

29.11 Get the Necessary Professional Certification

29.12 Obtain the Legal Documents Required to Operate

29.13 Obtain the Required Startup Capital

29.14 Select an Appropriate Business Location

29.15 Hire Employees to Meet Technical and Manpower Requirements

29.15.1 The Service Delivery Process of the Business

29.16 Create a Marketing Plan that is Jam-Packed with Ideas

and Strategies

29.17 Create a Set of Unbreakable Competitive Strategies to Help Win

29.18 Brainstorm Possible Ways to Retain Clients & Customers

29.19 Create a Corporate Identity and Develop Strategies to Increase Brand Awareness

29.20 Create a Suppliers/Distribution Network

30. PRESTRESSED CONCRETE BEAMS PRODUCTION PROCESS

30.1 Prestressed Concrete

30.2 Advantages

30.3 Levels of Prestressing

30.4 Materials for Making Prestressed Beams

30.4.1 Concrete, Steel, Grout

30.5 Prestressed Concrete Beams Production Process

30.6 Pre-Tensioning

30.6.1 Preparing the Mould

30.6.2 Placing of Reinforcement

30.6.3 Prestressing

30.6.4 Casting of Concrete

30.6.5 Removing the Mould

30.6.6 Storage

30.7 Post-Tensioning

30.7.1 Placing of Reinforcement and Duct

30.7.2 Prestressing

31. PRESTRESSED CONCRETE SLEEPER MANUFACTURING

31.1 What are the Characteristics of Prestressed Concrete?

31.2 What Materials Make up Prestressed Concrete?

31.3 Prestressed Concrete Sleepers Manufacturing Process

31.3.1 Preparing Molds

31.3.2 Pre-Tensioning of Strands

31.3.3 Concreting

31.3.4 Steam Curing

31.3.5 Removing Molds

31.3.6 Wet Curing

31.3.7 Testing and Transportation

32. RCC (REINFORCED CEMENT CONCRETE) BEAM

32.1 Purpose of Beams

- 32.2 Purpose of Stirrups in the Beam
- 32.3 Types of Beam According to the Support Conditions
 - 32.3.1 Simply Supported Beams
 - 32.3.2 Continuous Beams
 - 32.3.3 Fixed Beams
 - 32.3.4 Cantilever Beams
 - 32.3.5 Overhanging Beam
- 32.4 Types of Loads on Beams
 - 32.4.1 Point Load or Concentrated Load
 - 32.4.2 Distributed Load
 - 32.4.3 Uniformly Distributed Load (UDL)
 - 32.4.4 Uniformly Varying Load (UVL)
 - 32.4.5 Couple Forces
- 32.5 Reinforcement in RCC Beam
 - 32.5.1 Single Reinforcement
 - 32.5.2 Double Reinforcement
 - 32.5.3 Shear Force
 - 32.5.4 Bending Moment
 - 32.5.5 Deflection
- 32.6 The Manufacturing Process
- 33. PRECAST RCC WALL PRODUCTION
 - 33.1 Materials
 - 33.2 Basic Material Testing
 - 33.2.1 Test on Cement
 - 33.2.2 Test on M-Sand and Coarse Aggregate
 - 33.3 Mix Proportions for One cum of Concrete (SSD Condition)
 - 33.4 Test on Concrete
 - 33.4.1 Compressive Strength Test
 - 33.4.2 Slump Test
 - 33.5 Manufacturing Process
- 34. TYPES OF ADMIXTURES AND ITS EFFECT ON CONCRETE
 - 34.1 What Purposes do Admixtures Serve?
 - 34.2 What is the Purpose of Admixtures in Concrete?
 - 34.3 What is the Ideal Concrete Admixture?
 - 34.4 Types of Concrete Admixtures
 - 34.4.1 Water Reducing Admixtures
 - 34.4.2 Retarding Admixtures
 - 34.4.3 Accelerating Admixtures
 - 34.4.4 Air Entraining Concrete Admixture

- 34.4.5 Pozzolanitic Admixtures
- 34.4.6 Damp-Proofing Admixtures
- 34.4.7 Gas forming Admixtures
- 34.4.8 Air Detraining Admixtures
- 34.4.9 Alkali Aggregate Expansion Preventing Admixtures
- 34.4.10 Anti-washout Admixtures
- 34.4.11 Grouting Admixtures
- 34.4.12 Corrosion Preventing Admixtures
- 34.4.13 Bonding Admixtures
- 34.4.14 Fungicidal, Germicidal, Insecticidal Admixtures
- 34.4.15 Coloring Admixtures
- 34.5 Mechanism of Action of Chemical Admixtures
- 34.6 Admixtures and Concrete Rheology
- 34.7 Concrete Admixtures and Their Effect on Concrete Properties
 - 34.7.1 Air Entraining Admixtures
 - 34.7.2 Water Reducing
 - 34.7.3 Retarders
 - 34.7.4 Accelerators
 - 34.7.5 High Range Water Reducing Admixtures
- 34.8 Miscellaneous Admixtures
- 35. FLY ASH BRICKS MANUFACTURING PROCESS
 - 35.1 History
 - 35.2 Sources of Fly Ash
 - 35.3 Properties of Fly ash Bricks
 - 35.4 Environmental Advantages of Fly Ash Bricks
 - 35.5 Merit of Fly Ash Brick
 - 35.6 Raw Materials
 - 35.7 Manufacturing Process
- 36. HOW TO BEGIN FLY ASH BRICK MANUFACTURING BUSINESS
 - 36.1 Determine a Business Plan
 - 36.2 Required Space
 - 36.3 Abundance of Water
 - 36.4 Availability of Raw Material
 - 36.5 Required Machinery
 - 36.6 Worker Attainability
 - 36.7 Costing
 - 36.8 Analyze the Competitor
 - 36.9 Profitability

37. AAC BLOCKS (AUTOCLAVED AERATED CONCRETE BLOCKS)

PRODUCTION-FLY ASH BASED

37.1 History About ACC Blocks

37.2 Benefits of AAC Blocks

37.3 AAC Blocks Manufacturing

37.4 Ingredients of AAC Blocks

37.5 Process

37.5.1 Raw Material Preparation

37.5.2 Dosing and Mixing

37.5.3 Moulding, Rising and Pre-Curing

37.5.4 De-Moulding and Wire Cutting

37.5.5 Autoclaving of AAC blocks

38. MOSAIC FLOORING TILES PRODUCTION PROCESS

38.1 History of Mosaic Art

38.2 How to Make Mosaic Art

38.3 Purpose of Mosaic Floor Tiles

38.4 Construction of Mosaic Flooring

38.5 Advantages of Mosaic Floor Tiles

38.6 Disadvantages of Mosaic Tiles

38.7 Types of Mosaic Floor Tiles

38.7.1 Chevron Mosaic Tile

38.7.2 Penny Hexagonal Tile

38.7.3 Hexagon Mosaic Tile

38.7.4 Octagonal Mosaic Tiles

38.7.5 Herringbone Floor Tiles

38.7.6 Glass Mosaics

38.7.7 Metal Mosaics

38.7.8 Natural Pebble (Stone) Mosaics

38.7.9 Natural Wood Mosaics

38.7.10 Marble Mosaic Tile

38.7.11 Porcelain Mosaic Tile

38.8 There are Three Method

38.8.1 Direct Method

38.8.2 Indirect Method

38.9 Manufacture of Mosaic Tiles

38.9.1 Preparation of Clay

38.9.2 Moulding

38.9.3 Drying

38.9.4 Burning

38.9.5 Pollution Control

38.9.6 Energy Conservation

39. HOW TO PRODUCE WALL PUTTY

39.1 Types of Wall Putty

39.1.1 Cement Wall Putty

39.1.2 Acrylic Wall Putty

39.2 Is Plaster the Same as Wall Putty?

39.3 What does Wall Putty do in Building?

39.4 Benefits of Using Wall Putty

39.4.1 Repairing Cracks and Damages on Walls

39.4.2 Providing a Base for New Paint

39.4.3 Improving Insulation

39.4.4 Easy to Use and Apply

39.4.5 Quick-Drying Time

39.4.6 Resistant to Moisture

39.4.7 Wall Putty doesn't Flake or Get Easily Damaged

39.5 Chemical Composition

39.6 Applications

39.6.1 Use in Construction

39.6.2 Polyester Based Putty

39.6.3 Plumber's Putty

39.6.4 Other Uses

39.7 Wall Putty vs. White Cement

39.8 Wall Putty vs. POP

39.9 Raw Material

39.10 Putty Manufacturing Process

39.10.1 Raw Material Unloading & Storage

39.10.2 Weighing/Batching of the Ingredients

39.10.3 Conveying of Raw Material to Charge Hoppers

39.10.4 Blending & Mixing

39.11 Main Components of the Wall Putty Making Machine

39.11.1 Raw Material Storage Equipment

39.11.2 Dosing Device

39.11.3 Mixer

39.11.4 Packaging Machine

39.11.5 Dust Collector

39.11.6 Conveying and Lifting Equipment

40. READY MIX CONCRETE

40.1 Merits of R.M.C.

40.2 Scope of Ready Mix Concrete

- 40.3 Materials Required For Ready Mix Concrete
- 40.4 Mixing Process
 - 40.4.1 Transit Mixed (or “Truck-Mixed”) Concrete
 - 40.4.2 Shrink Mixed Concrete
 - 40.4.3 Central Mixed Concrete
- 40.5 Slurry Mixing
- 40.6 Equipment Required In Ready Mixed Concrete
 - 40.6.1 Batching
 - 40.6.2 Inline Bins
 - 40.6.3 Silos
- 40.7 Tests Carried on R.M.C
- 40.8 Ready Mix Concrete Quality Testing Methods
 - 40.8.1 Concrete Slump Tests
 - 40.8.2 Air Content Testing
 - 40.8.3 Unit Weight
 - 40.8.4 On-Field Testing of Existing Concrete
 - 40.8.5 Schmidt Rebound Hammer
 - 40.8.6 Destructive Concrete Testing
 - 40.8.7 Comprehensive Strength Laboratory Test
- 41. HOW TO MAKE MANUFACTURED SAND
 - 41.1 M Sand Types
 - 41.2 Why is Manufactured Sand Significant Today?
 - 41.4 The Factors that Promote the Development of Artificial Sand
 - 41.4.1 Natural Sand Depletion
 - 41.4.2 The Need for Energy Saving and Environmental Protection
 - 41.4.3 The Need for the Development of High-Performance Concrete Technology
 - 41.5 Advantages of Manufactured Sand
 - 41.6 Manufactured Sand Production Process
 - 41.7 Coarse and Fine Crushing
 - 41.7.1 Primary Crushing
 - 41.7.2 Jaw Crusher
 - 41.7.3 Secondary Crushing
 - 41.8 Impact Crusher
 - 41.9 Cone Crusher
 - 41.10 Sand Making and Screening
 - 41.11 Sand Washing and Recycling
- 42. ISO STANDARDS

43. INDIAN STANDARD CODES

44. BIS STANDARDS

45. PLANT LAYOUT AND PROCESS FLOW CHART & DIAGRAM

46. PHOTOGRAPHS OF PLANT AND MACHINERY WITH SUPPLIERS
CONTACT DETAILS

- Automatic Block Making Machine
- Hydraulic Interlocking Block Machine
- Rotary Kiln
- Rotary Cooler
- Cement Clinker Ball Mill
- Weigh Feeder
- Cone Crusher
- Jaw Crushers
- Sand Rotary Dryer
- Psc Pole Mold Making Machine
- Vibratory Feeder
- Fly Ash Brick Making Machines
- Prestressed Electric Pole Mould
- Prestressed Concrete Pipe Mould
- Cement Packing Machine
- Clinker Granulator
- Concrete Sleeper Steel Moulds
- Rotary Cooler
- Steel Silo
- Bucket Elevator
- Belt Conveyors
- Roof Tile Forming Machine
- Artificial Sand Making Machine
- Paver Block Making Machine
- Concrete Testing Machines
- Wall Putty Making Machine
- Prestressed Concrete Hollow Core Slab Machine

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies,

Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.

NIIR PROJECT CONSULTANCY SERVICES

106-E, Kamla Nagar, New Delhi-110007, India.

Tel: 91-11-23843955, 23845654, 23845886, +918800733955
