Manufacturing of Petroleum Products (Petroleum Waxes, Greases and Solid Lubricants, Solid Fuels, Gaseous Fuels, Gasoline, Diesel Fuel Oils, Automotive, Diesel and Aviation Fuels, Lubricating Oils and Lubricating Greases)

Code: NI527	Format: paperback
Indian Price: ₹1675	US Price: \$150
Pages: 376	ISBN: 9788193733905
Publisher: NIIR PROJECT CONSULTANCY SERVICES	

Description

The petroleum waxes are semi refined or fully refined products obtained during the processing of crude oil. According to their structure they are divided into macrocrystalline waxes (paraffin waxes) and microcrystalline waxes (ceresine, petrolatum, others). Grease, thick, oily lubricant consisting of inedible lard, the rendered fat of waste animal parts, or a petroleum-derived or synthetic oil containing a thickening agent. Greases of mineral or synthetic origin consist of a thickening agent dispersed in a liquid lubricant such as petroleum oil or a synthetic fluid.

Diesel fuel, also called diesel oil, combustible liquid used as fuel for diesel engines, ordinarily obtained from fractions of crude oil that are less volatile than the fractions used in gasoline. Lubricating oil, sometimes simply called lubricant/lube, is a class of oils used to reduce the friction, heat, and wear between mechanical components that are in contact with each other. Lubricating oil is used in motorized vehicles, where it is known specifically as motor oil and transmission fluid.

The global wax market was valued at around USD 9 billion in 2017 and is expected to reach approximately USD 12 billion in 2024, growing at a CAGR of slightly above 3.5% between 2018 and 2024. The India lubricant market is expected to register a CAGR of 4.64%, during the forecast period, 2018-2023. The major factors driving the growth of the market are the increasing vehicular production along with the growing industrial sector. The global market for lubricants is expected to reach USD 70.32 billion by 2020. The global grease market is expected to grow at a CAGR of 2.13% during the forecast period, 2018 - 2023. Aviation fuel market size will grow by over USD 34 billion

during 2018-2022

Some of the fundamentals of the book are composition of the petroleum waxes, solvent extraction, greases and solid lubricants, solid fuels, other significant tests or properties, gaseous fuels, properties of waxes, gasoline, diesel fuel oils, automotive, diesel and aviation fuels, special processes for motor-fuel blending components, crude distillation, lubricating oils, lubricating greases, nature of lubricating oils, photographs of machinery with suppliers contact details

A total guide to manufacturing and entrepreneurial success in one of today's most lucrative petroleum industry. This book is one-stop guide to one of the fastest growing sectors of the petroleum industry, where opportunities abound for manufacturers, retailers, and entrepreneurs. This is the only complete handbook on the commercial production of petroleum products. It serves up a feast of how-to information, from concept to purchasing equipment.

Content

1. THE PETROLEUM WAXES

Wax-Production Methods

Paraffin Waxes, Natural And Synthetic

Functional Tests for Paraffin Waxes

Synthetic Paraffin Waxes

Microcrystalline Waxes

Oxidized Microcrystalline Waxes

Petrolatums

Field of Use of Petrolatum

Industrial uses of Petroleum-Wax

Paper Manufacturing

Paper Milk Cartons

Candlemaking

Drugs, Cosmetics, Chemicals, and Matches

Electrical Goods and Metal Casting

Textile Industry

Rubber Compounding

2. SOLVENT EXTRACTION

3. GREASES AND SOLID LUBRICANTS

Definition

Applications for Grease Lubrication
Structure and Properties of Greases
Materials Used in Making Greases
Characteristics of Greases from Various Metallic Soaps
Greases from Nonsoap Thickeners
Pure Petroleum Greases
Grease Additives and Fillers
Laboratory Testing of Greases
Consistency
Apparent Viscosity
Dropping Point
Oxidation Stability
Water Resistance
Extreme Pressure Qualities
Grease Specifications
Solid Lubricants
Introduction
Laminar Solids
Organic Compounds
Radiation Damage to Greases

4. SOLID FUELS

Introduction
Wood
Coal
Heating Value
Proximate Analysis

5. OTHER SIGNIFICANT TESTS OR PROPERTIES

Analyses, Occurrence, and Uses of Coals
Coal Sizes
Calculation of Proximate Analysis and Heating Value on Various Bases
Coal Coke
Petroleum Coke
Fuel Briquettes
Tests on Coke

6. GASEOUS FUELS

Composition of Gaseous Fuels

Natural Gas
Liquefied Petroleum Gases
Refinery Oil Gas
Producer Gas
Blast Furnace Gas
Water Gas
Carburetted Water Gas
Oil Gas
Coal Gas or Coke Oven Gas
Sewage Gas
Gas Testing
Specific Gravity or Density of Fuel Gases
Direct Weighing
Pressure Balance
Displacement Balance
Bunsen Apparatus
Conversion from Dry to Saturated Basis
Analysis of Fuel Gas
Spectrometry
Gas Chromatography
Distillation
Chemical Absorption

7. PROPERTIES OF WAXES

8. GASOLINE

Introduction
Classification of Fuel Properties
Volatility
General Requirements
Distillation Test of Gasoline
Reid Vapor Pressure Test
Starting Characteristics
Vapor Locking
Acceleration and Warm-up
Fuel Distribution
Volumetric Efficiency
Carburetor Icing
Specifications
Combustion Quality

Knocking
Surface Ignition
Mechanical Octane Number
Fuel Octane Number
Knock Rating
Knock Rating Methods
Knock Intensity Measurement
Significance of Knock Test Results
Fuel Sensitivity
Road-Knock Rating Procedures
Anti-knock Compounds
Tetraethyllead
Effect of Molecular Structure of Fuels upon
Lead Susceptibility
Effect of Sulfur on Lead Susceptibility
TEL Addition to Commercial Blends
Heating Value of Gasoline
Gasoline Dye
Chemical Stability
Gum in Gasoline
Gum Tests
Corrosiveness
Corrosive Impurities
Sulfur Determination
Copper Strip Test
Doctor Test

9. DIESEL FUEL OILS

Diesel Fuel Economics
Composition of Fuel an Important factor
Properties Determining Fuel Performance
Cetane Value an Expression of Ignition Quality
Increased Importance of Ignition Delay
Test Methods for Diesel Fuel Oils
Calculated Cetane Index
Significance of tests on Diesel Fuels
Stationary Diesel-engine Field Highly Competitive
Need of Automotive Diesels for Wide Range of Fuels
Marine Diesel Engines
Many Fields of Use for Diesel Tractors

10. AUTOMOTIVE, DIESEL AND AVIATION FUELS

Gasoline

Aviation Gasoline

Jet Propulsion fuels

Tractor fuel

11. SPECIAL PROCESSES FOR MOTOR-FUEL BLENDING COMPONENTS

Alkylation

Isomerization

Polymerization

Naphtha Reforming

12. CRUDE DISTILLATION

Desalting Crude Oils

Vacuum Distillation

Auxiliary Equipment

Crude distillation unit products

Problems

13. LUBRICATING OILS

Introduction

Hydrodynamic Lubrication

Boundary Lubrication

ZN/P Curves

Viscosity

Dimensions and Units of Viscosity

Theory of Viscosity

Measurement of Viscosity

Viscosity-Temperature-Pressure Relations

Viscosity of Blends

Viscosity Index

Viscosity Temperature Coefficient

Significance of Viscosity and Viscosity Index

Cloud and Pour Point

Significance of Cloud and Pour Point

Additives

Viscosity Index Improvers

Pour Point Depressants

Oil Classification Systems

Oiliness

Oiliness Carriers
Extreme Pressure Lubricants
Sludge and Lacquer Formation
Anti-Oxidants
Corrosion Inhibitors
Detergents
Commercial Additives
Bench Tests for Oxidation Stability
Acidity
Carbon-Forming Tendencies
Work Factor Test
Oil Volatility
Sulfur
Cleanliness
Gravity
Color
Synthetic Lubricating Oils
Dibasic Acid Esters
Organo-Phosphate Esters
Silicate Esters
Silicons
Polyglycol Ether Compounds
Fluorinated and Chlorinated Hydrocarbons
Effect of Radiation

14. LUBRICATING GREASES

Introduction
The main grease components
Manufacture
Laboratory tests
Grease Structure
Grease rheology
Conclusions

15. NATURE OF LUBRICATING OILS

The nature of crude oil
Production of basic grades of lubricating oils
Laboratory and rig tests and their significance
Lubricating oil additives
SAE classification of lubricating oils

Selection of oils for various duties
Physical properties of lubricating oils
other than viscosity

16. PHOTOGRAPHS OF MACHINERY WITH SUPPLIERS CONTACT DETAILS

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
