Petroleum & Petroleum Products Technology Handbook (Thermal Cracking of Pure Saturated Hydrocarbons, Petroleum Asphalts, Refinery Products, Blending and Compounding, Oil Refining and Residual Fuel Oils)

Code: NI528	Format: paperback
Indian Price: ₹1875	US Price: \$150
Pages: 440	ISBN: 9788193733912
Publisher: NIIR PROJECT CONSULTANCY SERVICES	

Description

Petroleum asphalt is a sticky, black and highly viscous liquid or semi-solid that is present in most petroleum crude oils and in some natural deposits. Petroleum crude oil is a complex mixture of a great many different hydrocarbons. Refined petroleum products are derived from crude oils through processes such as catalytic cracking and fractional distillation. Refining is a necessary step before oil can be burned as fuel or used to create end products.

Residual fuel oil is a complex mixture of hydrocarbons prepared by blending a residuum component with a flux stock which is a distillate component diluent, to give the desired viscosity of the fuel oil produced. Petroleum refining is the process of separating the many compounds present in crude petroleum. An Oil refinery or petroleum refinery is an industrial process plant where crude oil is processed and refined into more useful products

The global Petroleum Asphalt market is valued at USD 48.8 Billion in 2017 and is expected to reach USD 77.67 Billion by the end of 2024, growing at a Growth Rate of 6.87% between 2017 and 2024. The global bunker fuel market was valued at \$137,215.5 million in 2017 and is expected to reach \$273,050.4 million by 2025, registering a CAGR of 9.4% from 2018 to 2025.

Some of the fundamentals of the book are composition of radiation effects on lubricants, thermal cracking of pure saturated hydrocarbons, petroleum asphalts, refinery products, refinery feedstocks, blending and compounding, oil refining, residual fuel oils, distillate heating oils, formulations of petroleum, photographs of machinery

with suppliers contact details.

A total guide to manufacturing and entrepreneurial success in one of today's most lucrative petroleum industry. This book is one-stop guide to one of the fastest growing sectors of the petroleum industry, where opportunities abound for manufacturers, retailers, and entrepreneurs. This is the only complete handbook on the commercial production of petroleum products. It serves up a feast of how-to information, from concept to purchasing equipment.

Content

1. RADIATION EFFECTS ON LUBRICANTS

Introduction

Interaction of Radiation with Organic Matter

General Physical Effects of Radiolysis

Base Oils

The Radiation Environment

Hydrocarbons (Petroleum Oils)

Alkylaromatics

Ethers

Esters

Silicones

Halogenated Compounds

Additives

Radiation Damage Inhibitors

Antioxidants

Viscosity Index Improvers

Antiwear Additives

Extreme Pressure (EP) Agents

Foam Inhibitors

Rust Inhibitors

Environmental Factors

Effects of Radiation Type and Intensity

Role of Temperature

Influence of Oxygen

Oil Lubricants

General: Commercial formulations

Based on Alkylaromatic Fluids

Fluids Based on Poly (phenyl ethers)

Steam Turbine Oils
Aircraft Turbine Oils
Hydraulic Fluids
Lubricating Greases
Gelling Agents

CONTENTS

Base Oils
Commerical Greases
Greases of Enhanced Radiation Resistance
Dynamic Tests
Principles

2. THERMAL CRACKING OF PURE SATURATED HYDROCARBONS 65-102

Introduction
Experimental Methods
Batch Reactors
Flow Reactors
Residence Time
Volume Change on Reaction
Kinetics of the Cracking Process
Rates of Decomposition
Straight Chain Paraffins
Correlation of the Rate Constants for n-Paraffins
Effect of Branching on the Rate of Decomposition
Effect of Pressure on the Decomposition of Paraffinic
Hydrocarbons
Rates of Decomposition-Saturated Cyclic Hydrocarbons
Estimation of Rate Constant of Decomposition

APPENDIX

Calculation of Product Distribution from Paraffin Cracking by the Rice-Kossiakoff
Method.

3. PETROLEUM ASPHALTS

Chemical and Physical Composition
Possible Structures of the Nuclei in Resins and Asphaltenes
Manufacture of Asphalt from Petroleum
uses of Asphalts

4. REFINERY PRODUCTS

Low-boiling Products

Gasoline

Gasoline Specifications

Distillate Fuels

Jet and Turbine Fuels

Automotive Diesel Fuels

Railroad Diesel Fuels

Heating Oils

Residual Fuel Oils

5. REFINERY FEEDSTOCKS

Crude Oil Properties

1. API Gravity

2. Sulfur Content, Wt%

3. Pour Point, °F (°C)

4. Carbon Residue, Wt%

5. Salt Content, 1lb/1000 bbl

6. Characterization Factors

7. Nitrogen Content, Wt%

8. Distillation Range

9. Metals Content, ppm

10. Total Acid Number

Composition of Petroleum

1. Paraffins

2. Olefins

3. Naphthenes (Cycloparaffins)

4. Aromatics

Crudes Suitable for Asphalt Manufacture

Crude Distillation Curves

Problems

6. BLENDING AND COMPOUNDING

7. OIL REFINING

Introduction

General Aspects of Oil Refining

Crude Oils and Products

Crude Oil Constituents

Classification of Crude Oils

Oil Products

- 1. Gas Fuels
- 2. Liquid Fuels
- Nonfuel Applications
- Oil Refining Processes
- Crude Oil Distillation
- Atmospheric Distillation
- Vacuum Distillation
- Crude Oil Desalting
- Catalytic Cracking (Cat Cracking)
- Hydrotreating
- Distillate Hydrotreating
- Pyrolysis Gasoline Hydrotreating
- Desulfurizing by Adsorption
- Catalytic Reforming
- Introduction
- Semiregenerative Reformer
- Fully Regenerative Reformer
- Continuously Regenerative Reformer
- Hydrocracking
- Residue Conversion Process Introduction
- Fundamentals of Residue Conversion and Process Options
- Hydrogen Addition (“H-in”) Processes
- Residue Hydrotreating (Demetallization, Desulfurization, Denitrification)
- Residue Hydrocracking (Hydroconversion)
- Carbon Rejection (“C-out”) Processes
- Thermal Processes (Visbreaking, Coking)
- Catalytic Processes (Residue Cat Cracking)
- Other Processes
- Extraction of Asphaltenes
- Partial Oxidation
- Process Combinations
- Gasoline Upgrading Processes
- 1. Alkylation
- 2. Polymerization
- 3. Isomerization
- 4. Production of Ethers (MTBE, ETBE)
- Other Processes
- Gas Treating
- Sulfur Recovery

Catalysts

Environmental Protection in Oil Refining

Introduction

Manufacturing Emissions

Hydrocarbons

Hydrocarbons in Air

Hydrocarbons in Wastewater

Hydrocarbons in Soil and Groundwater

Sulfur and Nitrogen Compounds

Sulfur Compounds

Nitrogen Compounds

Consumer Related Emissions

Transportation Fuels

Motor Gasoline

Diesel Fuel

Marine Fuels

Fuels for Heat Generation

Cost of Environmental Conservation

Integrated Refinery Models

Trends of Refinery Structures

Hydroskimming Refinery

Conversion Concepts

Cat Cracking - Visbreaking Refinery

Hydrocracking- Cat Cracking Refinery

Hydrocracking - Coking Refinery

Integration of Existing Refineries

Corrosion and Materials

Testing and Analysis

Crude Oil and Product Properties

Testing Methods and Standards

Storage and Transport

8. RESIDUAL FUEL OILS

History

Specifications For Residual Fuels

Fluidity

Thermal Stability

Explosiveness

Pacific Specifications for Fuel Oils

Detailed Inspections of Heavy Fuels

End uses of Residual Fuel Oils
Steam Boilers
Industrial Applications
Diesel Engines
Gas Turbines
Gas-enrichment Oils
Problems Associated with Utilization
Sulfur in Residual Fuel Oils
Ash Possible Source of Contaminants
Soot and Carbon Particles
Instability and Incompatibility
The Combustion of Residual Fuels
Heating Value
Chemistry of Combustion
Flue-gas Analysis
Humidity in Air and Flue Gases
Heat Content of Flue Gases
Specific Heat of Fuel Oils
Residual Fuel Oil Burners

9. DISTILLATE HEATING OILS

Status of the Heating-Oil Industry
Burners, Controls and Tanks
Central-Heating Systems
Burning Qualities in Oils
Stability in Heating Oils
Handling and Delivery

10. FORMULATIONS OF PETROLEUM

11. PHOTOGRAPHS OF MACHINERY WITH SUPPLIERS CONTACT DETAILS

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General

Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
