Description

Note: This book is available in Hindi Language only

Laghu V Griha Udyog (Swarozgar Pariyojanayen) Kutir Udyog, Small Scale Industries (SSI) in Hindi Language

The image shows a uniform grid of 100 empty rectangular boxes. The grid is composed of 10 horizontal rows and 10 vertical columns. Each box is a simple rectangle with no internal lines or shading. The entire grid is centered on a white background.

The image shows a collection of 40 windows, each consisting of two vertical panes. Each pane is further divided into four horizontal sections by thin lines. The windows are arranged in a staggered, non-uniform grid. There are seven rows of windows. The first row has 5 windows. The second row has 6 windows. The third row has 5 windows. The fourth row has 4 windows. The fifth row has 3 windows. The sixth row has 4 windows. The seventh row has 5 windows. This arrangement creates a visually balanced and somewhat organic layout.

The image displays a 10x10 grid of binary digits (0s and 1s), representing the state of a 10x10 grid of cells. The pattern is as follows:

Row 1: 1, 0, 0, 0, 0, 0, 0, 0, 0, 0
Row 2: 0, 1, 1, 1, 1, 1, 1, 1, 1, 0
Row 3: 0, 0, 1, 0, 0, 0, 0, 0, 0, 0
Row 4: 0, 0, 0, 1, 0, 0, 0, 0, 0, 0
Row 5: 0, 0, 0, 0, 1, 0, 0, 0, 0, 0
Row 6: 0, 0, 0, 0, 0, 1, 1, 1, 1, 1
Row 7: 0, 0, 0, 0, 0, 0, 1, 1, 1, 1
Row 8: 0, 0, 0, 0, 0, 0, 0, 1, 1, 1
Row 9: 0, 0, 0, 0, 0, 0, 0, 0, 1, 1
Row 10: 0, 0, 0, 0, 0, 0, 0, 0, 0, 1

This pattern indicates a central cluster of 1s (a 5x5 square centered at [6, 6]) surrounded by a few scattered 1s.

A horizontal row of ten empty boxes, each containing a vertical line for writing a digit. The boxes are evenly spaced and aligned horizontally.

A 5x10 grid of 50 empty rectangular boxes arranged in five rows and ten columns. The boxes are white with black outlines. They are distributed across the grid in a somewhat scattered pattern, with some rows having more boxes than others.

The diagram illustrates the components of production capacity. It consists of three rows of boxes. The top row shows 'Production Capacity' with four groups of boxes: the first group has 6 boxes, the second has 7 boxes, the third has 8 boxes, and the fourth has 5 boxes. The middle row shows 'Land & Building' with two groups: the first group has 3 boxes and the second has 6 boxes. The bottom row shows 'Machinery & Equipment' with two groups: the first group has 5 boxes and the second has 6 boxes.

The small scale sector is assuming greater importance every day. Hundreds of thousands of people start their own businesses every year, and untold more dream about the possibility of becoming their own bosses. Starting your own business is one of the few remaining paths to wealth. Entrepreneurship is one of the critical decisions to be made and it involves number of risk and has its own advantages also. But the charm of being a master of you is always above any other form of work. To start your own venture you have to decide on many things. Making a choice of the right project is a difficult decision for an entrepreneur and is an imperative decision. For the reason that rest of the challenges for setting up a business is based on the type of the product and fund to invest. But it is a perception that for owning a business you should have handsome amount of money. Now it is possible with small scale business. An entrepreneur requires a continuous flow of funds not only for setting up of his/ her business, but also for successful operation as well as regular up gradation/ modernization of the industrial unit. To meet this requirement, the Government (both at the Central and State level) has been undertaking several steps like setting up of banks and financial institutions; formulating various policies and schemes, etc. All such measures are specifically focused towards the promotion and development of small and medium enterprises. In both developed and developing countries, the Government is turning to small and medium scale industries and entrepreneurs, as a means of economic development and a veritable means of solving problems. It is a seedbed of innovations, inventions and employment. You do not need to be a genius to run a successful small business, but you do need some help. And that is exactly what this book is, a guide into the stimulating world of small business ownership and management.

Our Prime Minister unveiled a 19-point action plan for start-up enterprises in India. Highlighting the importance of the Standup India Scheme, Hon'ble Prime minister said that the job seeker has to become a job creator. Prime Minister announced that the initiative envisages loans to at least two aspiring entrepreneurs from the Scheduled Castes, Scheduled Tribes, and Women categories. It was also announced that the loan shall be in the ten lakh to one crore rupee range.

A startup India hub will be created as a single point of contact for the entire startup ecosystem to enable knowledge exchange and access to funding. Startup India campaign is based on an action plan aimed at promoting bank financing for start-up ventures to boost entrepreneurship and encourage startups with jobs creation.

Startup India is a flagship initiative of the Government of India, intended to build a strong ecosystem for nurturing innovation and Startups in the country. This will drive sustainable economic growth and generate large scale employment opportunities. The Government, through this initiative aims to empower Startups to grow through innovation and design.

What is Startup India offering to the Entrepreneurs

Stand up India backed up by Department of Financial Services (DFS) intents to bring up Women and SC/ST entrepreneurs. They have planned to support 2.5 lakh borrowers with Bank loans (with at least 2 borrowers in both the category per branch) which can be returned up to seven years.

PM announced that “There will be no income tax on startups’ profits for three years”

PM plans to reduce the involvement of state government in the startups so that entrepreneurs can enjoy freedom.

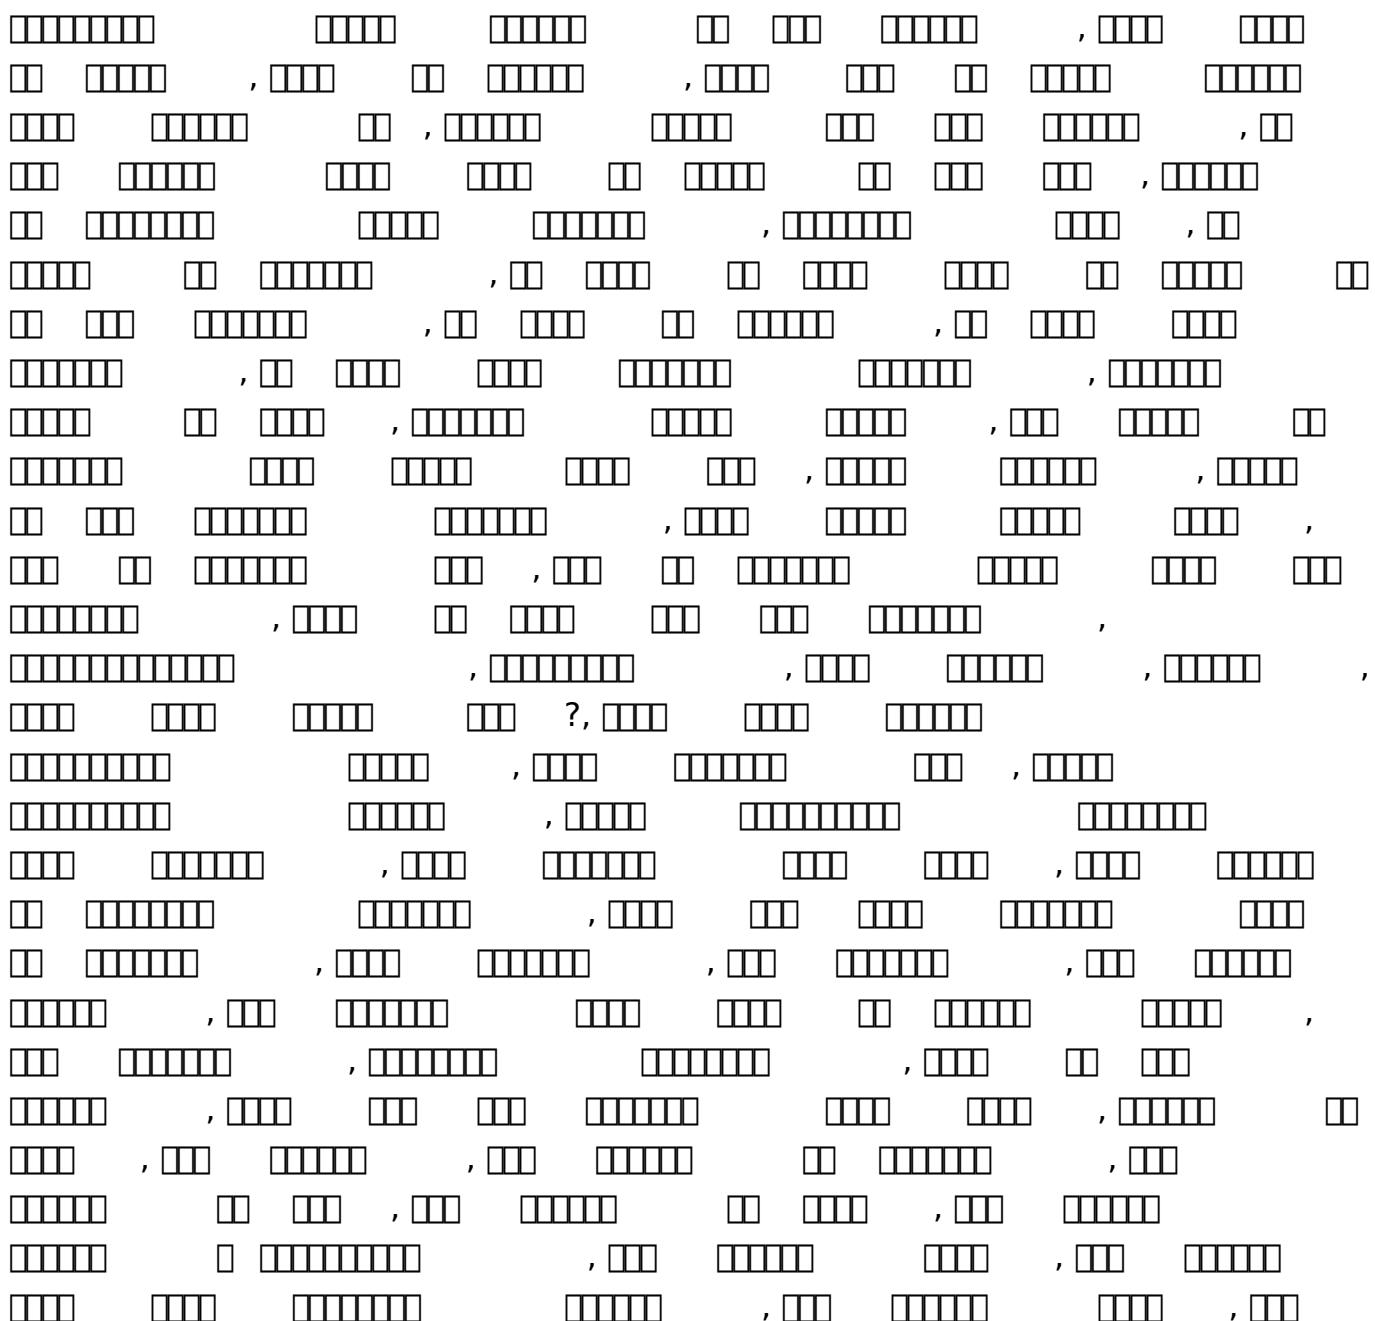

No tax would be charged on any startup up to three years from the day of its establishment once it has been approved by Incubator.

The book contains the aspects to plan any business strategy step by step. The book explains about business planning, government facilities available for small scale businesses, registration of small scale business, choosing right location, loan related information, availability of raw materials, national fund facility and more aspects that

will help start and maintain a new business. Some of the important projects described in the book are book binding, tiffin supply center, supari cutting, typing institute, paper pin production, herbal shampoo, powder production, shuttle cock for badminton, screen printing etc.

The identification of a suitable project within the investment limit of a new entrepreneur is very difficult. The present book strives to meet this specific entrepreneurial need. The book contains processes formulae, brief profiles of various projects which can be started in small investment without much technical knowledge at small place. This is very useful publication for new entrepreneurs, professionals, libraries etc. (This book is available in Hindi Language only)

The image displays a large grid of binary code, likely representing a digital file or a specific data structure. The binary digits are shown as small black rectangles arranged in a grid pattern. The code is organized into several horizontal rows, with some rows being significantly longer than others. There are also vertical gaps between groups of rows. The overall pattern is a dense, abstract representation of binary data.

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.

NIIR PROJECT CONSULTANCY SERVICES
106-E, Kamla Nagar, New Delhi-110007, India.
