Handbook on Fruits, Vegetables & Food Processing with Canning & Preservation (3rd Edition)

Code: NI19	Format: paperback
Indian Price: ₹1475	US Price: \$150
Pages: 688	ISBN: 9788178330839
Publisher: Asia Pacific Business Press Inc.	

Description

Natural foods such as fruits and vegetables are among the most important foods of mankind as they are not only nutritive but are also indispensable of the maintenance of the health. India is the second largest producer of fruits and vegetables in the world. Fertile soils, a dry climate, clean water and abundant sunlight help the hard working farmers to produce a bountiful harvest. Although there are many similarities between fruits and vegetables, there is one important difference that affects the way that these two types of crop are processed like fruits are more acidic than vegetables. Food processing is the set of methods and techniques used to transform raw ingredients into food or to transform food into other forms for consumption. Food processing typically takes clean, harvested crops or butchered animal products and uses these to produce attractive, marketable and often long shelf-life food products. Canning is a method of preserving food in which the food is processed and sealed in an airtight container. Food preservation is the process of treating and handling food to stop or greatly slow down spoilage (loss of quality, edibility or nutritive value) caused or accelerated by micro organisms. One of the oldest methods of food preservation is by drying, which reduces water activity sufficiently to prevent or delay bacterial growth. Drying also reduces weight, making food more portable. Freezing is also one of the most commonly used processes commercially and domestically for preserving a very wide range of food including prepared food stuffs which would not have required freezing in their unprepared state. Fruits and vegetable processing in India is almost equally divided between the organized and unorganized sector, with the organized sector holding 48% of the share. The present book covers the processing techniques of various types of fruits, vegetables and other food products. This book also contains

photographs of equipments and machineries used in fruits, vegetables and food processing along with canning and preservation. This book is an invaluable resource for new entrepreneurs, food technologists, industrialists etc.

Content

1. Characteristics of the Food Industry

Components of the Food Industry

Allied Industries

Interrelated Operations

2. Food Quality Assurance

The Need

A Role for Government

Microbiological Standards

A Role for Industry

Design of Company QA Program

Objectives

Raw Material Quality Assurance

In-process Quality Assurance

Finished Product Quality Assurance

3. Quality Factors in Foods

Appearance Factors

Color and Gloss

Consistency

Textural Factors

Measuring Texture

Texture Changes

Flavor Factors

Additional Quality Factors

Quality Standards

Planned Quality Control

4. Preserve, Candied and Crystallized Fruits and Vegetables

Preserve

General considerations

Candied Fruits/Vegetables

Process

Glazed Fruits/Vegetables

Crystallized Fruits/Vegetables

Problems in Preparation of Preserves and Candied Fruits

5. Food Preservation by Fermentation

Life with Microorganisms

Fermentation of Carbohydrates

Industrially Important Organisms in Food Preservation

Order of Fermentation

Types of Fermentations of Sugar

Fermentation Controls

Wine

Preservation

Sterilization Filtration

Beer

Vinegar Fermentation

Principles of Vinegar Fermentation

Vinegar Making

Preparation of Yeast Starter

Alcoholic Fermentation

Acetic Fermentation

Cheese

Kinds of Cheese

Cottage Cheese

Swiss Cheese

Blue Cheeses

6. Chemical Preservation of Foods

What Are Food Additives?

Importance of Chemical Additives

Legitimate Uses in Food Processing

Undesirable Uses of Additives

Safety of Food Additives

Functional Chemical Additive Applications

Specific Uses of Chemical Additives

Additives Permitted and Prohibited in the United States

Chemical Preservatives

Microbial Antagonists

Sorbic Acid

Antibiotics

Quality Improving Agents

Other Chemical Additives

Artificial Flavoring

Artificial Coloring

7. Cold Preservation and Processing

Distinction Between Refrigeration and Freezing

Refrigeration and Cool Storage

Requirements of Refrigerated Storage

Controlled low Temperature

Air Circulation and Humidity

Modification of Gas Atmospheres

Changes in Food During Refrigerated Storage

Freezing and Frozen Storage

Initial Freezing Point

Freezing Curve

Changes During Freezing

Choice of Final Temperature

Food Composition

Noncompositional Influences

Freezing Methods

Air Freezing

Packaging Considerations

Some Additional Developments

8. Heat Preservation and Processing

Sterilization

Commercially Sterile

Pasteurization

Blanching

Selecting Heat Treatments

Heat Resistance of Microorganisms

Thermal Death Curves

Margin of Safety

Heat Transfer

Conduction and Convection Heating

Cold Point in Food Masses

Determining Process Time and Process Lethality

Protective Effects of Food Constituents

Different Temperature-Time Combinations

Heating Before or After Packaging

9. Food Pickling and Curing

Pickled Fruits and Vegetables

Use of Salt Stock

Sour Pickles, Sweet Pickles, Processed Dill Pickles

Sauerkraut

Olives

Fermented And Pickled Products

Deterioration

Nutritional Value

Bloater Damage Control

Controlled Fermentations in Commercial Brining Tanks

Brine Recovery

Defect Reduction

The Principles of Fish Salting

The Influence of the Composition of Salt

Commercial Methods of Salting Fish

Brine-salting

Dry-salting

Comparative Efficiency of Brine-salting and Dry-salting

Some-curing Processes

Cold-smoking (Heavy Salt Cure)

Smoked Salmon

Hard-smoked Salmon

Meat Curing and Smoking

Pickled Meats

Salt

Sugar and Corn Syrup Solids

Nitrite and/or Nitrate

Nitrosamines

Phosphates

Sodium Erythorbate

Cured Meat Color

Role of Nitrite and/or Nitrate in Meat Color

Sausages and Table-ready Meats

Dry Sausage Manufacture

Processing

Fermentation

10. Food Preservation by Drying

Drying-A Natural Process

Dehydration-Artificial Drying
Dehydration vs. Sun Drying
Why Dried Foods?
Dehydration Permits Food Preservation
Humidity-Water Vapor Content of Air
RH-The drying Medium
Types of Driers
Adiabatic Driers
Heat Transfer through a Solid Surface
Criteria of Success in Dehydrated Foods
Freeze-Dehydration (Freeze Drying)
Triple Point of Water
Temperature Changes in Meat Freeze-dehydration
Influence of Dehydration on Nutritive Value of Food
Dehydration of Fruits
Dehydration of Vegetables
Dehydration of Animal Products
Dehydration of Fish
Dehydration of Milk
Dehydration of Eggs
Packaging of Dehydrated Foods

11. Food Preservation by Canning 1

Temperature vs. Pressure
Heat Resistance of Microorganisms Important in Canning
Factors Influencing the Heat Resistance of Spores
Heat Resistance of Enzymes in Food
Heat Penetration into Food Containers and Content
Storage of Canned Foods
External Corrosion of Cans
Coding the Pack
Influence of Canning on the Quality of Food
Color
Flavour and Texture
Protein
Improvements in Canning Technology
Retort Pouches
Testing a Good Seal
Hazard Analysis

12. Pickles

Preservation with Salt

Preservation with Vinegar

Preservation with Oil

Preservation with Mixture of Salt, Oil, Spices and Vinegar

Problems in pickle making

13. Chutneys and Sauces/Ketchups

Chutneys

Recipes for chutneys

Sweet mango chutney

Apple chutney

Plum chutney

Wood apple chutney

Apricot chutney

Papaya chutney

Tomato chutney

Aonla chutney

Sauces (Ketchups)

Recipes for sauces (ketchups)

Tomato sauce

Apple sauce

Plum sauce

Papaya sauce

Mushroom sauce

Aonla sauce

Problem in the preparation of sauces/ketchups

14. Mushroom Processing

Dehydration

Preparation of ketchup

Preservation with salt and acetic acid

Pickling

Canning

Mushroom poisoning

15. Tomato Processing

16. Jam, Jelly and Marmalade

Jam

Problems in jam production

Jelly

Important considerations in jelly making

Pectin

Acid

Sugar

Judging of end-point

Marmalade

After pectin extraction

17. Freezing of Fruits and Vegetables

Preparation of fruits/vegetables for freezing

Methods of freezing

Sharp freezing (Slow freezing)

Quick freezing

By direct immersion

Advantages

Disadvantages

By indirect contact with refrigerant

By air blast

Cryogenic freezing

Dhydro-freezing

Freeze-drying

Changes during freezing and storage for frozen products

Freezing process for fruits and vegetables

18. Vinegar

Types of vinegar

Steps involved in vinegar production

Outline Scheme of Vinegar Production

Preparation of vinegar

Slow process

Orleans slow process

Quick process (Generator or German process)

Precautions

Problems in vinegar production

19. Drying and Dehydration of Fruits and Vegetables

Advantages of dehydration over sun-drying

Spoilage of dried products

Reconstitution test for dried/dehydrated products

Reconstitution test

20. The Canning Process

Cans

Types of Cans

Square and Pullman Base

Pear Shaped

Round Sanitary

Drawn Aluminum

Oblong

Can Materials

Retorts

Nonagitating Retorts

Continuous Agitating Retorts

Hydrostatic Retorts

Establishment of Retort Schedule

Pasteurized Canned Products

Closing

Pasteurizing Cook

Cooling

Storage and Shelf Life

Aseptic Canning

21. Food Freezing

Development of a Frozen Food Industry

The Freezing Point of Foods

Percentage Water Frozen vs. Temperature of Food and Its Quality

Size of Ice Crystals Formed

Volume Changes During Freezing

Refrigeration Requirements in Freezing Foods

Freezing in Air

Freezing by Indirect Contact with Refrigerants

Direct Immersion Freezing

Packaging Requirements for Frozen Foods

Influence of Freezing on Microorganisms

Influence of Freezing on Proteins

Influence of Freezing on Enzymes

Influence of Freezing on Fats

Influence of Freezing on Vitamins

Freezing of Bakery Products

Packaging

Storage Life of Frozen Bread

Cookies and Cakes

Frozen Dairy Foods

The Ice Cream Industry

Basic Ingredients

Manufacture of Ice Cream

The Mix

Pasteurization

Homogenization

Cooling

Freezing

Hardening

Hazard Analysis

Hazard Categories

22. Cookie and Cracker Production Technology

Ingredients Handling

Mixing

Dough Relaxation and Fermentation

Dough Machining and Forming

Dough Relaxing

Cutting Stage

Scrap Return

Salter or Sugar Sprinkling

Rotary Molding

Extruder-Dough Formers

Wire Cut

Rout Press

The Fruit Bar Coextruder

Baking

Direct-Fired Ovens, Gas Fired

Convection (Indirect) Ovens

Post Conditioning

Secondary Processes

Icings

Enrobing

Sandwiched Cookies and Crackers

Biscuit Packaging

23. Snack Foods

Introduction

Popcorn

Four Types of Popcorn

Mechanism of Popping

Quality factors

Processing

Formulated Puffed Snacks

Ingredients

Other Grain Products

Expandable Ingredients

Frying Fats

Antioxidants

Sweeteners

Other Ingredients

Extruders and Extruding

Types of Extruders

Snacks that Are Cooked and Formed

Drying

24. Breakfast Cereals

Introduction

Present Status

Processing of Hot-serve Cereals

Wheat Cereals

Corn Cereals

Oat Cereals

Processing Ready-to-Eat Breakfast Cereals

Flakes

General Considerations

Corn Flakes

Wheat flakes

Bran Flakes

Shreds

Shredded Wheat Biscuits

Puffed Cereals

General Considerations

Oven-puffed Rice

Puffing by Extrusion
Sugar-coated Products
Ovens

25. Canned Meat Formulations

Corned Beef Hash

Federal Meat Inspection Regulations
Preparation

Meat

Potatoes

Onions

Canning

Beef Stew

Federal Meat Inspection Regulations
Preparation

Meat

Potatoes

Carrots

Onions

Preparation

Canning

Chili Con Carne

Federal Meat Inspection Regulations
Preparation

Canning

Vienna Sausages

Federal Meat Inspection Regulations
Preparation

Canning

Meat Balls with Gravy

Federal Meat Inspection Regulations
Preparation

Canning

Sliced Dried Beef

Federal Meat Inspection Regulations
Preparation

Drying and Smoking

Canning

Luncheon Meat

Preparation
Smoking
Canning
Filling and Pressing
Closing
Processing
Pasteurized
Sterile
Plastic Packaged Hams
Preparation
Packaging
Processing

26. Cured or Smoked Meats

Hams
Classification of Ham
Internal Temperature
Added Substance
Presence of Bone
Commercial Ham Manufacture
Curing
Smoking/Cooking
Cooked Ham
Baked Ham
Preparation
Country Ham
Preparation
Westphalian Ham
Preparation

Scotch Ham
Prosciutti Ham
Preparation
Honey Cured Hams
Preparation
Bacon
Canadian Bacon
Wiltshire Bacon
Beef Bacon
Jowl Bacon
Fat Backs and Heavy Bellies
Smoked Pork Loin
Picnic
Shoulder Butt
Corned Beef
Smoked Fresh Meat
Dried Beef
Procedure
Smoked and Cured Lamb
Smoked Tongue
Pickled Pigs Feet

27. Sausage Formulations

Ground Sausages
Instructions
Instructions
Instructions
Instructions
Instructions
Instructions
Semidry or Summer Sausages
Instructions
Instructions
Instructions
Instructions
Dry Sausages
Instructions
Instructions
Instructions

28. Processing of Rice

Introduction

Quality of Rice

Milling of Rice

Small-scale Milling

Modern Conventional Milling

Abrasive Milling of Rice

Lye-peeling

Extractive Milling

Rice Flour

Further Processing of Rice

Boiling and Steaming

Parboiling

Quick-cooking Rice
Shelf-stable Cooked Rice
Rice Cakes
Rice Milk

29. Creaming, Emulsions, and Emulsifiers

Emulsifier and Emulsions
Classification
Hydrophilic-Lipophilic Balance (HLB)
Oil-in-Water Emulsions
Type of Emulsifier used in Cookies and Crackers
Phosphatides and Lecithin
Synthetic Emulsifiers
Function of Emulsifiers in Cookies and Crackers
Eggs
Emulsifier
Mixing Operation in Cookie and Cracker Doughs
Mixing Operation
Creaming Method
Two-stage Method
Three-stage Method
Baking Cookies and Crackers
Emulsion Stability
Viscosity
To Lower Viscosity
To Increase Viscosity
Elevated Temperature
Inversion Phase
Phase Equilibria
Batter Aeration

30. Principles of Food Packaging

Introduction
Functions of Food Packaging
Requirements For Effective Food Packaging
Types of Containers
Primary, Secondary, and Tertiary
Form-Fill-Seal Packaging
Hermetic Closure
Food-Packaging Materials and Forms

Metal
Metal Cans
Can Construction
Can Corrosion
Can Sizing
Glass
Glass Containers
Paper, Paperboard, and Fiberboard
Plastics
Laminates
Retortable Pouches and Trays
Edible Films
Wood and Cloth Materials
Package Testing
High Barrier Plastic Bottles
Aseptic Packaging in Composite Cartons
Military Food Packaging

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of

the inputs in their research.
