Natural Fibers Handbook with Cultivation & Uses

Code: NI154	Format: paperback
Indian Price: ₹1275	US Price: \$125
Pages: 560	ISBN: 8186623981
Publisher: National Institute of Industrial Research	

Description

Natural fibers production, processing and export are vital to the economies of many developing countries and the livelihoods of millions of small scale farmers and low wage workers. Almost all natural fibers are produced by agriculture, and the major part is harvested in the developing world. It is convenient to classify natural fiber in two ways; morphologically, according to the part of plant from which they are obtained and practically according to the uses to which they are put, which in turn depend on their properties. From the view point of the uses vegetable fibers may be classified into following groups; textile fibers, cordage fibers, brush and mat fibers, stuffing and upholstery materials, paper making materials etc. Fibers from the view point of the part are classified as hair fibers, leaf fibers, woody fibers, bast fibers, etc. The use of fibers for paper making differs completely from their use in textiles, in that in papermaking it is ultimate fiber cells which are used; thus in papermaking process consists in breaking down the strands of fiber into the ultimate fibers. Jute, the most important textile fiber apart from cotton, is obtained from two species of corchorus(white jute) and C.olitoriusL. (tossa jute). Farmers around the world produce a wide variety of natural fibres, planting crops and rearing animals. Plant fibres may be from the plant fruit (e.g. cotton), stems (e.g. flax and jute) or leaf (e.g.sisal). Natural fibres are generally considered more environment friendly than synthetics in their production and disposal. However, there is great variation depending on the fibre and the growing conditions. Many chemicals are used to contain pests and weeds. Chemicals are also used in the processing and dyeing which can lead to water contamination. Processing of some natural fibers can lead to high levels of water pollutants, but they consist mostly of biodegradable compounds, in contrast to the persistent chemicals, including heavy metals, released in the effluent from synthetic fiber processing. Farming and production of natural fibres also plays a significant role

in eradicating poverty as an important source of farming income and contribution to food security in developing countries. Demand for natural fiber composites are largely driven by increasing environmental awareness. Due to low cost, low density, acceptable specific properties, ease of separation, enhanced energy recovery, CO₂ neutrality, biodegradability and recyclable properties, natural fiber use in composites is gaining as demand grows for component materials that are durable, reliable, light weight, with mechanical properties better than those of traditional materials. Total global natural fiber composite market expected to grow at 11% CAGR.

Some of the fundamentals of the book are the occurrence and nature of vegetable fibres, conditions necessary for growing flax, mulberry family (moraceae), lime family (titliaceae), experiments on mechanized production of jute, mallow family (malvaceae), kenaf production in various other countries, the use of unretted kenaf ribbons for sack manufacture, pea family (leguminosae), sterculia family (sterculiaceae), agave family (agavaceae), structure of the sisal industry, narcissus family (amaryllidaceae), lily family (liliaceae), pineapple family (bromeliaceae), fibres from other species of musa and a related genus, brush making fibres, etc.

The book contains process and other parameters for the manufacturing of fibers arrive from natural sources. Due to eco friendly nature there is very good domestic and export potentiality for natural fiber. This is very useful book for new generation entrepreneurs, consultant institutional libraries, and existing units.

Content

1. INTRODUCTION

The Occurrence and Nature of Vegetable Fibres

Bast Fibres

Leaf Fibres

Fibre Identification

Testing of Fibres

Chemical Analysis

Fibre Fineness and Commercial Use

2. FLAX FAMILY (LINACEAE)

Flax (*Linum Usitatissimum*)

Conditions Necessary for Growing Flax

Varieties

Cultivation

Harvesting

Pulling

Drying
Retting
Dew Retting
Water Retting
Warm Water Retting
Leaching
Double Retting
Aerated Retting
Green Flax
Scutching
Flax in the U.S.S.R
Flax in Belgium
Flax in Other Countries
China
Japan
Egypt
India
Australia
New Zealand
Kenya
Uganda
Grading of Flax
Properties of Flax
Trade

3. MULBERRY FAMILY (MORACEAE)

Hemp (*Cannabis Sativa*)
Botany
Breeding Experiments
Cultivation
Harvesting
Yield
Retting
Breaking and Scutching
Hemp in China
Hemp in Chile
Quality of Hemp
Properties and Uses of Hemp

4. LIME FAMILY (TITLIACEAE)

Jute (*Corchorus Capsularis* and *C. Olitorius*)
Cultivation
Soil
Preparation of the Soil
Sowing
Varieties
Harvesting
Retting
Extraction of Fibre
Cost of Production
Jute in Brazil
Jute in China
Production in Taiwan
Experiments on Mechanized Production of Jute
Varieties
Cultivation
Harvesting
Ribboning
Scutching
Retting
Washing
Drying and Storage
Sorting and Grading
Production of Jute in Other Countries
Burma
U.S.S.R
Borneo
Malaya
Philippines
Thailand
Nepal
Vietnam

Iran
Peru
Miscellaneous Countries
Sorting and Grading of Jute
Uses of Jute
The Jute Trade
Triumfetta Species

Honckenya Ficifolia

Funga Fibre (Cephalonema Polyandrum)

5. MALLOW FAMILY (MALVACEAE)

Kenaf (Hibiscus Cannabinus)

Varieties

Sowing

Harvesting

Growth Phases

Retting

Pests and Diseases

Kenaf in India

Kenaf Production in Various Other Countries

Argentina

China

Egypt

Guatemala

Haiti

Italy

Mexico

Mozambique

North Africa

Papua and New Guinea

Peru

Southern Rhodesia

Spain

Thailand

South Africa

Economics of Kenaf

The Use of Unretted Kenaf Ribbons for Sack Manufacture

Properties of Kenaf

Roselle (Hibiscus Sabdariffa)

Fibres From Other Species of Hibiscus

Urena Lobata

Cultivation

Retting

Yields

Distribution

Labour Requirements in Fibre Preparation

Grading of the Fibre

Properties and Uses

Trade

Abutilon Species

Sida Species

Pavonia Species

Thespesia Species

Miscellaneous Fibre Plants of the Malvaceae

6. NETTLE FAMILY (URTICACEAE)

Ramie (*Boehmeria nivea* and its Var. *Tenacissima*)

Varieties

Soils and Growing Conditions

Planting

Harvesting

Yields

Replanting

Fibre Extraction

Degumming

Problems of Ramie Degumming

Drying

Ramie in China

Varieties in China

The Ramie Industry in Japan

Varieties Grown

Pests and Diseases

Grading of Ramie in Japan

Spinning of the Fibre

Ramie in Taiwan

Ramie in Brazil

Ramie in Other Countries

Uses of Ramie Fibre

Properties of Ramie

The Trade in Ramie

Other Fibre Yielding Plants of the Urticaceae

7. PEA FAMILY (LEGUMINOSAE)

Sunn or Sunn Hemp (*Crotalaria juncea*)

Varieties in India

Growing Conditions

Harvesting and Yield

Retting
Washing and Stripping
Preparation of Hanks
Cleaning and Dressing
Grading
Cost of Production
Sunn Hemp in Ceylon
Properties and Uses of Sunn Hemp
Trade and Prices
Spanish Broom (*Spartium Junceum*)
Sesbanea Aculeata

8. STERCULIA FAMILY (STERCULIACEAE)

Abroma Augusta
Cultivation
Harvesting
Yields
Fibre Extraction
Properties of the Leaf

9. THE MECHANIZED PRODUCTION OF STEM FIBRES

Large Labour Requirements of Non Mechanized Production
Advantages of Mechanized Production
Harvesting Mechanically
Ribboning Machines
Problems of Ribboning
Drying
Retting
Washing
Costs of Mechanized Production

10. AGAVE FAMILY (AGAVACEAE)

Agave Species
Botany
Fibre Yields of Various Species
Breeding Experiments With Agave Species
Nature of the Fibres in the Agave Leaf
Sisal (*Agave Sisilana*)
Cultivation
Climate and Soil

Preparation of the Land
Planting
Fertilizers
Harvesting
Yields
Decortication and Decorticating Machines
Flume Tow
Structure of the Sisal Industry
Drying
Artificial Drying
Brushing
Grading
Baling
Labour Requirements for Sisal Production
Production in Other Countries
Properties of Sisal
Uses of Sisal
Trade
Henequen (*Agave fourcroydes*)
Cultivation
Harvesting
Decortication
Drying
Uses
Trade
Cantala (*Agave Cantala*)
Cultivation
Harvesting
Retting
Uses
Trade
Agave Letonae
Fibres from other Agave species

11. NARCISSUS FAMILY (AMARYLLIDACEAE)

Furcrea Species
Mauritius Hemp (*Furcrea Gigantea* Var. *Willemettiana*)
Yields
Extraction of the Fibre
Retting

Uses of the Fibre in Mauritius

Properties of the Fibre

Furcraea Gigantea

Furcraea Cabuya

Furcraea Macrophylla

Furcraea Andina

Furcraea Humboldtiana

Furcraea Cubensis

Curculigo Species

12. LILY FAMILY (LILIACEAE)

New Zealand Flax (*Phormium Tenax*)

Production of *Phormium* in New Zealand

Varieties

Propagation

Cultivation

Diseases, etc.

Harvesting

Stripping

Washing & Bleaching

Scutching

Baling and Grading

Advantages and Disadvantages of *Phormium* Production

Production and Costs

Phormium Tenax in Argentina

Phormium Tenax in South Africa

Phormium in Other Countries

Properties of *Phormium* Fibre

Trade

Sansevieria Species

Propagation and Cultivation

Lily Family (Liliaceae)

Extraction of the fibre

Production in Mexico

Other Countries

Yield

Properties

Yucca And Some Relatives

13. PINEAPPLE FAMILY (BROMELIACEAE)

Pineapple Fibre (*Ananas Comosus*)

Cultivation

Production in the Philippines

Production in Other Countries

Extraction by Machine

Pita Fibre or Silk Grass (*Aechmea magdalenae*)

Harvesting

Yield

Caroa Fibre (*Neoglazovia variegata*)

Fibre From Other Members of the Bromeliaceae

14. BANANA FAMILY (MUSACEAE)

Abaca or Manila Hemp (*Musa Textilis*)

Varieties

Cultivation

Propagation

Diseases and Pests

Harvesting

Extraction of the Fibre

Grading of the Fibre in the Philippines

Production of Abaca in Central America

Cost of Producing Abaca

Production in Borneo

Abaca in Malaya

Canton And Pacol Fibres

Properties of Abaca

Uses

Trade

Fibres From Other Species of *Musa* and a Related Genus

15. PALM FAMILY (PALMAE)

Coir or Coconut Fibre (*Cocos nucifera*)

Collection of Fruit

Removal of Husks

Retting

Production of Coir Yarn

Grading of Yarn

Costs of Production

Cost of production of Fibre and Yarn

Matting

Bristle or Coco Fibre
Dyeing of Coir Fibre
Mattress Fibre and Combings
Production of Coir Fibre in India
Production in the Philippines
Machine Extraction of Coir Fibre
Properties of Coir
Trade
Crin Vegetal (*Chamaerops humilis*)
Botany
Distribution
The Industry in Morocco
Extraction of the Fibre
Uses of the Fibre
Technical Characteristics
Trade
Tucum Fibre (*Bactris Setosa*)
Date Palm Fibre (*Phoenix Dactylifera*)
Dour Fibre (*Hyphaene Thebaica*)

16. BOMBAX FAMILY (BOMBACACEAE)

Kapok (*Ceiba Pentandra*)

Soils

Propagation

Yields

Harvesting

Hulling

Drying

Removal of Seeds

Baling

Kapok in India

Collection of the Floss

Preparation

Grading

Baling

Properties of Kapok Fibre

Uses of Kapok

17. MILKWEED FAMILY (ASCLEPIADACEAE)

Akund Floss (*Calotropis Procera* and *C. Gigantea*)

Yields

Preparation

Grading and Packing

Trade

Uses

Kendyr Fibre (*Apocynum Venetum*)

Asclepias Species

18. BRUSH MAKING FIBRES

Fibres Used in Earlier Times

Properties required in Brush Making Fibres

Bahia Piassava (*Attalea funifera*)

Botany and Germination

Collection and Preparation of the Fibre

Properties and Uses

Para Piassava (*Leopoldinia Piassaba*)

West African Piassava (*Raphia Hookeri* and *R. Graolis*)

Madagascar Piassava (*Vonitra Fibrosa*)

Mexican fibre (*Agave lecheguilla*)

Harvesting and Extraction of the Fibre

Cleaning and Grading

Uses

Jaumave Fibre (*Agave Funkiana*)

Coco Fibre (*Cocos Nucifera*)

Palmyra or Bassine Fibre (*Borassus Flabellifer*)

Kitool Fibre (*Caryota Urens*)

Gomuti Fibre (*Arenga Saccharifera*)

Broom Root (*Muhlenbergia Macroura*)

Italian Whisk (*Sorghum Vulgare*)

Palmetto Fibre (*Sabal Palmetto*)

19. PAPER MAKING FIBRES

Properties for Paper Making

Treatment for Conversion into Pulp

Wood

Esparto Grass

Collection from Wild Plants in North Africa

Production in Spain

Treatment and Uses

Straw

Bamboo
Bagasse
Other Materials

20. MISCELLANEOUS FIBRES

Toquilla (*Carludovica Palmata*)

Preparation For Making Panama Hats

Weaving and Bleaching

Alpinia Chinensis

Polygala Gomesiana And Other Sources or Rope, etc.

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
