### Modern Technology of Plastic Processing Industries (2nd Edition)

Code: NI22	Format: paperback
Indian Price: ₹975	US Price: \$100
<b>Pages:</b> 592	ISBN: 8186623426
Publisher: National Institute of Industrial Research	

# **Description**

Plastics are contemporary, synthetic materials. Plastics are oil and gas based, and consumes less than four per cent of our oil and gas reserves. Plastic in fact saves the energy it takes less energy to convert into plastic from raw materials. Throughout their whole life circle one-third less energy needs than making paper bags. Without plastic, whole packaging would take almost double energy by around 160 percent. The betterquality properties of plastics such as sanitized or germ free barrier properties, light weight, and durability contribute appreciably to our health and quality to way of life. The Plastic industry has been witnessing a continuous increase in demand from a long time attracting many towards it. To all those who are looking forward for a proper understanding of technology and methodology used in the plastic industries so that they could penetrate into plastics industries with a consideration of the current industry trend then this book provides you about certain very essential information about Plastic. PVC can be processed by all the conventional conversion processes as used for other thermoplastics but with some modifications. This book covers an intensive study of Current Trends in Conducting Polymers with a significant and detail explanation of thermosetting, thermoplastic material and products environment health and the future prospects.

The content of the book includes information about plastic and allied products equipped with latest technology. It also includes comprehensive information on the development of the sector and manufacturing process. The several chapters of the book contain information about: Processing of PVC, Applications of PVC and so on. The book also has chapter that will provide you with some very interesting, feasible and profitable plastic project profiles that will act as guide in proper understanding and analysis of the sector. Recent Developments in Plastics Extrusion and Environment Health and Future Prospects, Constructive use of HDPE, The Processing of Fibre Re-in

forced Thermo-

plastics Using Co-Rotating Twin Screw Extruders, Economical Film Extrusions with Modular Systems these are few chapters that are very informational and will help you in deep penetration of the industry. Along with these feature the book also encloses a directory section which list all major manufacturers of plastic processing machinery and raw material suppliers.

### **Content**

#### 1. Current Trends in Conducting Polymers

Introduction
Synthesis and Properties
Technological Applications
Electromagnetic Shielding Applications
Electrooptical Display Devices
Microelectronic Devices
Photovoltaic Devices
Sensors
Scope of Conducting polymers

#### 2. Thermosetting Plastics

Introuction
Kinds of Thermoset Plastics
Phenolic Resins
Resols and Novolaks
Acid and Base Catalysts
Solubility
Manufacturing of Phenolic Resins
Process (Novolak)
Application of Phenolic Resins
Brakelinings
Grinding Wheels (Abrasives)
Sand core bonding (Foundry)
Shellmoulds for metal castings
Wood waste boards
Impregnation

Adhesives (Plywood Glues)

**Surface Coatings** 

Oil Varnishes

Lamp capping cement

**Rubber Based Adhesives** 

**Rubber Compounds** 

Tackifier

**Aminoresins** 

Chemistry of the interaction of Urea and Formaldehyde

Methylol Ureas

Monomethylol Urea

Dimethylol Urea

U.F. Resin

Melamine-Formaldehyde Resin

Method of Manufacture

Applications of Aminoplastic Mouldings

Other Industrial Applications

The Laminating Process

Melamine Resin Adhesives

Use of Wet Strength Paper

**Coating Applications** 

The preparation of Butylated Amino resins

# 3. Indian plastic industry : Present Status and Future

**Prospects** 

Market perceptions

Indian plastic industry's growth

Choice of polymers

Small market and large capacity

Factors governing the performance of Indian polymer plastic Industry

The Pragmatic policy

Government's responsibility

#### 4. Compounding of PVC

Introduction

**Elements of Compounding** 

Methods of Compounding

Intensive Dry Mixers

Internal Intensive Batch Mixers

Continuous Mixer

Two-Roll Mills

Single-Screw Extruders

Compounder-Extruder

Twin-Screw Extruder

Custom compounding for special properties

General guidelines for PVC formulations for common product

#### 5. Processing of PVC

Introduction

**PVC Resins** 

Molecular Weight

Injection Moulding

Additives for improving processing

Low Shear Horizontal Mixers (Ribbon Blenders)

Higher Shear Vertical Non-fluxing Mixer

**Dry Blend Properties** 

Low Shear and High Shear Mixing in Horizontal,

Jacketed Cylinderical Blenders

Hot Melt Compounding

Two Stage (Farrel) Continous High Intensity Fluxing Mixers

Compounding Lines-Batch Type

Suggested K-Value of PVC Resins

Influence of Formulation on Processing Behaviour

Relation of Polymer K-Values with Threshold Temperature

#### 6. Applications of PVC

World of PVC Applications

Rigid PVC Pipes

Advantages of Rigid PVC Pipes

Chemical Resistance

Flow through Rigid PVC Pipes

Flow or Friction Losses

Manufacturing of PVC Sheet

**Extrusion PVC Sheets** 

Extrusion Blowing of PVC Sheets

Calandrette Process

Processing of Sheets by Forming

Requirements of PVC Sheets

Blister Packaging

Vacuum Formed Products

Skin Packaging

Typical Blister Packaging Applications

Non-Packaging Application

Tropicalised Blister Pack-A New Concept

Rigid PVC Free Foam Board

**PVC Integral Foam Sheets** 

Blow Moulded Bottles and Containers

Pet vis-a-vis PVC Stretched Bottles

Blow Moulding of PVC Bottles

Injection Blow Moulding

Cushioned Vinyl Flooring

The Screen Coating System: Advantages

One Pass Production

Double-sided Coating of Open-Weave Fabrics

**PVC** in Medical Application

Moulding of PVC Footwear

# 7. Improving Moulding Through Melt-flow Oscillation

Orientation effects in molding technology : Orientation versus relaxation

How Does Rheomolding Work?

Melt-flow oscillation improves properties

# 8. Basic Information and Identification of Plastics

**Development of Plastic Materials** 

#### 9. Classification of Plastics

Thermoplastic Resins
Thermosetting Resins
Identification of Plastics

#### 10. Compounding Resins

Design and cost of a compound

**Fillers** 

**Plasticizers** 

Colourants

Role of Plastics

More Resins for Packaging

#### 11. Common Plastic Resins

Production of PVC (Poly Vinyl Chloride)

Manufacturing Process of PVC

**PVC Films** 

Applications of PVC Films

**PVC Bottles** 

Rigid PVC Pipes

Low Density Polyethylene (LDPE)

Polyethylene Production from Petroleum/Natural Gas

LDPE Resins

Linear Low Density Polyethylene

Retrofitting LDPE Plant

Comparison of LLDPE with Conventional LDPE

Applications of LLDPE

High Density Polythylene

Injection Moulding

**Blow Moulding** 

Polypropylene

Polyster

Polystyrene

Injection Moulding

**Compression Moulding** 

**Transfer Moulding** 

Jet Moulding

**Blow Moulding** 

Injection Blow Moulding

Reinforced Moulding

Flat Sheet and Film Extrusion

Characteristics of Polystyrene

Nylon Polyurethane Phenol Formaldehyde Resins Epoxy Resins

#### 12. Decoration of Plastics

Dyeing
Electro-Plating
Flock Coating
Hot-Stamping
In Mould Decoration
Painting
Printing
Vacuum Metallizing

#### 13. Plastic Applications

Uses in Agriculture
Automobile
Building
Defence
Medical
Textile Industry
Packaging
Chemical Industry
Main Uses of Plastics in Agriculture Polyethylene

#### 14. Plastic Waste and its Reprocessing

Definitions Regarding Plastic Waste Generation of Industrial Plastic Wastes

#### 15. Plastic Welding and Sealing

Introduction for Plastic Welding Introduction for Heat Sealing Heat Welding Hot Gas Welding Heated Tool Welding
Induction Welding
Spin Welding
Advantages
Disadvantages
Ultra Sonic Welding Characteristics of Plastics

#### 16. Plastic Technology

Thermoplastic Material
Thermosetting Plastics
Plastic Foam
Compounding of Plastics

#### 17. Plastic Products

Introduction
Material Considerations
Design Considerations
Viscoelasticity
Formation of Crack
Reinforcements
Characteristics of Plastics
Shrinkage
General Design Principles

#### 18. Recent Developments in Plastics Extrusion

Blown Films
Haul-Off
Compounding and Masterbatch
Multilayers Co-Extruded Film
Blown Coextrusion
Equipment for Blown Coex Films

#### 19. Polymer Powders and Coatings

Introduction
Coating Powders
Characteristics of Thermosetting Powder Coatings

## Powder Coating Machinery Suppliers Electrostatic Powder Suppliers

#### 20. Roto Moulding and Cost of Polymers

#### 21. Polymer Blend, Fibre and composite

Polymer Blends
Composites
Laminar Composites
Particulate Composites
Fibres

#### 22. Polypropylene applications in automobiles

**Plastics Consumption** 

#### 23. Recovery of Chemicals from Plastic Waste

Plastic Degradation
Modes of Poloymer Degradation
Thermal Degradation
Mechanical Degradation
Photo Degradation
Bio-Degradation
Chemical Degradation
Solvolysis
Mineral Oil as Suspending Medium
Glycerolysis of Waste
ICI, Mitsubishi Rayon Link for Acrylic Recycling Techniques

### 24. Environment Health and Future Prospects

Hazardous Effects of Plastics
Air Pollution
Safety Measures
Product Safety
Future Prospects
Improving Working Conditions and the Environment
Technology Transfer and Development

#### 25. Recycling Polyester Resins

Pet and Apet

**RPET** 

**PETG** 

**CPET** 

**Chemical Reduction** 

Process Route of Michigan Technology University

#### 26. Constructive use of HDPE

Characteristics

**HDPE Pipe System** 

Jointing Techniques

**HDPE Pipes Versus Other Materials** 

Submarine Pipelines

Relining-New Pipes in Old

**Sewer Pipes** 

Slurry Transportation

**Irrigation** 

**Domestics Gas Distribution** 

Chemical Process Piping

# 27. Extrusion of Cast Film, Thermoforming Film and Sheet

Features and Applications

Thermoforming Film

Production System and Line Concepts

Thermoforming Film Line

**Sheet Extrusion Lines** 

Improvements in Machine Sectors

Re-Use of Extrusion Scrap

Automation

**Development Trends** 

## 28. The Processing of Fiber Re-inforced Thermoplastics Using Co-Rotating Twin Screw Extruders

Introduction
Experimental Apparatus and Procedure
Results and Discussion

29. Economical Film Extrusions with Modular Systems

Modular Design Concept from Resin Feeding to the Win Engineering Innovations for blown film systems
Gravimetric resin feeding systems
Extruders with a forced conveying feed section
Blown film dies further Improved
Automatic die also for barrier films
Automated downstream equipment
Flexibly expandable: modularly designed oscillating hau
Modular winders for all types of film
Modular automation provides flexibility for
both film manufacturers and users
Remote diagnosis enhances system availability
Information system completes the automation concept
Modular automated extrusion lines enhance productivity

#### 30. Appendices

- I. Formula for Calculations
- II. Pigment Formulations for Dry Colouring Unplasticized Plastic
- III. Recommended Use of Lubricants
- IV. General Properties of Plastics
- V. BIS Specifications on Plastics
- VI. Drilling Thermoplastics
- VII. Turning Characteristics of Thermoplastics
- VIII. Machining of Plastic Sawing of Plastics
- IX. A Genral Guide to Suitable Speeds and Feeds
- 31. Profiles
- 32. Raw Material Suppliers for Plastic and Plastic Products
- 33. MANUFACTURERS OF PLASTIC PROCESSING MACHINERY

# **About NIIR Project Consultancy Services (NPCS)**

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Prefeasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
