The Complete Book on Adhesives, Glues & Resins Technology (with Process & Formulations) 2nd Revised Edition

Code: NI185	Format: paperback
Indian Price: ₹1675	US Price: \$150
Pages: 616	ISBN: 9788178331614
Publisher: Asia Pacific Business Press Inc.	

Description

An adhesive is a material used for holding two surfaces together. In the service condition that way adhesives can be called as “Social” as they unite individual parts creating a whole. A useful way to classify adhesives is by the way they react chemically after they have been applied to the surfaces to be joined. There is a huge range of adhesives, and one appropriate for the materials being joined must be chosen. Gums and resins are polymeric compounds and manufactured by synthetic routes. Gums and resins largely used in water or other solvent soluble form for providing special properties to some formulations. More than 95% of total adhesive used worldwide are based on synthetic resins. Gums and resins have wide industrial applications. They are used in manufacture of lacquers, printing inks, varnishes, paints, textiles, cosmetics, food and other industries.

Increase in disposable income levels, rising GDP and booming retail markets are propelling growth in packaging and flexible packaging industry. Growth of disposable products is expected to increase, which leads to increase in consumption of adhesives in packaging industry. The global value of adhesive resins market is estimated to be \$11,339.66 million and is projected to grow at a CAGR of about 4.88% in coming years. Rapid urbanization coupled with growing infrastructure and real estate construction projects is projected to further fuel demand for adhesives in India.

This handbook covers photographs of plant & machinery with supplier's contact details and manufacturing aspects of various adhesives, glues & resins. The major contents of the book are glues of animal origin, fish glues, animal glues, casein glues & adhesives,

blood albumen glues, amino resin adhesives, cyanoacrylate adhesives, epoxy resin adhesives, phenolic resin adhesives, polychloroprene resin adhesives, polysulfide sealants & adhesives, resorcinolic adhesives, furan resin adhesives, lignin adhesives, polyamide adhesives, rosin adhesive, tannin adhesives, terpene based adhesives, starch adhesives, acrylic adhesives and sealants, pressure sensitive adhesives, hot melt adhesives, alkyd resins, acrylic modified alkyd resins, alkyd -amino combinations based on neem oil, amino resins, carbohydrate modified phenol- formaldehyde resins, epoxy resins etc.

It will be a standard reference book for professionals, entrepreneurs, those studying and researching in this important area and others interested in the field of adhesives, glues & resins technology.

Content

ADHESIVES

1. Glues of Animal Origin

Properties

Methods of Manufacture

Commercial Grades and Specifications

Methods of Analysis

Sampling

Procedure

Identification

Physical Measurements

Determination of Other Constituents

2. Fish Glues

Introduction

Manufacturing Process

Properties

Applications & Formulations

Rubber-to-Steel

Strawboard-to-Steel

Rubber-or Cork-to-Plywood

Paper-to-Steel

Straight Line Gluing

3. Animal Glues

Introduction

Chemical Composition
Manufacture of Animal Glues
Properties
Liquid Animal Glues
Formulation & Applications
Methods of Application

4. Casein Glues and Adhesives

Introduction
Properties
Casein Blend Glues
Lime free Casein Adhesives
Applications
Casein Adhesives for Bonding Paper
Casein Adhesive for Binding Dissimilar Materials

5. Blood Albumen Glues

Introduction
Solubility Categories
Properties
Blood-Soybean Flour Combinations
Mold Resistance
Application

6. Amino Resin Adhesives

Introduction
Manufacturing Technology
Urea Adhesive for Plywood
Urea Adhesive for Particle Board
Spray Dried Melamine-formaldehyde Resins
Foundry Resin

Aniline-Formaldehyde Resin

Ø Represents benzene ring

Sulfonamide-Formaldehyde Resins

Applications

Adhesives for Hardwood Plywood

Sand Core Binder

Water Proof Corrugated Board

Compounding and Formulation

7. Cyanoacrylate Adhesives

Introduction

Bonding with Cyanoacrylates

Adhesive Properties

Applications

8. Epoxy Resin Adhesives

Introduction

Chemistry

Epoxy Novolac Resins

Flexible Epoxy Resins

Epoxidized Olefins

Speciality Epoxy Resins & Derivatives

Epoxy Esters of Rosin

Epoxy Esters of Styrenated Rosin

Epoxy Esters of Disproportionated Rosin

Epoxy Novolac Esters

Epoxy Ester of Maleopimaric Acid

Compounding

Curing Agents

Diluents

Modifiers

Flexibilizers

Fillers

Accelerators

Speciality Additives

Manufacture of Adhesives

9. Phenolic Resin Adhesives

Introduction

Resole resin

Novalac Resins

Manufacture

Applications and Formulations

Contact Adhesives

Adhesive Compounding

Nitrile/Phenolic Contact Adhesives

Structural Adhesives

Vinyl/Phenolic

Epoxy/Phenolic

Hot Melt Adhesives

Hot Melt Vinyl Film to Wood Laminating Adhesives

Pressure Sensitive Adhesives (PSA)

10. Polychloroprene Resin Adhesives

Introduction

Types of Polychloroprene

Applications and Formulations

Applications

11. Polyester Resin Adhesives

Introduction

Linear Polycarbonates

Polymerized Oils

Alkyd Resins

Unsaturated Polyester Adhesives

Adhesives for Flexible Printed Circuit

Allyl Ester Adhesives

12. Polyethyleneimine in Adhesives

Introduction

Applications

General Adhesives

Tie Coat Adhesives

13. Polysulfide Sealants and Adhesives

Introduction

Polysulfide Sealants

Chemistry

Compounding

Curing Agent

Retarder

Reinforcement

Adhesion Additives

Primers

Improved Heat Resistance

Applications

Adhesives from Polysulfide Liquid Polymer

Epoxy Resin Reactions

14. Resorcinolic Adhesives

Introduction

Resorcinol-Phenol Formaldehyde Resins

Modified Resorcinol Resins

Aspects of Adhesion Mechanism

Formulation of Glue Mixtures

Laminating

15. Ethylene Copolymer Hot Melt Adhesives

Introduction

Crystallinity

Compatibility

Pressure Sensitive Tack

Hot Melt Adhesive Formulating

Book Binding Adhesives

Carton and Case Sealing Adhesives

Carpet Application

Shoe Adhesives

Pressure Sensitive Adhesives (PSA)

Furniture Adhesives

16. Furan Resin Adhesives

Introduction

17. Isocyanate Adhesives

Introduction

Advantages of Isocyanate Adhesives

Disadvantages of Isocyanates

Applications

Types and uses of Isocyanate based Adhesive System

18. Lignin Adhesives

Introduction

Formulations

19. Polyamide Adhesives

Introduction

Class I: Thermoset Adhesives Containing Liquid

Polyamide Curing Adhesives

Class II: Nylon-Epoxy Resins

Class III: Thermoplastic Hot Melt Polyamide Adhesives

Class IV: Thermoplastic-Thermoset Adhesives

20. Polyimide Adhesives

Introduction

Adhesive and Bonding Technology

Foam System

21. Rosin Adhesives

Introduction

Applications

Formulations

Solvent Adhesives

Emulsion Adhesives

Hot Melt Adhesives

Methods of manufacture

22. Silicone Adhesives and Sealants

Introduction
Chemistry
Oxime silane
Properties
Rheological Characteristics
Thermal Stability
Weathering Characteristics
Adhesion Characteristics
Applications

Industrial

Construction

23. Tannin Adhesives

Introduction

Formulation

24. Terpene Based Adhesives

Introduction

Chemistry

Beta-pinene resins

Dipentene resins

Alpha-pinene resins

Physical characteristics of resins

Pressure sensitive adhesives

Hot melt adhesives

Analytical methods

Commercial resins and their uses

Commercial production

Applications in pressure sensitive adhesives

Applications in hot melt adhesives

25. Starch Adhesives

Introduction

Unmodified Starches

High Strength Adhesive

Cheap Diluted Adhesive

Non-weather Proof Corrugated Board Adhesive

Water Resistant Corrugated Paper Box Adhesive

Final Mixture

Acid Modified or Thin Boiling Starch Adhesive

Oxidised Starch Adhesives

Dextrin Based Adhesives

Properties

26. Acrylic Adhesives and Sealants

Polymerization

Solution Polymerization

Properties of the product

Emulsion polymerization

Properties of the dispersion

Properties

Formulations and Applications

Adhesives to paper coated with PVDC

Delayed tack adhesive

Adhesives for Laminating

Laminating Plasticized PVC film to textiles

Laminating PVC film to particle board

Laminating plasticized PVC film to split leather

High temperature & pressure lamination

Flocking Adhesives

Building Adhesives

Adhesives for plasticized PVC floor tiles

Adhesives for ceramic tiles

Pressure-Sensitive Adhesives

Flame Resistant & Pressure Sensitive Adhesive

Acrylic Sealants

Aqueous Acrylic Sealants

Solvent-Based Acrylic Sealants

27. Pressure Sensitive Adhesives

Adhesive Strip for Automotive Trim

Eva-Trialkyl Cyanurate Copolymer Adhesive

Carboxylate Polymer Based Adhesives

Fumaric Diester Vinyl Acetate Polymer

28. Hot melt Adhesives

Introduction

Advantages

Disadvantage

Formulations

Ethylene-vinyl Acetate

Amorphous polypropylene and Petroleum Resin

Isopropenyltoluene Copolymers as Tackifiers

Chlorinated Polyphenyl, Chlorinated

Polyisoprene and Nitroso Compound

Carpet Backing Formulation

Other Polyolefin Compositions

Amorphous Polyolefin and Styrene Butadiene

Block Copolymers

α -Methylstyrene Tert Butyl Styreneolefin terpolymers

Alkoxystyrene-Acrylonitrile, Copolymers

Boric Acid as Viscosity Stabiliser in Ethylene-

Propylene Adhesives

Thermoplastic Polymer and Chelate of Aminoacetic
Acid

Coal Tar Pitch and Ethylene-Acrylic-Acid Copolymer

Water-Moistenable Vinyl Pyrrolidone-Vinylacetate
Product

RESINS

1. Alkyd Resins

Introduction

Classification

Synthesis

Etherification

Addition reactions of unsaturated monobasic
fatty acids

Addition reactions with other unsaturated alkyd
ingredients

Reactions during coating formation with drying
alkyds

Reactions during coating formation in alkyd blends

Raw materials

Manufacture

Health and Safety

Quality Control and Specifications

Analysis

Calculations

Uses

Use of Alkyds in Trade-Sales Finishes

Methods of Analysis

Determination of Composition

Chemical Methods

Determination of Properties and Impurities

2. Acrylic Modified Alkyd Resins

Traffic paints

Industrial applications

Conclusion

3. Alkyd-Amino Combinations Based on Neem Oil

Aim of present investigation

Uses of oils in surface coatings

Neem oil

Alkyd resins

Amino resins

Experiments & Results

Preparation of alkyd resin

Alkyd resin preparation

Preparation of amino resin

Testing of performances of resin samples

Discussion

Analysis of neem oil

Preparation of alkyd from neem oil

Preparation of urea formaldehyde resin

Preparation of thiourea formaldehyde resin

Preparation of various samples (mixtures)

Performances of various resin samples

Scratch hardness

Conclusion

4. Amino Resins

Introduction

Raw materials

Chemistry of resin formation

Typical resin formulations and techniques

Urea formaldehyde resins

High solids urea-formaldehyde adhesive resin

Protective coating resin with high mineral spirits tolerance

Methylated urea formaldehyde textile resins

Urea-formaldehyde particle board adhesive

Melamine-formaldehyde resins

Butylated melamine protective coating resin

Chlorine resistant melamine resin

Trimethoxymethyl melamine

Hexamethoxymethyl melamine

Melamine resin molding powder

Melamine resin acid colloid

Control of the extent of the reaction

Free formaldehyde estimation
Viscosity tests
Solubility tests
Cure tests
Urea versus melamine resins
Package stability
Competitive product analysis
Chemical modification for water soluble products
Chemical modification for oil soluble products
Ethyleneurea
Methylated uron textile resins
Uron resins
Glyoxal resins
Miscellaneous resins
Amino resins in the paper industry
Formulations for regular and HE colloids
Toxicity
Methods of Analysis
Competitive Product Analysis
 5. Carbohydrate Modified Phenol-formaldehyde
 Resins
 Introduction
 Research on Carbohydrate Modified Resins
 Carbohydrate-Modified Base-Catalyzed PF resins
 Bonding Veneer Panels
 Bonding Flakeboard Panels
 Carbohydrate-Modified PF Resins Cured at
 Neutral Conditions
 Bonding Veneer Panels
 Color of Bondline
 Conclusions
6. Epoxy Resins
 Introduction
 Synthesis of Resin Intermediates
 Cycloaliphatic epoxies
 Epoxidized polyolefins
 Epoxidised oils and fatty acid esters
 Aliphatic-cycloaliphatic glycidyl type resins
 Epoxy novolac resins
 Resins from phenols other than bisphenol A

Resins from aliphatic polyols
Resins from long chain acids
Fluorinated epoxy resins
Epoxy resins from methylepichlorohydrin
Miscellaneous epoxy resins
Epoxy esters
Water borne epoxy resins and derivatives
Diluents and modifiers
Epoxide reactions and curing mechanisms
Curing of epoxy esters
7. Photographs of Plant & Machinery with Supplier's Contact Details

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
