Woollen Spinning, Weaving, Knitting, Dyeing, Bleaching and Printing Technology Handbook

Code: NI215	Format: paperback
Indian Price: ₹1100	US Price: \$125
Pages: 496	ISBN: 9788178331171
Publisher: Asia Pacific Business Press Inc.	

Description

Spinning is a major industry; it is part of the textile manufacturing process where three types of fibre are converted into yarn, then fabric, then textiles. The textiles are then fabricated into clothes or other artifacts. The fundamental operations for the stocks of fibers from which a woollen yarn is made are opening, cleaning, mixing, forming a slubbing or roving and finally thinning the roving to the required yarn number and twisting it to produce a yarn possessing the requirements for subsequent processing such as warping, winding, weaving, finishing and dyeing. These demands vary with the different conditions confronted in manufacturing but include the following features: strength, elasticity, uniformity in weight per unit length and even distribution of twist. Woollen spinning involves three principal operations, irrespective of whether the mule or the frame or ring spinner is used, namely: Drafting, final drawing out, Twisting, or insertion of twist, Winding on, or packaging. Weaving constitutes the actual production of cloth or fabric, i.e., to combine the essentially one dimensional textile structure thread or yarn in such a way as to result in an essentially two dimensional structure of cloth of certain appearance, hand and strength. Knitting is the art and science of constructing a fabric by inter lacing loops, there are two types of knitting: warp and weft knitting. In recent years whole new classes of dyes such as fiber reactive, disperse, cationic basic, neutral dying premetalized have been discovered and produced for the dyeing of the natural and new synthetic, hydrophobic fibers. Bleaching improves whiteness by removing natural coloration and remaining trace impurities from the cotton; the degree of bleaching necessary is determined by the required whiteness and absorbency. Cotton being a vegetable fibre will be bleached using an oxidizing agent, such as dilute sodium hypochlorite or dilute hydrogen

peroxide. If the fabric is to be dyed a deep shade, then lower levels of bleaching are acceptable, for example. However, for white bed sheetings and medical applications, the highest levels of whiteness and absorbency are essential. Wool fiber production technology necessitates full understanding of its growth, pristine structure, physical, chemical and functional properties as well as processes involving manufacture of textile fibers.

Some of the fundamentals of the book are woollen spinning, atmospheric conditions in wool manufacturing, Bradford system top gilling or top finishing, the principle of weaving, woollen and worsted weaves, knitting, the changing outlook of the knitting industry, influence of fiber fineness on quantity of dye required, altering the affinity of the wool fiber for dyes, dyeing of yarn according to the packing system, special wool finishes, water repellent, stain resistant treatments for worsted and woollen fabrics, the printing of wool piece goods, lustering of wool fabrics, fluorochemicals, mothproofing etc.

The present book is of its own kind which covers woollen spinning; knitting, dyeing, bleaching and printing, special wool finishes etc. This is an important reference book for wool technologists, scientists, new entrepreneurs, research scholars and all others related to this field.

Content

1. WOOLLEN SPINNING

Mule Spinning

The Self-acting Mule

The Operations of Mule Spinning

General Mechanical Details

Production of a Mule

Standspinner

Woollen Ring Frame Spinning

Reduced Balloon“Balloonless Spinning

Main Technical Data

Twisting or Yarn Folding

Woollen Yarn Calculations

Woollen Yarns

Yarn Number and Wool Grade

Yarn Strength

Wool Blends with Man-made Fibers

Atmospheric Conditions in Wool Manufacturing

2. WORSTED TOPMAKING

Worsted Carding
Geelong Converter
Backwashing
Dryers
Top Steaming and Aging
Oiling
Gilling or Preparing
Worsted Combing
Combs and Combing
Bradford Worsted Combing
Principle of Combing
Punch or Ball Winding
Operation of the Noble Comb
Parts of the Noble Comb
Production of Noble Comb
Control of Noble Combing
Bradford System Top Gilling or Top Finishing
Can Gillbox or Conditioner
Top Gillbox or Top Baller
French Worsted Combing
Working Principle of the French Comb
French Finish Gilling
Noils
Amount and Type of Noils
Tow-to-Top Conversion Systems
Strech-breaking Methods
Cutting Methods
3. THE PRINCIPLE OF WEAVING
The Essential Motions of a Loom
Details of Principal Components of Weaving Machinery
Shedding or Harness Motion
Let-off Motion
The Take-up Motion
Full Width Temples
Picking Motion
The Shuttle
Automatic Stop Motions and Controls
Warp Stop Motions
Weft Stop Motion
Protection Stop Motions

Weft Pirn Feeler Devices

Box Motion

Automatic Filling Replenishment and Multi-colour Weaving

Box Loader System

Unifil

Pirnless Weaving

The Sulzer Weaving Machine

Other Development in Weaving Machines

4. WOOLLEN AND WORSTED WEAVES

Methods of Describing Weaves

Use of Design Paper

The Plain Weave

Derivatives of the Plain Weave

The Twill Weave

Balanced or Even Twills

Effect of Yarn Twist on Twill

Steep and Reclining Twills

Pointed and Herringbone Twills

Broken or Reversed Twills

Corkscrew Twills

Inter-locking and Offset Twills

Undulating Twills

Diversified, Combination, and Fancy Twills

The Satin Weave

The Crepe Weaves

The Bedford and other Corded Weaves

Backed and Double Cloths

Filling-backed Cloths

Warp-backed Cloths

Double Cloths

Montagnacs, Chinchillas, and Felts

Triple Cloths

Plushes and Velvets

Filling Plushes

Warp Plushes

Practical Fundamentals of Fabrication and Design

Construction in Commercial Fabrics

Maximum Textures of Special Type of Fabrics

Relative Constructions of New Fabrics

5. KNITTING

Principles of Stitch Formation
Weft Knitting Machines
Plain, Rib, and Purl Stitches
Tuck and Miss Stitch Fabrics
Special Knitted Fabric Design Effects
The Changing Outlook of the Knitting Industry

6. DYEING, BLEACHING AND PRINTING

Modern Dyestuffs
Designation of Dyes
Trade Names
Letter Designations
Abbreviations and Percentages
Index Numbers
Theory of Dyeing
Wool Dyes
Acid Dyes
Chrome dyes
Metal-complex Dyes
Metal-complex Dyes
Vat Dyes
Solubilized Vat Dyes
Reactive Dyes
Influence of Fiber Fineness on Quantity of Dye Required
Some Sources of Faulty Dyeing
Tippy Dyeing
Scouring
Wetting Out
Mixed Stocks
Carbonizing and Neutralizing
Sun-bleached Yarns and Fabrics
Lime in Pulled Wools
Effects of Faulty Steaming
Matching Shades
Conditioning Samples before Matching
Feeding Dyes
Ring Dyeing
Excessive Crocking
Chlorinated Wool
Metal Contaminants
Stripping Dyed Wool

Abrasion Marks
Boiler Compounds
Machine and Spinning Oils
The Matching of Shades
Matching and Shade Control by Instruments
Low Temperature Dyeing
Irga Solvent Process
Collins Process
C.S.T.R.O. Process
Chrome Dyes
Acid Milling and 1:1 Metal-complex Dyes
Reactive Dyes
The Dyeing of Wool at High Temperatures
Ultrasonic Dyeing
Pad Dyeing Methods
Cibaphasol Technique
Irga Pad Process
C.S.I.R.O. Methods
Altering the Affinity of the Wool Fiber for Dyes
Decreasing the Affinity of Wool for Dyes
Increasing the Affinity of Wool for Dyes
Bicoloured Tippy Dyeing
Dyeing Wool Mixtures
Wool and Silk Mixtures
Wool and Vegetable Fiber Mixtures
Wool and Man-made Fiber Mixtures
Wool Dyeing Machinery
Construction of Dyeing Machines
Loose-stock Dyeing Machinery
Top or Slubbing Dyeing Machinery
Pot or Can Dyeing Machinery
Continuous Top Dyeing
The Machine Built by Fleissner
Segardâ€™Serracant Tunnel Equipment
Ilma Range
Konrad Peter Range
General Experiences
Yarn-dyeing Machinery
Dyeing of Yarn According to the Packing System
Dyeing of Yarn According to the Hanging System

Dyeing of Yarn According to the Spindle System

Machines for Drying of the Dyed Materials

Hank Dryers

Piece-dyeing Machinery

Jet Dyeing Machines

Beam Dyeing

The Pad-roll Piece Dyeing Machine

Continuous Woollen Piece Dyeing

Bleaching Wool

Hydrogen Peroxide Bleach

Peroxide "Dye-in" Bleach

Hydrosulfite Bleach

Double Bleach

Continuous Process

Potassium Permanganate Bleach

Bisulfite Bleach

Sodium Chlorite Bleach

Optical Bleaching Wool

Bleaching and Dyeing in One Bath

Effect of Stabilizers

Anti-yellowing Treatment

Vigoureux or Melange Printing

The Printing of Wool Piece Goods

Pretreatment

Acid Dyes

Basic Dyes

Direct Dyes

Vat Dyes

Soluble Vat Dyes

Oxidation Colours

Spray Printing

7. SPECIAL WOOL FINISHES

Introduction

Flat Setting

Setting with Monoethanolamine Sulfite Solutions

Permanent Press

Lustering of Wool Fabrics

Luster on Pile Fabrics

Mechanism

Luster on Clear Finished Worsteds

Stretch Fabrics

Stretch Yarns

Inducing Yarn Crimp during Weaving

Yarn Crimp Development, Interchange and Chemical Setting

Finishing Helanca Ski Cloth

Water Repellent, Stain Resistant Treatments for Worsted and Woollen Fabrics

Silicones

Chromium Compounds

Fluorochemicals

Mothproofing

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
