The Complete Technology Book on Starch and Its Derivatives

Code: NI81	Format: paperback
Indian Price: ₹1100	US Price: \$125
Pages: 540	ISBN: 8178330733
Publisher: Asia Pacific Business Press Inc.	

Description

Starch is a group of poly saccharides, composed of glucopyranose units joined together by glucosidic linkages. Starch is also metabolized for energy in plants and animals, and is used to produce a large number of industrial products. Starch is processed to produce many of the sugars in processed foods. The biggest industrial non food use of starch is as adhesive in the paper making process. Other important fields of starch application are textiles, cosmetic and pharmaceutical uses. Starch can be obtained from maize, sorghum, roots and tubers such as tapioca, arrow root, potatoes etc. Starch truly serves as a multifunctional ingredient in the food industry. Starch is one of the most present biomaterials has witnessed significant developments over the years. By products are obtained in the manufacture of different types of starch such as maize gluten has a number of interesting possible uses in industry, zein (by product of corn processing) is used in the preparation of stable glass like plastics, modification of zein is used as adhesives and in the preparation of coating compositions for paper, the most important by product from wheat starch manufacture is gluten which is used in preparing diabetic foods, for feeding cattle, thickening agent in textile printing and so on. The Global starch market is likely to get respite from deceleration in its market growth, with growth poised to receive a new lease of life in the next few years.

This book basically illustrates about the properties, structures, manufacturing process explained with flowcharts and diagrams, applications of starch and its derivatives etc. The major contents of the book are structure and chemical properties of starch, chemical composition, molecular structure, starch granule properties, water sorption and granule swelling as a function of relative humidity, factors affecting starch paste properties, the oxidation of starch etc.

This is a unique book, concise, up to date resource offering a valuable presentation of the subject. This book contains processes of starch and its derivatives. This book is an invaluable resource for new entrepreneurs, industrialists, consultants, libraries.

Content

1. Structure and Chemical Properties of Starch

Structure and Properties

Chemical Composition

Molecular Structure

Starch Granule Properties

Water Sorption and Granule Swelling as a

Function of Relative Humidity

Factors Affecting Starch Paste Properties

2. The Swelling And Gelatinisation of Starch

The Swelling of Starch

The Gelatinisation of Starch

The Use of Swelling Agents to Study Gelatinisation

Methods of Following the Course of

Gelatinisation of Starch : Optical Methods

Methods Depending on Viscosity

The Effect of Injury to Starch Granules before

Gelatinisation on the Properties of the Pastes

Viscosity and Structure

The Rigidity of Starch Pastes

3. The Role of the Minor Constituents of Starch

The Role of Phosphorus in Starch

The Formation of 'Werner Complexes'

The Adsorption Theory

The Amylophosphoric Acid Theory

The Significance of Nitrogen in Starch

The Coacervation Theory

Fatty Acids Present in Certain Starches

Other Acids Present in Starch as Esters

4. The Retrogradation of Starch

'Retrogradation' of Starch by Freezing

'Retrogradation' by Solvents

Monomolecular Dispersion

Complete Retrogradation

The Explanation of Retrogradation
Practical Significance of Retrogradation in Industry
The Prevention of Retrogradation
Reactions with Formaldehyde
5. Starch and the Hydrogen Bond
6. The Reaction of Starch with Iodine
The Effect of Heat
Sensitivity of the Reaction
An Abnormal Starch-Iodide Reaction
The Composition of Starch Iodide
Use of Starch Iodide
The Starch-Iodide Reaction in the Spectro-photometric
Determination of Starch
7. Root Starches
Manufacture of Potato Starch
Refining the Starch
Drying the Starch
Some Difficulties Occurring in the Manufacture of Potato Starch
Cassava Starch or Brazilian Arrowroot
The Manufacture of Sweet-Potato Starch
8. Cereal Starches
The Manufacture of Wheat Starch
Manufacture of Maize Starch
Early Process. Extracting the Starch
Treating the Starch
Drying
Modern Process
Rice Starch
9. The Oxidation of Starch
OXIDATION OF STARCH IN ACID MEDIA
Oxidation by Nitric Acid
Oxidation by Ammonium Nitrate
Oxidation by Chromic Acid
Oxidation by Permanganates
Oxidation by Hydrogen Peroxide
Oxidation by Halogens
Oxidation by Oxy-halogen Acids
Oxidation by other Per-compounds
Oxidation by Oxides in Acid Solution
Oxidation by Irradiation

Oxidation by Air in Acid Solution

Oxidation by Ozone

OXIDATION OF STARCH IN ALKALINE MEDIA

Oxidation by Hypohalites

Oxidation by Alkaline Chlorite

Oxidation by Alkaline Aktivin

Oxidation by Alkaline Permanganates

Oxidation by Alkaline Peroxides

Oxidation by Air in Alkaline Solution

Electrolytic Oxidation

Oxidation by Alkaline Mercuric Oxide

Oxidation by Alkaline Persulphates

OXIDATION OF STARCH IN NEUTRAL MEDIA

Oxidation by Bromine

Oxidation by Iodine

10. Glucose and Maltose

The Manufacture of Glucose

Raw Materials

Earlier Process

The More Recent Process

The Crystalline Forms of Anhydrous Dextrose and
Dextrose Hydrate

Producing Anhydrous Dextrose

Uses of Glucose

The Manufacture of Maltose

11. Ethyl Alcohol and Acetone

The Manufacture of Ethyl Alcohol

The Amylo Process

The Production of Acetone

12. Dextrin and British Gums

Methods of Manufacture

Raw Materials

The Choice of Acid

Pre-treatment of Starch before Torrification

Main Steps in Dextrin Manufacture

Addition of Catalyst

Maturing the Starch

Drying the Starch before Roasting

The Roasting Process

Cooling and Re-moistening the Dextrin

Grinding and Bagging-off Operations
Conversion of Starch to Dextrin by the Wet Process
Acid Conversion in the Wet Process
The Conversion using Enzymes
13. Modified Starches
Physical Treatment to Modify Starch
14. Adhesives from Starch and Dextrin
Purpose and Applicability
The Application of Adhesives
Theoretical Considerations
Flour Pastes
Adhesives from Starch
Treatment with Caustic Alkalies
Treatment with other Alkaline Substances
Treatment with Acids
Treatment with Salts
Treatment with Oxidising Agents
Treatment of Starch with Swelling Agents
Addition of Various Compounds to Starch Adhesives
Dextrin Adhesives
15. The Foodstuff Industry
Potato Products in the Food Industry
Importance of the Storage History of Potatoes
Colour of Potato Chips
Cooking other than Frying
The Gelatinisation of Starch
The Effect of Various Factors on Gel-Strength of Starch Pastes
Uses of Starch on Various Foodstuff Preparations
Starch in the Baking Industry
Moisture Absorption by Dough
The Influence of Other Physical Properties of
Starch on Baking Quality
The Diastatic Activity of Flours
The Chemistry of certain Baking Faults
16. The Paper Industry
ENGINE SIZING
Tub Sizing
Coated Papers
Miscellaneous
17. The Textile Industry

Sizing of Yarns

Sizing

Considerations influencing Sizing

Mechanical Properties of Starch Films and

Sized Cloths Arranged in Order of Decreasing Magnitude

The Effect of Auxiliary Agents on the

Properties of Sizes and Finishes

Desizing

Enzymes

The Use of Enzymes in Desizing

The Finishing of Textile Fabrics

Adhesive Dressings

Characteristics of Individual Starches

Wheat Flour

Tinting and Blueing Agents

The Suitability of Starches and Dextrins

The Printing of Textile

Function of the Thickener

Colour Value

Starch Products used for Thickenings

Disadvantages attendant on the Use of Starch Thickenings

Thickenings of British Gums

18. Miscellaneous Uses of Starches and Dextrins

The Soap Industry

Laundry Starches

Cosmetic and Pharmaceutical Uses

Horticultural Uses

Fire-Proofing Preparations

Explosives and Fuels

Some Unclassified Uses

19. Utilisation of the By-Products of Starch Manufacture

20. Antiseptic Agents and Preservatives

21. General Features and Nomenclature of Amylases

Occurrence

Composition

22. Preparation of Enzymes used in the Starch Industry

Enzymes from Malt

Preparation of Individual Malt Enzymes

Enzymes from Moulds or Fungi

Enzymes from Animal Juices

Bacterial Enzymes

23. The Action of α -Amylase on Starch

Soluble Starch

HYDROLYSIS OF STARCH BY α -AMYLASE

α -amylodextrin

Amyloamylose

Erythro Bodies

α - and β -Glucosides

The Mode of Action of α -amylase

24. Analysis of Starch and its Derivatives

General Methods of Analysis

ANALYSIS OF CORN STARCH

ANALYSIS OF STARCH DERIVATIVES

ANALYSIS OF STARCH HYDROLYZATES

Dextrose

Saccharide Contents of Acid-Converted Starch Hydrolyzates

Reducing Sugars

Schoorl Method : Conversion of Titer Difference to Reducing Sugar

Assay by Specific Gravity

Conversion of Commercial Degrees Baumé to % Dry

Substance for Commercial Corn Syrups and Dextrose Solutions

Trace Components

Calcium

Copper

Iron

Chloride

SULFATE

ANALYSIS OF FEED PRODUCTS

Starch

Crude Fiber

Lactic Acid

Xanthophylls

ANALYSIS OF CORN OIL

Iodine Value

Peroxide Value

Free Fatty Acids

Color

Cold Test

Smoke Point

25. List of Material Suppliers

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.

NIIR PROJECT CONSULTANCY SERVICES
