Industrial Chemicals Technology Hand Book

Code: NI85	Format: paperback
Indian Price: ₹1100	US Price: \$125
Pages: 556	ISBN: 817833075X
Publisher: Asia Pacific Business Press Inc.	

Description

Growth in demand for chemicals in developing countries is high leading to substantial cross border investment in the chemical sector. The chemical industry comprises the companies that produce industrial chemicals. Chemicals are used to make a wide variety of consumer goods, as well as thousands inputs to manufacturing, construction, and service industries. The applications of industrial chemical are in various fields like in organic chemicals, paint, varnishes, resins, petroleum, pigments, printing inks, acrylics polyesters engineering thermoplastics. The chemical industry itself consumes 26 percent of its own output. In modern age chemical industries have permeated most extensively in comparison with other industries and are progressing at a very rapid pace. Chemical industry is one of the oldest industries in India. It not only plays a crucial role in meeting the daily needs of the common man, but also contributes significantly towards industrial and economic growth of the nation. The chemical industry forms the backbone of the industrial and agricultural development and provides building blocks for downstream industries; it is an important constituent of the Indian economy. The chemical industry in India which generates almost 13% of total national export is growing annually at a growth rate anywhere between 10% and 12%. Global chemical production is growing and the growth is contributed by the chemical industry of developing countries.

The book contains manufacturing processes, reactions, equipments details, process flow diagram of number of chemicals, which have huge industrial uses. The major contents of the book are iodine from oil well brines, lactic acid from corn sugar, modern production of chlorine and caustic soda, organic chemicals, chemicals derived from methane and so on.

This book is very useful for new entrepreneurs, industrialists, consultants, research scholars, technical institutions, chemists and libraries. This book is recommended to all

related to field of chemical process technology.

Content

1. Iodine From Oil Well Brines

Brine Collection

Brine Cleanup

Blowing-Out And Recovery

Iodine Finishing

Process Control

2. Lactic Acid From Corn Sugar

Dextrose, Whey, Or Molasses May Be Used For Lactic Acid Fermentations

Four Different Grades

In Commercial Practice Yields Of 85% Of Fermentable Hexose Are Normal

L. Delbruckii Is Culture Used; Corn Sugar Is Principal Fermentation Medium

Calcium Lactate Is Produced During 4- To 6-Day Fermentation Period

Recycled Calcium Sulfate Added To Aid Filtration

Calcium Lactate And Sulfuric Acid React To Form Lactic Acid

Stainless Steel Is Used For Acid Evaporators

Calcium Lactate Is Also Processed As An End Product

Fermentation Processes Operate Around The Clock

Corrosion Is A Major Problem In Production Of Lactic Acid

Foods And Tanning Industries Use Large Quantities Of Lactic Acid

Salts And Other Derivatives Are Used In Diversified Industries

Future Expansions In Lactic Acid Production Must Supply A Quality Product At A Lower Price

3. Modern Production Of Chlorine And Caustic Soda

Raw Materials

Storage And Preparation

Chlorine Production

Caustic Preparation

Hydrogen Chloride

Filling And Storage Systems

Instrumentation And Safety

4. Nitrofurans

Uses For Nitrofurans Extend Into Fields Of Both Human And Veterinary Medicine

Synthesis Of 5-Nitro-2-Furaldehyde Diacetate Is Initial Phase Of Batchwise Procedure
5-Nitro-2-Furaldehyde Diacetate Is Reacted With Semicarbazide To Form Nitrofurazone
Synthesis Of Furazolidone Is Based On Reaction Of 3-Amino-2-Oxazolidone With 5-Nitro-2-Furaldehyde Diacetate
Analytical Tests Are Run On All Raw Materials And Final Products

5. Organic Chemicals

Chemicals Derived From Methane

Synthesis Gas

Chloromethanes

Acetylene

Hydrogen Cyanide

Carbon Disulfide

Chemicals Derived From Ethylene

Polyethylene

Ethylene Oxide

Chlorinated Ethanes And Ethylenes

Ethanol

Ethylbenzene

Acetaldehyde, Acetic Acid, Acetic Anhydride, Vinyl Acetate

Ethylene Oligomers (Alpha Olefins) And Linear Primary Alcohols

Ethylene-Propylene Elastomers

Propionaldehyde

Other Ethylene Uses

Chemicals Derived From Propylene

Polypropylene

Acrylonitrile

Propylene Oxide

Isopropyl Alcohol

Cumene

Oxo Chemicals

Propylene Oligomers, Dodecene, And Nonene 91

Acrylic Acid And Esters

Glycerin

Chemicals Derived From Butanes And Butylenes

N-Butane Derivatives

Isobutanes

Butylenes

Isobutylene

Butadiene

Higher Aliphatic Hydrocarbons

Cyclopentadiene

Isoprene

N-Paraffins

Linear Olefins

Primary And Secondary Higher Alcohols

Chemicals Derived From Benzene, Toluene, And Xylene

Chemicals From Benzene

Styrene

Cumene (Phenol)

Cyclohexane

Maleic Anhydride

Detergent Alkylate

Nitrobenzene (Aniline)

Chlorobenzenes

Derivatives Of Toluene

Toluene Diisocyanate (Tdi)

Benzoic Acid

Benzyl Chloride

Chemicals From Xylene

Terephthalic Acid (Dimethyl Terephthalate)

Phthalic Anhydride

Isophthalic Acid

Naphtalene Derivatives

6. Paint, Varnishes, Resins

Butyl Acetate

N-Butyl Acetate

Iso-Butyl Acetate

Sec. Butyl Acetate

Tert-Butyl Acetate

Manufacturing Process

Note

Reaction

Flow Diagram

Uses

Grades

Toxicity

Epoxy Resins

Properties

Properties Of Typical Commercial Bisphenol A Epoxy Resins.

Manufacturing Process

Formaldehyde

Manufacturing Process

From Methanol

Hexamethylene Tetramine

Manufacturing Process

From Formaldehyde And Ammonia

Reaction

Flow Diagram

Uses

Grades

Toxicity

Solubility Of Pentaerythritol

Manufacturing Process

From Formaldehyde And Acetaldehyde

Reaction

Flow Diagram

Note

Uses

Grades

Specifications Of Pentaerythritol

Toxicity

7. Petroleum And Its Products

The Nature Of Petroleum

Largest Energy Supplier

Product Names

Refined Product

Product Specifications

Product Yields

Petrochemicals

Refining Schemes

Feedstock Identification

Crude Oil Pretreatment

Crude Oil Fractions

Gasoline

Volatility

Sulfur Content

Octane Number

Distillates
Residuals
Producing More Light Products
Cracking
Vacuum Distillation
Reconstituting Gases
A Modern Refinery
Petrochemicals
Process Details
Crude Desalting
Crude Distillation
Hydrotreating
Catalytic Reforming
Catalytic Cracking
Coking
Hydrocracking
Polymerization
Alkylation
Ether Processes
Future Processing

8. Pigments

Carbon Black
From Oil Or Natural Gas (Furnace Process)
Reaction
Flow Diagram
Note
From Natural Gas (Channel Process)
Reaction
Note
Uses
Grades
Titanium Dioxide
Typical Pigment Properties Of Anatase And Rutile TiO_2
Typical Crystal Properties Of Rutile And Anatase TiO_2
Manufacturing Process
Sulphate Process
Note
Reaction
Chloride Process

Note
Grades
Toxicity
Manufacturing Process
From Zinc Metal
(French Or Indirect Process)
Note
Reaction
Flow Diagram
From Zinc Sulphide Ores
Reaction
Flow Diagram
Note
Uses
Grades
Toxicity

9. Pigments, Paints, Polymer Coatings Lacquers, And Printing Inks

Powder Coatings
Electron Beam (Eb) And Ultraviolet (Uv) Curable Coatings
Current Automotive Coating Trends
Coatings For Plastics
New Cross-Linking Technologies
Printing Inks
Pigments
Inorganic Pigments
Organic Pigments
Pearlescent Pigments
Aluminum Pigments
Lacquers

10. Potassium Borohydride Manufacture

Like Sodium Borohydride
Metal Hydride's Process
Potassium Borohydride's Properties
First Make Sodium Hydride Dispersion
Next Major Step-Make Sodium Borohydride
Mineral Oil Dispersion
Splitting Comes Next
Analytical Program

11. P-Xylene From Petroleum

Low Temperature Crystallization Is The Standard Recovery Method

Eutectic Point Limits P-Xylene Yield To 10% Of The Xylene

First Crystallization Stage Produces 80% Purity P-Xylene

Secondary Crystallization Increases Product Purity To Better Than 95%

Product Quality Depends Largely On Crystallization Techniques

12. Reagent Grade Chemicals

Standardization

Barium Chloride

Sulfanilic Acid

Magnesium Sulfate

Ferrous Ammonium Sulfate

Potassium Metaperiodate

Cuprous Thiocyanate

Analysis And Packaging

Future Prospects

13. Salt Manufacture

The Brine Must Be Purified Before Use

Multiple Effect Evaporators Are Used For Vacuum Pan Salt

Salt Evaporation Has Many Special Problems

Dewatered Salt Must Be Dried, Screened, And Packaged

Grainer Salt Is Made By Evaporation In Open Pans

14. Sulfuric Acid From Anhydrite

Theoretical Studies And Chemistry Of Anhydrite Process

Contact Process

15. Synthetic Methanol Production

History Of Synthetic Methanol

Foreign Development

Operating Data For Methanol Process

Gas Stream

Steam Systems

Water Systems

Synthesis Gas Preparation

Addition Of Carbon Dioxide

Compressor Cycle

Converter System

Converter Auxiliaries
Refining By Distillation
Loading And Shipping
Instrumentation
Chemical Control
Maintenance Procedure

16. Synthetic Nitrogen Products

Nitrogen Fixation
Nitrogen Oxides
Ammonia
Other Processes
Calcium Cyanide
Ammonia
Manufacturing Processes
Carbon Monoxide Shift
Carbon Dioxide Removal
Water
Hot Potassium Carbonate
Monoethanolamine (Mea)
Sulfinol
Propylene Carbonate
Rectisol-Refrigerated Methanol
Giammarco-Vetrocoke
Final Purification
Methanation
Nitrogen Wash Operation
Copper Ammonium Carbonate Scrubbing
Selective Oxidation Of Carbon Monoxide
Cryogenic Purifier
Compression
Ammonia Synthesis
Modern Single-Train Ammonia Plants
Uses Of Ammonia
Nitric Acid
Chemistry Of Ammonia Oxidation
Processes
Uses Of Nitric Acid
Ammonium Nitrate
Urea

Uses Of Urea

Melamine

Aliphatic Amines

Methylamines

Hexamine

Hydrazine

Manufacture

Hydrazine Handling

Hydrogen Cyanide

Manufacture

Other Compounds

17. Synthetic Resins & Plastics

Introduction

Polymer Structure And Nomenclature

Properties Of Resins And Plastics

Important Classes Of Plastics And Ins: Thermoplastics Polyolefins

Vinyl Resins

Polystyrene And Styrene Copolymers

Acrylics

Polyesters

Engineering Thermoplastics

Important Classes Of Plastics And Resins: Tosets 433

Polyurethanes

Phenolic Resins

Unsaturated Polyester Resins

Epoxies

Silicone Resins

Polymer Synthesis

Free Radical Addition Polymerization

Ionic Chain Addition Polymerization

Ring Opening Addition Polymerization

Polymer Modification

Polymerization Methods

Polymer Rheology

Fabrication Of Plastics

Extrusion

Injection Molding

Reaction Injection Molding (Rim)

Compression And Transfer Molding

Pultrusion
Blow Molding
Thermoforming
Rotational Molding
Foamed Plastics
Plastics And Environmental Issues

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
