The Complete Technology Book on Detergents (2nd Revised Edition)

Code: NI92	Format: paperback
Indian Price: ₹1100	US Price: \$125
Pages: 542	ISBN: 9789381039199
Publisher: NIIR PROJECT CONSULTANCY SERVICES	

Description

The Indian detergent industry is about three decades old. An interesting and unique feature of detergent industry in India is the existence of non power operated units which do not use any electrical power for the production of detergent powder. But the production technology of detergents have been changed involving high technique in process control, more skilled personnel and requiring large input. There are various forms of detergents; liquid detergents, paste detergents, solid detergents etc. Whether in liquid or in powdered forms, present detergent products are complex mixtures of several ingredients including performance additives such as bleaches, bleach activators etc. The scope and spectrum of methods and techniques applied in detergent analysis have changed significantly during the last decade..

The book outlines features and experimental parameters for many essential procedures, and emphasizes the latest techniques and methods. This book emphasizes practical aspects of detergent production with latest development and other special products based on synthetic surfactants. This book basically deals with the builders, additives and components of detergents, recent developments in surfactant, manufacture of active Ingredients for detergents, manufacture of finished detergents, application and formulation of detergents, packaging of detergents, analysis of detergents, machinery photographs with their suppliers, directory of raw material suppliers etc.. This is an attempt to fill the need of those desirous of starting detergent industry in small scale sector and necessarily contains analytical methods for testing and evaluation of raw as well as final products.

Content

1. Introduction

Definition

Biodegradability

Synthetic Detergents

Introduction

Surfactant Hydrophile-Hydrophobe Balance

Anionic Surfactants

Alkylaryl Sulfonates

Sulfonation

Sulfation

Neutralization

Nonionic Surfactants

Ethoxylation

Amphoteric Surfactants

Alkylolamides

Cationic Surfactants

2. Builders, Additives and components of detergents

Phosphates

Silicates

Soluble glass

Water glass

Soluble powders

Contribution by the alkaline radical
(Na_2O or K_2O)

Contribution by the SiO_2 radical

Zeolites

Carbonates

Sodium Carbonate or Soda Ash- Na_2CO_3

Sodium Bicarbonate- NaHCO_3

Sodium Sesquicarbonate, or Modified Soda

Potassium Carbonate

Oxygen-releasing Compounds

Sundry Inorganic Builders

Borax

Sodium Chloride

Magnesium Sulphate

Insoluble Inorganic Fillers

Caustic Alkalis

Ammonia

Colloidal Silica

Sodium Hypochlorite

3. Recent Developments in Surfactant Synthesis

Sulphation of glycerine

Nonionic surfactants

Amphoteric surfactants

Anionic surfactants

Nonionic surfactants

Cationic surfactants

Amphoteric surfactants

Miscellaneous surfactants

Surfactant synthesis

Toxicological studies

Effluent decolorisation

Synthesis of Surfactants and their Toxicity-IV

Diastereoisomers

Fructose $C_6H_{12}O_6$

Saccharose or sucrose or table sugar

$C_{12}H_{22}O_{11}$

D-Mannose

D-Galactose

b-Glucosamine

Anionic surfactants

Cationic surfactants

Nonionic surfactants

Sugar-based surfactants

Toxicity of surfactants

4. Manufacture of Active Ingredients for Detergents

Sulphonation Process

Manufacture of Alkyl benzene sulphonic acid
(Acid Slurry)

Alkyl benzene

Process to obtain straight chain normal

paraffins of desired chain length
Major technologies using molecular sieves
for separation of n-paraffins
Process for alkylation of benzene by narrow
cut (C10-C14) n-paraffin
Review of technologies for production of LAB
from n-paraffins
UOP technology to manufacture lab from
kerosene
Prefractionation unit
Feed preparation (hydrotreater) unit-hydrobon
n-Paraffin Extraction Unit (MOLEX)
Catalytic partial dehydrogenation unit-PACOL
HF alkylation unit
Advance in technology in production of LAB
Improvements in dehydrogenation catalysts
and process
Introduction of additional step to achieve
reduction of by-product diolefins-Define
process
Introduction of a solid catalyst in place of
liquid HF catalyst-UPO-Detal Process
Other raw materials for sulphonation
Sulphuric acid and oleum (fuming sulphuric
acid)
Liquid SO₃
Sulphur
Sulphonation with sulphuric acid and oleum
Batch sulphonation
Manufacturing process
Sulphonation with 98% sulphuric acid
Sulphonation with oleum
Continuous sulphonation with oleum
Chemithon Process
Bellestra sulfan process
Proctor & Gamble Process
Rifenberick process
Sulphonation with SO₃
Production of sulphur trioxide
Sulphur burning SO₃ plant

Oleum stripping
Stabilised liquid sulphur trioxide
vapourisation
Batch sulphonation
Continuous sulphonation with sulphur trioxide
Cascade sulphonation
SO₃ withdrawal
Sulphonation plant
Exhaust gas scrubbing
Ballestra Sulphurex Process
Air drying
SO₂/SO₃ production
Film sulphonation & sulphation
(Sulphurex F)
Double-step Neutralisation
Alpha olefins hydrolysis
Gas scrubbing
SO₃ absorption in H₂SO₄ column
Heat recovery
Mazzoni SOCS Process
Chemithon SO₃ Sulphonation
SO₃ generation
Sulphonation
Annular falling film reactor
Neutraliser system
Exhaust gas cleaning up system
Allied chemical thin film sulphonation
Stepan chemical process
Manufacture of fatty alcohol sulphonates
Sulphonation with chloro sulphonic acid
Manufacture of alpha olefin sulphonate
Wax cracking
Ethylene polymerisation
The natural route
Comparison of AOS and methyl ester sulphonate
Comparison of AOS and LABs in various products
Dish-washing liquids

Fine cloths washing liquids
Laundry soaps
Toilet soaps
Personal care products
Detergent cakes
Comparison of AOS with alcohol based
surfactants
Alfodet
Product usage
Ethoxylation Process
Ethylene oxide
Fatty acid
Fatty alcohol
Natural process
Synthetic process
Sodium reduction process
High pressure hydrogenation
OXO Process
ALFOL Process
Alkyl phenols
Manufacture of lauric d-ethanol amide
(Ninol AA 62)
Method of manufacture
Manufacture of super amide (2:1 type)
Manufacture of methyl ester
Manufacture of super-amide
Manufacture of sulphate alkanolamides
IGEPOB
Manufacture of Igepon B conc. paste
Recent Developments in Sulphonation
Technology
Direct Production of Extremely Viscous
Sulphonic Acids Without the Use of Solvents
Developments in Detergent Manufacture
for Consumer Products
Minimization of 1, 4-Dioxane
Sodium Alpha Sulpho Methyl Ester
(SASMA) Production
Dry Active Detergent Manufacturing

5. Manufacture of Finished Detergents

Powders

Simple Absorption

Combined Absorption and Neutralization

Dry Mixing of Powders

Spray-drying of Powders

Colour

Particle Size and Spread

Bulk Density

Residual Moisture

Stickiness

Product Uniformity

Separation of Powder

Wet Scrubbing

Use of Fines

Combination of Spray-dried and Dry-mixed

Powders

Ballestra 'Complex' System

Patterson-Kelley Systems

Anhydro System

Drum-Drying of Powders

Liquid Detergents

Toilet Preparations

Paste Detergents

Calcium Sulphonates

Solid Detergents

Detergent Toilet Bars

Household Scrub Bars

Fabric Softeners

Abrasive Cleaners

6. Application and Formulation of Detergents

Foam

Household Cleaning

Heavy-Duty Laundering

Foam Control

Light-Duty Household Products

General-Purpose Detergents

Choice of Non-ionic

Concentrated Powders
Cold Water Washing
Hard-Surface Cleaners
Machine Dishwashing
Abrasive-Type Cleaners
Miscellaneous Household Cleaners
Commercial Laundering
Solvent Detergents
Carpet and Upholstery Cleaners
Textile Dressing
Mercerizing
Food and Dairy Industries
Advantage of sulphamic acid
Detergent Sanitizers
Metal Cleaners
Miscellaneous Cleaners
Lavatory Cleaner
Hand Cleansers
Waterless Hand Cleansers

7. Important Formulations of Synthetic
Detergent
Detergent Powder
Market Potential & Scope
Synthetic Detergent Powder
Manufacture of Household Detergent Powders
Process
Formulations for Detergent Powders
General Purpose Powder
Raw Material Requirements (per month)
Process of Manufacture and Formulations
Heavy Duty Liquid Detergents
Opaque Lotion-Type Heavy Duty Liquid
Detergent
Process of Manufacture of Liquid Detergent
Dish Washing Liquid Detergents
Process of Manufacture
Liquid and Cream Soap Products
Liquids for the Washing of Fabrics
Thick Liquids and Creams

Machine Dishwashing Products
The Composition of Powder
Liquid Cleansers for Hard Surface
Window Panes Cleaning Liquid
Dry Cleaning Detergent
Process of Manufacture
List of Plant & Machineries
Raw Material Requirements (per month)
Soap Powders
Introduction
Spray-Chilled Powders
Formulation for Spray Chilled Soap Powders
Spray Dried Powders
Spray Drying Practice
Cleansing Powder (Vim Type)
Manufacturing Process
Formulation for Cheap Cleansing Powder
List of Plant and Machinery
Raw Material Requirements
Market Potential
Liquid Detergents
Requisites of Surfactants for Formulating
Liquid Detergents
Surfactants most Commonly Used
Builders
Viscosity Controllers
Other Ingredients
Household Liquid Detergents for Laundering
Heavy Duty
Procedure
Light Duty: (for silk, wool etc.)
Procedure

8. Packaging of Detergents

Packaging of Detergent Powder
Types of Packaging
Packaging of Detergent Bars
Packaging Material Specifications
Package Testing Methods
Introduction

Physical Tests

Substance

Dimensions

Bursting strength

Compression resistance

Tensile strength

Scuff resistance

Moisture content

Other Tests

Wax/polythene substance in coated wrappers

Stability to alkali

Stability to soap

Water absorption

Type of fluting

Machine direction of paper and board

Stiffness of board

Miscellaneous Tests

Packaged Commodities Rules

Introduction

Declarations to be Made on Every Package

Permissible Errors of Quantity

Commodities to be Packed in Specified
Quantities

Management of Detergent Factories

Technical Efficiency

Introduction

Yield

Fatty acid yield

Glycerol yield

Active detergent yield

Over/under usage of materials

Packing loss/gain

Oil usage pattern

Scrap and downgrading losses

Productivity

Steam, water, electricity

Financial Summary

Pollution Control

Introduction

Sources of Pollution

Oil spills
Chemical spills
Bleaching
Chemical treatment
Glycerine Recovery
Synthetic Detergents
Sulphonation
Detergent powder manufacture
Handling of Raw Materials
Slurry Making, Wash Water
Tower and Air Lift Exhausts
Powder Spillages
Fluidiser Exhaust Air
Boiler House
Coal spillages
Water treatment section
Boiler Blow Down
Chimney exhaust
Boiler ash
Space and location
Effluent characteristics
The requirements of treated effluent
Effluent treatment methodology
Treatment of Gaseous Effluents
Chemical bleaching
Saponification of oils
Toilet soap mixer
Refrigeration system
Oleum handling in the sulphonation plant
Oleum still furnace
NSD bar mixer exhaust
Boiler exhaust
Analytical Support
Introduction
Oils
Chemicals
Packaging Materials
In-process Materials
Finished Products
Microbiological Controls

Analytical Equipments
General Comments
Quality Control
Introduction
Organisation
Facilities
Specifications
Chemicals
Packaging materials
Finished product
Sampling
Sampling of Raw Materials
Packing materials
Finished products
Vendor education and rating
Process audit
Reporting
Microbiological Controls
Bureau of Indian Standards Specifications
Quality Assurance
Introduction
Conventional Approach to Quality
Recommended Approach to Quality
Company Quality Policy
Brand Quality Objectives
Implementation of Quality Assurance
Quality Control
Quality Audit
Summary
Total Quality Management (TQM)
ISO 9000 Series Standards
Common Quality Problems of Detergents
Detergent powder
Detergent Cake
Stain Removal
Introduction
Type of Stains
Removal of Stains
Lime soap
Protein stains

Iron compounds
Stains due to dyes
Mildew stains
Physical methods of stain removal
Assessment of stain removal

9. Analysis of Detergents

Introduction

Synthetic Detergents

Active Matter

Principle

Standard sodium lauryl sulphate
solution-0.004M

Determination of the purity of sodium lauryl
sulphate

Molarity of sodium lauryl sulphate

Standard benzethonium chloride
(hyamine 1622) soln. 0.004M

Determination of anionic active matter

Moisture of Detergent Powders and Cakes

Principle

Process

pH of 1% solution

Principle

Procedure

TFM and Combined Glycerol in Oils

Combined glycerol in oils

Principle

Procedure

Estimation of TFA

10. Enzymatic Detergents Empower, Metrizyme

Detergezime

The importance of cleaning instruments
prior to disinfection

The definition and properties of enzymes

The benefits associated with incorporation
of enzymes into detergents

The properties and benefits of surfactants
in enzymatic detergents

Practical usage of enzymatic detergents
Comparative assessment of Metrex and
competitor enzyme products

Directory Section

List of Raw Material Suppliers
Plant and Machinery Suppliers
Photographs of Machinery and Equipment

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
